Subject Index: Volume 25

Ablation procedures
Anatomically and electrogram-guided stepwise approach for effective and safe catheter ablation of the fast pathway for elimination of atrioventricular node reentrant tachycardia, 974
Catheter ablation of permanent junctional reciprocating tachycardia with radiofrequency current, 648
Fast pathway ablation for atrioventricular node reentrant tachycardia (editorial comment), 982
Localization and radiofrequency catheter ablation of left-sided accessory pathways during atrial fibrillation: feasibility and electrogram criteria for identification of appropriate target sites, 444
QRS time integral values in 12-lead electrocardiograms before and after radiofrequency catheter ablation in patients with Wolf-Parkinson-White syndrome, 1584
Radiofrequency catheter ablation of common atrial flutter in 80 patients, 1365
Ablative closure
Coronary angiography of abrupt closure after angioplasty, 1681
ACC/ACR/NEMA Ad Hoc Group
American College of Cardiology, American College of Radiology and Industry develop standard for digital transfer of angiographic images, 800
ACC/AHA Task Force Report
Guidelines for clinical use of cardiac radionuclide imaging, 521
ACC news
Newly elected members of the College, 954
1995–1996 Board of Governors, 1220
President's page: the assault on specialty medicine, 798
President's page: What concerns us about managed care?, 549
President's page: work force issues in cardiology, 278
ACC Position Statement
Use of radiographic devices by cardiologists: American College of Cardiology Cardiac Catheterization Committee, 1758
ACC Task Force statements
See under Education
Accessory pathways
See Ablation procedures
Acetylcholine
Enhanced insulin response relates to acetylcholine-induced vasconstriction in vaespastic angina, 356
Heterogeneity of vasomotor response to acetylcholine along the human coronary artery, 1046
ACP/ACC/AHA Task Force statement
Clinical competence in electrocardiography: a statement for physicians from the ACP/ACC/AHA Task Force on Clinical Privileges in Cardiology, 1465
Acute myocardial infarction
See Myocardial infarction
Adenosine
Adenosine combined with dynamic exercise for myocardial perfusion imaging, 1500
Adenosine pharmacologic stress myocardial perfusion tomographic imaging in patients with significant aortic stenotic diagnostic efficacy and comparison of clinical, hemodynamic and electrocardiographic variables with 100 age-matched control subjects, 99
Muscular and cardiac adenosine-induced pain is mediated by A1 receptors, 251
Role of adenosine thallium-201 tomography for defining long-term risk in patients after acute myocardial infarction, 1333
Adrenergic stimulation
Effects of physiologic and pharmacologic adrenergic stimulation on heart rate variability (letter), 958
Advance directives
Advance directives: do they work?, 35
Afterload
Interaction between afterload and contractility in the newborn heart: evidence of homoeometric autoregulation in the intact circulation, 1428
Age factors
See also Elderly
Arrhythmogenic right ventricular cardiomyopathy in young versus adult patients: similarities and differences, 655
Influence of age and gender on the presence of coronary calcium detected by ultrafast computed tomography, 76
Partial atrioventricular canal defect: long-term follow-up after initial repair in patients ≥40 years old, 1189
Albumin microbubbles
Visually discernible myocardial echocardiographic contrast after intravenous injection of sonicated dextrose albumin microbubbles containing high molecular weight, less soluble gases, 509
Alcohol use
Lack of association of recreational cocaine and alcohol use with left ventricular mass in young adults: the Coronary Artery Risk Development in Young Adults (CARDIA) study, 89
Allometric signals
Effect of growth on variability of left ventricular mass: assessment of allometric signals in adults and children and their capacity to predict cardiovascular risk, 1056
Alpha adrenergceptors
See specific agent
Aminophylline
Effects of acute aminophylline administration on cardiac functional reserve in patients with syndrome X, 1547
Amiodarone
Flecainide and amiodarone: combined therapy for refractory arrhythmias in infancy, 1195
Amlodipine
Effect of amlodipine, atenolol and their combination on myocardial ischemia during treadmill exercise and ambulatory monitoring, 619
Anastomosis
Atrial wall transplantation using biavalvular pulmonary venous anastomoses: a magnetic resonance imaging study, 932
Pulmonary/systemic flow ratio in children after cavo pulmonary anastomosis, 735
Anemia
Endothelium-derived relaxing factor is important in mediating the high output state in chronic severe anemia, 1402
Anerythmus
Pseudoerythremias of the mitral-aortic intraventricular fistulas: dynamic characterization using transesophageal echocardiographic and Doppler techniques, 137
Angina pectoris
See also Syndrome X
Angioscopic identification of coronary thrombus in patients with postinfarction angina, 1289
