(Developmental Cell 32, 617–630, 9 March 2015)

During the production process of this article, the phrase “mean values \pm SD” was mistakenly added to the legends of Figures 6A, 6D, and S1F. In addition, in the legend of Figure 6D, the p value should be $**p < 0.01$, rather than $**p < 0.001$, as was indicated. These errors have now been corrected online. We apologize for any confusion this may have caused.
