CONTENTS OF VOLUME 97

Number 1, January 2006

Grant Hillier and Federico Martellosio. Spatial design matrices and associated quadratic forms: structure and properties 1
Hongtu Zhu and Heping Zhang. Asymptotics for estimation and testing procedures under loss of identifiability 19
Antonio Colangelo, Marco Scarsini and Moshe Shaked. Some positive dependence stochastic orders 46
Jacob A. Wegelin, Asa Packer and Thomas S. Richardson. Latent models for cross-covariance 79
Hélène Massam and Jacek Wesołowski. The Matsumoto–Yor property and the structure of the Wishart distribution 103
Graciela Boente, Ana M. Pires and Isabel M. Rodrigues. General projection-pursuit estimators for the common principal components model: influence functions and Monte Carlo study 124
Arjun K. Gupta, Solomon W. Harrar and Yasunori Fujikoshi. Asymptotics for testing hypothesis in some multivariate variance components model under non-normality 148
R.B. Arellano-Valle, G. del Pino and P. Iglesias. Bayesian inference in spherical linear models: robustness and conjugate analysis 179
Jun Shao and Shein-Chung Chow. Variable screening in predicting clinical outcome with high-dimensional microarrays 198
Mong-Na Lo Huang and Chun-Sui Lin. Minimax and maximin efficient designs for estimating the location-shift parameter of parallel models with dual responses 208
Biao Zhang. Prospective and retrospective analyses under logistic regression models 221

Number 2, February 2006

E. Gómez-Sánchez-Manzano, M.A. Gómez-Villegas and J.M. Marín. Sequences of elliptical distributions and mixtures of normal distributions. 295
Michael Kohler, Adam Krzyżak and Harro Walk. Rates of convergence for partitioning and nearest neighbor regression estimates with unbounded data 311
Jinhong You and Gemai Chen. Estimation of a semiparametric varying-coefficient partially linear errors-in-variables model 324

doi:10.1016/S0047-259X(06)00151-5

Saralees Nadarajah. On the ratio X/Y for some elliptically symmetric distributions 342
Sara Taskinen, Christophe Croux, Annaliisa Kankainen, Esa Ollila and Hannu Oja. Influence functions and efficiencies of the canonical correlation and vector estimates based on scatter and shape matrices 359
Mathias Drton, Steen A. Andersson and Michael D. Perlman. Conditional independence models for seemingly unrelated regressions with incomplete data 385
Carlos A. León, Jean-Claude Massé and Louis-Paul Rivest. A statistical model for random rotations 412
Javier Rojo and Musie Ghebremichael. Estimation of two ordered bivariate mean residual life functions 431
Hans Schneeweiss and Chi-Lun Cheng. Bias of the structural quasi-score estimator of a measurement error model under misspecification of the regressor distribution 455
Yong Song Qin and Bruce Smith. The likelihood ratio test for homogeneity in bivariate normal mixtures 474
Arjun K. Gupta, Jin Xu and Yasunori Fujikoshi. An asymptotic expansion of the distribution of Rao's U-statistic under a general condition 492
Jian-Lun Xu and Grant Izmirlian. Estimation of location parameters for spherically symmetric distributions 514
Paul Embrechts and Giovanni Puccetti. Bounds for functions of multivariate risks 526
David Pollard and Peter Radchenko. Nonlinear least-squares estimation 548
T. Deck. Asymptotic properties of Bayes estimators for Gaussian Itô-processes with noisy observations 563
Volume Author Index 574

Number 3, March 2006

Mario Faliva and Maria Grazia Zoia. New insights into best linear unbiased estimation and the optimality of least-squares 575
Zhang Li-Xin. Asymptotic results on a class of adaptive multi-treatment designs 586
Ivan Žežula. Special variance structures in the growth curve model 606
Kai-Tai Fang, Song-Gui Wang and Dietrich von Rosen. Restricted expected multivariate least squares 619
Volker Krätschmer. Strong consistency of least-squares estimation in linear regression models with vague concepts 633

M. Hagedorn, P.J. Smith, P.J. Bones, R.P. Millane and D. Pairman. A trivariate chi-squared distribution derived from the complex Wishart distribution . . . 655
Gang Li and Jing Qin. Analysis of two-sample truncated data using generalized logistic models . . . 675
Dongchu Sun and Xiaoqian Sun. Estimation of multivariate normal covariance and precision matrices in a star-shape model with missing data . . . 698
Shaohua Yu, Qiqing Yu and George Y.C. Wong. Consistency of the generalized MLE of a joint distribution function with multivariate interval-censored data . . . 720
Wenji Pu and Xu-Feng Niu. Selecting mixed-effects models based on a generalized information criterion . . . 733
Harry Haupt and Walter Oberhofer. Best affine unbiased representations of the fully restricted general Gauss–Markov model . . . 759
Athanasios C. Micheas and Konstantinos Zografos. Measuring stochastic dependence using φ-divergence . . . 765
B.M. Golam Kibria. The matrix-t distribution and its applications in predictive inference . . . 785