Effect of angina pectoris on myocardial protection in patients with repurposed interior wall myocardial infarction; retrospective clinical evidence of "preconditioning," 1076
Effectiveness of prolonged low dose recombinant tissue-type plasminogen activator for refractory unstable angina, 1295
Enhanced insulin response relates to acetylcholine-induced vasconstriction in vaespastic angina, 356
Heparin and aspirin in unstable angina: insufficient sample size may lead to erroneous conclusions (letter), 553
Hirudin: initial results in acute myocardial infarction, unstable angina and angioplasty, 308
Incidence and follow-up of Braunwald subgroups in unstable angina pectoris, 1286
Intermittent transmural nitrates do not improve ischemia in patients taking beta-blockers or calcium antagonists: potential role of rebound ischemia during the nitrate-free period, 349
Long-term prognosis of patients with anginalike chest pain and normal coronary angiographic findings, 1013
Relation of severity of symptoms to transient myocardial ischemia and prognosis in unstable angina, 597
Selection of medical treatment in stable angina pectoris: results of the International Multicenter Angina Exereise (IMAGE) study, 1516
Toward a stable clinical classification of unstable angina (editorial comment), 1293
Angiography
See also Cardiac catheterization
American College of Cardiology, American College of Radiology and Industry develop standard for digital transfer of angiographic images, 800
Angioplasty identification of coronary thrombus in patients with postinfarction angina, 1282
Atherosclerosis in angiographically "normal" coronary artery reference segment: an intravascular ultrasound study with clinical correlations, 1479
Correspondence of left ventricular ejection fraction determinations from two-dimensional echocardiography, radionuclide angiography and contrast cineangiography, 937
Exercise echocardiography after coronary artery bypass surgery: correlation with coronary angiography, 1019
Explanation for discrepancy between angiographic and intravascular ultrasound measurements after percutaneous transluminal coronary angioplasty, 633
Incremental value of simultaneous assessment of myocardial function and perfusion with technetium-99m sestamibi for prediction of extent of coronary artery disease, 1024
Long-term prognosis of patients with anginalike chest pain and normal coronary angiographic findings, 1013
Quantitative angiographic measurements of isolated left anterior descending coronary artery stenosis: correlation with exercise echocardiography and technetium-99m 2-methoxyisobutyl isonitrite single-photon emission computed tomography, 1486
Angioplasty
See also Abrupt closure: Restenosis
Balloon angioplasty of native coarctation of the aortic midline follow-up and prognostic factors, 730
Characteristics and consequences of myocardial infarction after percutaneous coronary intervention: insights from the Coronary Angioplasty Versus Excisional Atherectomy Trial (CAVEAT), 1693
Clinical and lesion morphologic determinants of coronary angioplasty success and complications: current experience, 855
Clinical outcome of deferring angioplasty in patients with normal translesional pressure-flow velocity measurements, 178
Cost and quality of life: thrombolysis and primary angioplasty, 385
Directional atherectomy versus balloon angioplasty for coronary ostial and nonostial left anterior descending coronary artery lesions: results from a randomized multicenter trial, 1380
Explanation for discrepancy between angiographic and intravascular ultrasound measurements after percutaneous transluminal coronary angioplasty (letter), 803
Hemochron versus HemoTec activated coagulation time target values during percutaneous transluminal coronary angioplasty, 633
Hindusti: initial results in acute myocardial infarction, unstable angina and angioplasty, 305
Improvement of global and regional left ventricular function by percutaneous transluminal coronary angioplasty after myocardial infarction, 843
Intracoronary irradiation markedly reduces neointimal proliferation after balloon angioplasty in swine: persistent benefit at 6-month follow-up, 1451
Predictors of in-hospital and 6-month outcome after acute myocardial infarction in the reperfusion era: the Primary Angioplasty in Myocardial Infarction (PAMI) trial, 370
Quantitative angiographic comparison of elastic recoil after coronary stent: laser-assisted balloon angioplasty and balloon angioplasty alone, 378
Angioplasty
Angiographic identification of coronary thrombus in patients with postinfarction angina, 1282
Coronary angiography of abrupt closure after angioplasty, 1681
Angioplasty II
Angiotensin II inhibits forearm vascular response to increased arterial pressure in humans, 246
Angiotensin-converting enzyme gene
Deletion-haploinsufficiency of the angiotensin-converting enzyme gene is associated with progressive ventricular dilation after anterior myocardial infarction, 1622
