

SPECIAL REVIEW ARTICLE

This review article was prepared for the Journal of Investigative Dermatology by invitation. It is the first of a series of such articles which will appear in this journal in the months to come.

Doctor Richard Winkelmann has taken on the responsibilities of obtaining and organizing these reviews. The Society for Investigative Dermatology is deeply grateful for his efforts and is particularly indebted to Doctors Beutner, Jordon and Chorzelski for their excellent opening contribution to the series.

R. B. STOUGHTON, M.D., Editor

THE IMMUNOPATHOLOGY OF PEMPHIGUS AND BULLOUS PEMPHIGOID*

ERNST H. BEUTNER, Ph.D.,† ROBERT E. JORDON, M.D.‡
AND TADEUSZ P. CHORZELSKI, M.D.§

TABLE OF CONTENTS

Introduction	
I. Antibody nature of immunofluorescent staining	64
A. Patterns of indirect immunofluorescence	64
B. Titration of immunofluorescent staining	65
C. Methods of quantitative analysis in immunofluorescent staining	66
D. Organ Specificity Studies	67
E. Summary of evidence for antibody nature of "pemphigus" and "pemphigoid" antibodies	68
II. Autoantibody nature of skin antibodies and their <i>in vivo</i> reactivity	69
A. The autoantibody nature of the intercellular antibodies of pemphigus and the basement membrane antibodies of bullous pemphigoid	69
B. <i>In vivo</i> binding of IgG and complement	70
III. Surveys of incidence of "pemphigus" and basement membrane antibodies	70
A. Concurrence of skin autoantibodies and chronic bullous diseases	70
B. Basement membrane antibodies and bullous pemphigoid	71
C. Titers of antibodies to intercellular areas and severity of pemphigus	71
D. Brazilian pemphigus foliaceus (BPF)	72
E. Association of pemphigus and pemphigoid with other immunologic disturbances	73
F. "Pemphigus" antibodies in problem cases	73
IV. Possible sources of error and their future resolution by other serologic methods	74
A. Blood group antibodies	74
B. Cytoplasmic staining reactions and nonspecific staining (NSS)	75

Received April 26, 1968.

This work was supported in part by USPHS grants AM-10537 and CA-02357.