Number 4, April 2006

Ismihan Bairamov. Progressive Type II censored order statistics for multivariate observations . . . 797
Jin Wang and Robert Serfling. Influence functions for a general class of depth-based generalized quantile functions . . . 810
James R. Schott. A high-dimensional test for the equality of the smallest eigenvalues of a covariance matrix . . . 827
Jinhong You and Xian Zhou. Statistical inference in a panel data semiparametric regression model with serially correlated errors . . . 844
S. Péché. Non-white Wishart ensembles . . . 874
C. Asci, G. Nappo and M. Piccioni. The hyper-Dirichlet process and its discrete approximations: The butterfly model . . . 895
Scott Gilbert and Petr Zemčík. Whos afraid of reduced-rank parameterizations of multivariate models? Theory and example . . . 925
Rachida Ouysse. Consistent variable selection in large panels when factors are observable . . . 946
D.R. Jensen. Gauss inequalities on ordered linear spaces . . . 985
Benoît Cadre. Kernel estimation of density level sets . . . 999

Number 5, May 2006

Matthew W. Mitchell, Marc G. Genton and Marcia L. Gumpertz. A likelihood ratio test for separability of covariances . . . 1025

Volker Krätschmer. Limit distributions of least squares estimators in linear regression models with vague concepts 1044
Hirokazu Yanagihara. Corrected version of AIC for selecting multivariate normal linear regression models in a general nonnormal case 1070
P.M. Robinson and J. Vidal Sanz. Modified Whittle estimation of multilateral models on a lattice 1090
Ke-Hai Yuan and Peter M. Bentler. Asymptotic robustness of standard errors in multilevel structural equation models 1121
Qihua Wang. Nonparametric regression function estimation with surrogate data and validation sampling 1142
Yingcun Xia and Wolfgang Härdle. Semi-parametric estimation of partially linear single-index models. 1162
Michael J. Daniels. Bayesian modeling of several covariance matrices and some results on propriety of the posterior for linear regression with correlated and/or heterogeneous errors. 1185
J.M. Fernández-Ponce and R. Rodríguez-Griñolo. Preserving multivariate dispersion: An application to the Wishart distribution 1208
María Teresa Gallegos and Gunter Ritter. Parameter estimation under ambiguity and contamination with the spurious model 1221
Yosef Rinott and Marco Scarsini. Total positivity order and the normal distribution 1251

Number 6, July 2006

Heng Li. The covariance structure and likelihood function for multivariate dyadic data 1263
Bhaskar Bhattacharya. Maximum entropy characterizations of the multivariate Liouville distributions 1272
Yasuko Chikuse. State space models on special manifolds 1284
Liu-Gen Xue and Lixing Zhu. Empirical likelihood for single-index models. 1295
Pierre Druilhet and Alain Mom. PLS regression: A directional signal-to-noise ratio approach 1313
Wei Gao and Satoshi Kuriki. Testing marginal homogeneity against stochastically ordered marginals for $r \times r$ contingency tables 1330
Taizhong Hu and Chaode Xie. Negative dependence in the balls and bins experiment with applications to order statistics 1342
Subir Kumar Bhandari and Ayanendranath Basu. On the unlinking conjecture of independent polynomial functions 1355
Rosaura Fernández-Pascual, María D. Ruiz-Medina and José M. Angulo. Estimation of intrinsic processes affected by additive fractal noise . . . 1361

Jinho Baik and Jack W. Silverstein. Eigenvalues of large sample covariance matrices of spiked population models 1382
M. Broniatowski and S. Leorato. An estimation method for the Neyman chi-square divergence with application to test of hypotheses 1409
Subir Ghosh and Ying Tian. Optimum two level fractional factorial plans for model identification and discrimination 1437
Guillaume Marrelec and Habib Benali. Asymptotic Bayesian structure learning using graph supports for Gaussian graphical models 1451
Solomon W. Harrar, Eugene Seneta and Arjun K. Gupta. Duality between matrix variate t and matrix variate V.G. distributions 1467

Number 7, August 2006

Hisayuki Tsukuma and Yoshihiko Konno. On improved estimation of normal precision matrix and discriminant coefficients 1477
Ming-Yen Cheng and Liang Peng. Simple and efficient improvements of multivariate local linear regression 1501
Masashi Miyamura and Yutaka Kano. Robust Gaussian graphical modeling 1525
Jan Kallsen and Peter Tankov. Characterization of dependence of multidimensional Lévy processes using Lévy copulas 1551
Gianfranco Lovison. A matrix-valued Bernoulli distribution 1573
Wenbin Lu and Yu Liang. Empirical likelihood inference for linear transformation models 1586
Marta García Ben, Elena Martínez and Víctor J. Yohai. Robust estimation for the multivariate linear model based on a τ-scale 1600
Miguel López-Díaz. An indexed multivariate dispersion ordering based on the Hausdorff distance 1623
Beth Andrews, Richard A. Davis and F. Jay Breidt. Maximum likelihood estimation for all-pass time series models 1638
A. Christmann and S. Van Aelst. Robust estimation of Cronbach's alpha 1660
B.Q. Fang. Sample mean, covariance and T^2 statistic of the skew elliptical model 1675