Lack of association between the insertion/deletion polymorphism of the angiotensin-converting enzyme gene and idiopathic dilated cardiomyopathy, 1627
Molecular genetics: Ask the case of the angiotensin-converting enzyme gene and cardiovascular disease (editorial comment), 1632
Angiotensin-converting enzyme inhibitors
See also Specific agent
Angiotensin-converting enzyme inhibition in patients with acute myocardial infarction, 478
Angiotensin-converting enzyme inhibitors after myocardial infarction: indications and timing, 428
Selective downregulation of rat cardiac beta2-adrenoreceptors by cyclosporine A: prevention by diltiazem or angiotensin-converting enzyme inhibitors, 761
Antiarrhythmic drug therapy
Clinical investigation of antiarrhythmic devices, 961
Antiarrhythmic drug therapy
See specific agent
Anticoagulation
See also Specific agent
Transesophageal echocardiographically facilitated early cardioversion from atrial fibrillation using short-term anticoagulation: final results of a prospective 4.5-year study, 1354
Antithrombotic therapy
See also Specific agent
Antithrombotic therapy for acute myocardial infarction, 238
Aortic dissection
Frequency and explanation of false negative diagnosis of aortic dissection by aortography and transesophageal echocardiography, 1393
Aortic valve disease
Adenosine pharmacologic stress myocardial perfusion tomographic imaging in patients with significant aortic stenosis: diagnostic efficacy and comparison of clinical, hemodynamic and electrocardiographic variables with 100 age-matched control subjects, 99
Coronary blood flow reserve in acute aortic regurgitation, 1387
Progression of aortic stenosis in 394 patients: relation to changes in myocardial and mitral valve dysfunction, 305
Aortography
Frequency and explanation of false negative diagnosis of aortic dissection by aortography and transesophageal echocardiography, 1393
AAPSAC
Current issues concerning thrombolytic therapy for acute myocardial infarction, 188
Arrhythmias
See also Antiarrhythmic devices
Definition of the best prediction criteria of the time domain signal-averaged electrocardiogram for serious arrhythmic events in the postinfarction period, 908
Task Force 6: training in specialized electrophysiology, cardiac pacing and arrhythmia management (COCATS), 23
Arrhythmias, atrial
Prevalence and prognostic significance of atrial arrhythmias after orthotopic cardiac transplantation, 1673
Arrhythmias, ventricular
Circadian pattern of ventricular tachyarrhythmias in patients with implantable cardioverter-defibrillators, 901
Early repair of tetralogy of Fallot and ventricular arrhythmia (letter), 554
Electrocardiographic indexes of dispersion of ventricular repolarization: an isolated heart validation study, 746
Relation between heart rate variability and spontaneous and induced ventricular arrhythmias in patients with coronary artery disease, 437
Relations between heart failure, ejection fraction, arrhythmia suppression and mortality: analysis of the Cardiac Arrhythmia Suppression Trial, 1250
Arteriography
Quintessential arteriography of apparently normal coronary segments with nearby or distant disease suggests presence of occult, nonvisualized atherosclerosis, 311
Aspirin
Antithrombotic therapy for acute myocardial infarction, 238
Current issues concerning thrombolytic therapy for acute myocardial infarction, 188
Effect of long-term low dose aspirin treatment on cardiac output function and early hemodynamic response to enalaprilat in a canine model of severe heart failure, 1445
Frequent reocclusion of patent infarct-related arteries between 4 weeks and 1 year: effects of antplatelet therapy, 218
Heparin and aspirin in unstable angina: insufficient simple size may lead to erroneous conclusions (letter), 553
Atenolol
Effect of metolazone, atenolol and their combination on myocardial ischemia during treadmill exercise and ambulatory monitoring, 619
Atherectomy
Characteristics and consequences of myocardial infarction after percutaneous coronary intervention: insights from the Coronary Angioplasty Versus Excisional Atherectomy Trial (CAVEAT), 1693
Comparative results of transluminal extraction coronary atherectomy in saphenous vein
Atherosclerosis
Association of carotid atherosclerosis and left ventricular hypertrophy, 83
Atherosclerosis in angiographically "normal" coronary artery reference segments: an intravascular ultrasound study with clinical correlations, 1479
Controlled trial of fish oil for regression of human coronary atherosclerosis, 1492
Coronary reactivity to nitroglycerin: intracoronary ultrasound evidence for the importance of plaque distribution, 224
Explanation for discrepancy between angiographic and intravascular ultrasound measurements after percutaneous transluminal coronary angioplasty, 635
Quantitative arteriography of apparently normal coronary segments with nearby or distant disease suggests presence of occult, nonvisualized atherosclerosis, 311

