

Erratum

Sonic Hedgehog Is Required for Progenitor Cell Maintenance in Telencephalic Stem Cell Niches

Due to an editorial error, the print version of Figure 1 panels (A) and (B) were reversed. Please note that this error was corrected in the downloadable PDF file and the online versions of this paper. In addition, the Acknowledgments failed to note that the previously unpublished *Shh^{ires-LacZ}* allele used to examine the distribution of Shh in the postnatal telencephalon (Figures 3C and 3D) was the generous gift of Andreas H. Kottmann and Thomas M. Jessell, HHMI Department of Biochemistry and Molecular Biophysics, Center for Neurobiology and Behavior, Columbia University. This article appeared in *Neuron* 39, 937–950 (September 11, 2003).