Number 8, September 2006

M. Fátima Salgueiro, Peter W.F. Smith and John W. McDonald. Power of edge exclusion tests for graphical log-linear models 1691
Alexander Meister. Estimating the support of multivariate densities under measurement error 1702
Xiaoyong Wu, Guohua Zou and Jianwei Chen. Unbiased invariant minimum norm estimation in generalized growth curve model 1718

Nail K. Bakirov, Maria L. Rizzo and Gábor J. Székely. A multivariate nonparametric test of independence 1742
Martin Knott and Cyril Smith. Choosing joint distributions so that the variance of the sum is small 1757
Jan Beran. On location estimation for LARCH processes 1766
Bin Lu and Xin-Yuan Song. Local influence analysis of multivariate probit latent variable models 1783
F. Mortier, S. Robin, S. Lassalvy, C.P. Baril and A. Bar-Hen. Prediction of Euclidean distances with discrete and continuous outcomes 1799
Fumiyasu Komaki. A class of proper priors for Bayesian simultaneous prediction of independent Poisson observables 1815
José A. Díaz-García and Ramón Gutiérrez-Jáimez. The distribution of the residual from a general elliptical multivariate linear model 1829
Christophe Cuny. On the prediction of vector-valued random fields and the spectral distribution of their evanescent component 1842
Ming-Yen Cheng and Peter Hall. Methods for tracking support boundaries with corners 1870
Hammou El Barmi and Matthew Johnson. A unified approach to testing for and against a set of linear inequality constraints in the product multinomial setting 1894

Number 9, October 2006

Hiroto Hyakutake. Special issue dedicated to Professor Yasunori Fujikoshi. 1913
Minoru Siotani and Hirofumi Wakaki. Contributions to multivariate analysis by Professor Yasunori Fujikoshi 1914
Muni S. Srivastava and Yasunori Fujikoshi. Multivariate analysis of variance with fewer observations than the dimension 1927
Yasunori Fujikoshi and Vladimir V. Ulyanov. Error bounds for asymptotic expansions of Wilks' lambda distribution 1941
Hirofumi Wakaki. Edgeworth expansion of Wilks' lambda statistic 1958
Hirokazu Yanagihara, Tetsuji Tonda and Chieko Matsumoto. Bias correction of cross-validation criterion based on Kullback–Leibler information under a general condition 1965
Takashi Seo, Jun Kikuchi and Kazuyuki Koizumi. On simultaneous confidence intervals for all contrasts in the means of the intraclass correlation model with missing data 1976
Motohiro Senda and Masanobu Taniguchi. James–Stein estimators for time series regression models 1984
Ryuei Nishii and Shinto Eguchi. Image classification based on Markov random field models with Jeffreys divergence 1997

Hidenori Okumura and Kanta Naito. Non-parametric kernel regression for multinomial data. 2009
Toru Fujii and Sadanori Konishi. Nonlinear regression modeling via regularized wavelets and smoothing parameter selection. 2023
Shinto Eguchi and John Copas. Interpreting Kullback–Leibler divergence with the Neyman–Pearson lemma 2034
S.A. Bogatyrev, F. Götze and V.V. Ulyanov. Non-uniform bounds for short asymptotic expansions in the CLT for balls in a Hilbert space . . 2041
Muni S. Srivastava. Minimum distance classification rules for high dimensional data 2057

Number 10, November 2006

Richard A. Levine and George Casella. Optimizing random scan Gibbs samplers 2071
R.J. Bhansali, L. Giraitis and P.S. Kokoszka. Estimation of the memory parameter by fitting fractionally differenced autoregressive models . . . 2101
Thomas H. Savits. Some statistical applications of Faa di Bruno 2131
Seok-Oh Jeong and Léopold Simar. Linearly interpolated FDH efficiency score for nonconvex frontiers 2141
Jianqi Yu, K. Krishnamoorthy and Maruthy K. Pannala. Two-sample inference for normal mean vectors based on monotone missing data . . 2162
Harry Joe. Generating random correlation matrices based on partial correlations 2177
Shi Jian-Hong and Wang Song-Gui. The Spectral Decomposition of Covariance Matrices for the Variance Components Models 2190
Davy Paindaveine. A Chernoff–Savage result for shape: On the non-admissibility of pseudo-Gaussian methods 2206
Jianmin Pan and Jiahua Chen. Application of modified information criterion to multiple change point problems 2221
Tatsuya Kubokawa and Ming-Tien Tsai. Estimation of covariance matrices in fixed and mixed effects linear models. 2242