Athletes
Blood pressure measurement in athletes (letter), 1741

Atrial arrhythmias
See Arrhythmias, atrial

Atrial fibrillation/flutter
Efficacy and tolerability of transvenous low energy cardioversion of paroxysmal atrial fibrillation in humans, 1347
Incidence of symptomatic atrial fibrillation in patients with paroxysmal supraventricular tachycardia, 984
Left atrial appendage thrombus is not uncommon in patients with acute atrial fibrillation and a recent embolic event: a transesophageal echocardiographic study, 452
Localization and radiofrequency catheter ablation of left-sided accessory pathways during atrial fibrillation: feasibility and electrophysiologic criteria for identification of appropriate target sites, 444
Modulation of the atrioventricular conduction by ablation of the "slow" atrioventricular node pathway in patients with drug refractory atrial fibrillation or flutter, 29
Radiofrequency catheter ablation of common atrial flutter in 80 patients, 1365
Right coronary artery stenosis: an independent predictor of atrial fibrillation after coronary artery bypass surgery, 198
Transesophageal echocardiographic screening for atrial thrombus before cardioversion of atrial fibrillation: when should we look before we leap? (editorial comment), 1362
Transesophageal echocardiographically facilitated early cardioversion from atrial fibrillation using short-term anticoagulation: final results of a prospective 4.5-year study, 1354
Atrial function
Aggravation of postcardioversion atrial dysfunction by sotalol, 665
Atrial emptying with orthotropic heart transplantation using bivaval and pulmonary venous anastomoses: a magnetic resonance imaging study, 932
Atrial function can only be assessed by combined use of volume- and pressure-assessing noninvasive methods (letter), 552

Atrial natriuretic peptide
See also Hypertension
Blood pressure measurement in athletes (letter), 1741

Body size
Effect of growth on variability of left ventricular mass: assessment of allometric signals in adults and children and their capacity to predict cardiovascular risk, 1056

Buchs received, 906, 960, 1224

Brain natriuretic peptide
Comparison of secretion pattern between A-type and B-type natriuretic peptides in patients with old myocardial infarction, 1105
Atrial septal defect
Delecion of site, relative size and dynamic geometry of atrial septal defects by real-time three-dimensional echocardiography, 482
Atrioventricular canal
Partial atrioventricular canal defect: long-term follow-up after initial repair in patients >40 years old, 1189
Atrioventricular nodal conduction and B-type natriuretic peptides in patients with old myocardial infarction, 1105

Balloons
See also Angioplasty

Bansilin
Muscular and cardiac adenosine-induced pain is mediated by A1 receptors, 251
Baroreceptor reflex
Effects of oral pizotepine on heart rate variability and baroreceptor reflex sensitivity after acute myocardial infarction, 915

Beta-adrenergic blocking agents
See also Specific agent
Treatment with beta-adrenergic blocking agents after myocardial infarction: from randomized trials to clinical practice, 1327

Beta-adrenergic receptors
Cardiac chronotropic responsiveness to beta-adrenergic receptor stimulation is not reduced in the elderly, 995
Selective downregulation of rat cardiac beta1-adrenoceptors by cyclopentolate; A1 prevention by diltiazem or angiotensin-converting enzyme inhibitors, 761

Beta-endorphin
Psychophysical responses to a speech stressor: correlation of plasma beta-endorphin levels at rest and after psychological stress with thermally measured pain threshold in patients with coronary artery disease, 1499

Beta-blockers
See also Antihypertensive drugs

Bethesda Conference Report
Work force issues in cardiology (President's page), 278

Bisoprolol
Medical treatment to reduce total ischemic burden: Total Ischemic Burden Bisoprolol Study (TIBBS), a multicenter trial comparing bisoprolol and nifedipine, 231

Blood coagulation
See Coagulation system: Coagulation time

Blood flow
Characterization of subcutaneous microvascular blood flow during tilt table-induced neurally mediated syncope, 70
Doppler evaluation of severity of mitral regurgitation: relation to pulmonary venous blood flow patterns in sn animal study, 264
Flow capacity of internal mammary artery grafts: early restriction and later improvement assessed by Doppler guide wire: comparison with saphenous vein grafts, 640
Nature of flow acceleration into a finite-sized orifice: steady and pulsatile flow studies on the flow convergence region using simultaneous ultrasound Doppler flow mapping and laser Doppler velocimetry, 1199

Blood pressure
See also Hypertension
Blood pressure measurement in athletes (letter), 1741

Calcium, cailification
Influence of age and gender on the presence of coronary calcium detected by ultrafast computed tomography, 76
Quantification of coronary artery calcium by electron beam computed tomography for determination of severity of angiographic coronary artery disease in younger patients, 626

Candoxatrilat
Renal response to candoxatrilat in patients with heart failure, 1273

Captopril
Combined captorpl and isosorbide dinitrate during healing after myocardial infarction: effect on ventricular remodeling, function, mass and collagen, 1089
Effect of captopril and enalapril on left ventricular geometry, function and collagen during healing after anterior and inferior myocardial infarction in a dog model, 1718

Carcinoid heart disease
Outcome of cardiac surgery for carcinoid heart disease, 410

Cardiac catheterization
See also Angiography
Cardiac catheterization and test occlusion of the interatrial communication after the fenestrated Fontan operation, 1712
Rapid atrial septal defects and decreased access site complications after cardiac catheterization and angio-plasty: results of a randomized trial of a novel hemostatic device, 1685
Rational approach to use of heparin during cardiac catheterization in children, 725
Task Force 3: training in cardiac catheterization and interventional cardiology (COCATS), 14

Cardiac conduction
Effects of heating on impulse propagation in superfused canine myocardium, 1457
Endocardial mapping of ventricular tachycardia in the intact human ventricle. III. Evidence of multivane reentry with spontaneous and induced block in portions of reentrant path complex, 1591
Modulation of the atrioventricular conduction by ablation of the "slow" atrioventricular node pathway in patients with drug-refractory atrial fibrillation or flutter, 39

Cardiac index
Cardiac index quantification by Doppler ultrasound in patients without left ventricular outflow tract abnormalities, 710

Cardiac rupture
Cardiac rupture associated with thrombolytic therapy: impact of time to treatment in the Late Assessment of Thrombolytic Efficacy (LATE) study, 1063

Cardiac transplantation
See Heart transplantation

Cardiomyopathy
See also Hypertrophy
Arrhythmogenic right ventricular cardiomyopathy in young versus adult patients: similarities and differences, 655
Coagulation system is activated in idiopathic cardiomyopathy, 1634
Dilated cardiomyopathy is associated with an increase in the type I/Type III collagen ratio: a quantitative assessment, 1236
Heterogeneity of ventricular function and myocardial oxidative metabolism in nonischemic dilated cardiomyopathy, 1258
High prevalence of atrial fibrillation in patients with dilated cardiomyopathy, 1162
Lack of association between the insertion/deletion polymorphism of the angiotensin-converting enzyme gene and idiopathic dilated cardiomyopathy, 1627
Myocardial endocarditis in patients with left ventricular dysfunction: a benign disease compared with idiopathic dilated cardiomyopathy, 1170
Predictors of systolic and diastolic improvement in patients with dilated cardiomyopathy treated with metoprolol, 154
Response to isoproterenol as a prognostic indicator of evolution from hypertrophic cardiomyopathy to a phase resembling dilated cardiomyopathy, 687

Cardioversion
Aggravation of postcardioversion atrial dysfunction by sotalol, 665
Efficacy and tolerability of transvenous low energy cardioversion of paroxysmal atrial fibrillation in humans, 1347
Transesophageal echocardiographic screening for atrial thrombus before cardioversion of atrial fibrillation: when should we look before we leap? (Editorial comment), 1362
Transesophageal echocardiographically facilitated early cardioversion from atrial fibrillation using short-term anticoagulation: final results of a prospective 4.5-year study, 1354

Cardioverter-defibrillator
Ciccioidinae pattern of ventricular tachyarrhythmias in patients with implantable cardioverter-defibrillators, 901

Carnitine palmityl transferase inhibitors
Therapeutic approach to microvascular angina (Syndrome X) (letter), 1472

Carvedilol
Carvedilol improves left ventricular function and symptoms in chronic heart failure: a double-blind randomized study, 1225

Catheter
See Ablation procedures
Catheterization
See Cardiovascular catheterization

Cholesterol
Relation of saphenous vein graft obstruction to serum cholesterol levels, 193

Cilazapril
Effect of high dose angiotensin-converting enzyme inhibition on restenotic final results of the MARCATOR study, a multicenter, double-blind, placebo controlled trial of cilazapril, 362

Clinical competence
Clinical competence in electrocardiography: a statement for physicians from the ACP/AHA Task Force on Clinical Privileges in Cardiology, 1,465

Coagulation system
Coagulation system is activated in idiopathic cardiomyopathy, 1634
Coagulation time
Hemochron versus HemoTec activated coagulation time target values during percutaneous transluminal coronary angioplasty (letter), 803

Coarctation of the aorta
Balloon angioplasty of native coarctation of the aorta: midterm follow-up and prognostic factors, 730

Cocaine
Lack of association of recreational cocaine and alcohol use with left ventricular mass in young adults: the Coronary Artery Risk Development in Young Adults (CARDIA) study, 895

Colil
Intraaortic spring coil loops: early and late results, 1416

Congestive heart failure
See Heart failure

Continuous positive airway pressure
Continuous positive airway pressure increases heart rate variability in congestive heart failure, 672

Contractile function
Interaction between afterload and contractility in the newborn heart: evidence of homeometric autoregulation in the intact circulation, 1428

Contrast solution
Impairment of fibrinolysis by streptokinase, urokinase and recombinant tissue-type plasminogen activator in the presence of radiographic contrast agents, 1069

Coronary artery diameter
Effects of brain (B-type) natriuretic peptide on coronary artery diameter and coronary hemodynamic variables in humans: comparison with effects on systemic hemodynamic variables, 342

Coronary artery disease
Comparison of 15-year survival for men and women after initial medical or surgical treatment for coronary artery disease: a CASS Registry study, 1000
Development and evaluation of the Seattle Angina Questionnaire: a new functional status measure for coronary artery disease, 333
Dobutamine stress echocardiography in orthotopic heart transplant recipients, 1665
Estimation of coronary flow reserve by transesophageal coronary sinus Doppler measurements in patients with syndrome X and patients with significant left coronary artery disease, 1039

Incidence and severity of transplant coronary artery disease early and up to 15 years after transplantation as detected by intravascular ultrasound, 721

Incremental value of simultaneous assessment of myocardial function and perfusion with technetium-99m sestamibi for prediction of extent of coronary artery disease, 1024

Influence of left ventricular hypertrophy on left ventricular function during dynamic exercise in the presence or absence of coronary artery disease, 91

Psychophysical responses to a speech stressor: correlation of plasma beta-endorphin levels at rest and after psychological stress with thermally measured pain threshold in patients with coronary artery disease, 1499

Quantification of coronary artery calcium by electron beam computed tomography for determination of severity of angiographic coronary artery disease in younger patients, 636

Relation between heart rate variability and spontaneous and induced ventricular arrhythmias in patients with coronary artery disease, 437

Transesophageal dobutamine stress echocardiography in the evaluation of coronary artery disease, 823

Coronary blood flow

See Blood flow

Coronary flow reserve
Coronary blood flow reserve in acute aortic regurgitation, 1387

Coronary flow reserve assessment by dobutamine transesophageal Doppler echocardiography, 325

Effects of acute amrinone administration on cardiac functional reserve in patients with syndrome X, 1547

Estimation of coronary flow reserve by transesophageal coronary sinus Doppler measurements in patients with syndrome X and patients with significant left coronary artery disease, 1039

Coronary occlusion
Simultaneous assessment of myocardial perfusion and left ventricular function during transient coronary occlusion, 1520

Coronary perfusion
See Myocardial perfusion

Coronary reperfusion
See also Thrombolytic therapy

Chimeric IgG4 monoclonal antibody directed against CD18 reduces infarct size in a primate model of myocardial ischemia and reperfusion, 781

Flusulin in myocardial reperfusion injury (letter), 1742

Coronary sinus
Unroofed coronary sinus and coronary sinus orifice atresia: implications for management of complex congenital heart disease, 948

Corrections

Cost factors
Cost and quality of life: thrombolysis and primary angioplasty, 388

Creatine kinase
Characteristics and consequences of myocardial infarction after percutaneous coronary intervention: insights from the Coronary Artery loplasty Versus Em作家性revascularisation Trial (CAVEAT), 1693

Independent prognostic value of serum creatine kinase isoenzyme MB mass, cardiac troponin T and myosin light chain levels in suspected acute myocardial infarction: analysis of 28 months of follow-up in 196 patients, 574

Cyclosporin
Immunosuppression switch in pediatric heart transplantation recipients: cyclosporine vs FK 506, 1183

Selective downregulation of rat cardiac beta-1 adrenoceptors by cyclosporine A: prevention by diltiazem or angiotensin-converting enzyme inhibitors, 761

Defibrillation
See also Cardioverter-defibrillator

Clinical predictors of the defibrillation threshold with the unipolar implantable defibrillation system, 1576

Comparison of initial detection and redetection of ventricular fibrillation in a transvenous defibrillator system with automatic gain control, 431

Comparison of probability of success defibrillation curves for an endocardial lead configuration with and without an inactive epicardial patch, 1373

Effect of first-phase polarity of biphasic shocks on defibrillation threshold with a single transvenous lead system, 1605

Diabetes
Increased echocardiographic wall thickening in the diabetic heart: an ultrasound tissue characterization study, 1488

Metabolomic and protein profiling studies in diabetes mellitus: assessment of cardiac sympathetic denervation and its relation to autonomic dysfunction and silent myocardial ischemia, 610

Quantitative assessment of myocardial ultrasound tissue characterization through receiver operating characteristic analysis of Bayesian classifiers, 1706

Diastolic function
Differential effects of diltiazem and a phosphodiesterase inhibitor on early diastolic filling in patients with congestive heart failure, 295

Dinorisin
Effect of long-term diprivan therapy on autonomic function in patients with chronic heart failure, 289

Diltiazem
Selective downregulation of rat cardiac beta-1 adrenoceptors by cyclosporine A: prevention by diltiazem or angiotensin-converting enzyme inhibitors, 761

Dipyridamole
Frequent occlusion of patent infarct-related arteries between 4 weeks and 1 year: effects of antiplatelet therapy, 218

Dobutamine
Cardiac chronotropic responsiveness to beta-adrenoceptor stimulation is not reduced in the elderly, 995

Coronary flow reserve assessment by dobutamine transesophageal Doppler echocardiography, 725

Differential effects of dobutamine and a phosphodiesterase inhibitor on early diastolic filling in patients with congestive heart failure, 295

Dobutamine stress echocardiography in orthotopic heart transplant recipients, 1665

Effect of dobutamine stress echocardiography on mitral regurgitation, 122

Optimal stage duration in dobutamine stress echocardiography, 605

Transesophageal dobutamine stress echocardiography in the evaluation of coronary artery disease, 252

Doppler ultrasound
Cardiac index quantification by Doppler ultrasound in patients without left ventricular outflow tract abnormalities, 710

Clinical evaluation of left heart Doppler contrast enhancement by a saccharide-based transpulmonary contrast agent, 500

Doppler left ventricular flow pattern versus conventional predictors of left ventricular thrombus after acute myocardial infarction, 1341

Estimation of coronary flow reserve by transesophageal coronary sinus Doppler measurements in patients with syndrome X and patients with significant left coronary artery disease, 1039

Integrated Doppler backscatter power (letter), 1476

Nature of flow acceleration into a finite-sized orifice: steady and pulsatile flow studies on the flow convergence region using simultaneous ultrasound Doppler flow mapping and laser Doppler velocimetry, 1199

New method for evaluating left ventricular wall motion by color-coded tissue Doppler imaging: in vitro and in vivo studies, 717

Question of incremental prognostic value of Doppler transmural flow patterns in patients with congestive heart failure (letter), 1223

Use of backscattered Doppler signal intensity in estimation of volume flow ratios (letter), 1474

Echocardiography
See also Dobutamine; Doppler ultrasound; Stress testing; Ultrasound

Guidelines for training in adult cardiovascular medicine: Core Cardiology Training Symposium (COCATS), 1
Revised cardiology training guidelines: time and numbers (Editor's page), 1218
Task Force 1: training in clinical cardiology, 4
Task Force 2: training in echocardiography, ambulatory electrocardiography and exercise testing, 10
Task Force 3: training in cardiac catheterization and interventional cardiology, 14
Task Force 4: training in echocardiography, 16
Task Force 5: training in nuclear cardiology, 19
Task Force 6: training in specialized electrophysiology, cardiac pacing and arrhythmia management, 23
Task Force 7: training in cardiovascular research, 26
Task Force 8: training in heart failure and transplantation, 29
Task Force 9: training in the care of adult patients with congenital heart disease, 31
Task Force 10: training in preventive cardiovascular medicine, 33
Ejection fraction
Correspondence of left ventricular ejection fraction determinations from two-dimensional echocardiography, radionuclide angiography and contrast cineangiography, 937
Preserved right ventricular ejection fraction predicts exercise capacity and survival in advanced heart failure, 1143
Relations between heart failure, ejection fraction, arrhythmia suppression and mortality: analysis of the Cardiac Arrhythmia Suppression trial, 1250
Elderly
See also Age factors
Cardiac chronotropic responsiveness to beta-adrenergic receptor stimulation is not reduced in the elderly, 995
Clinopathologic characteristics of elderly patients with persistent ST segment elevation and inverted T waves: evidence of insidious or healed myocarditis?, 1641
Echocardiography
See also Stress testing; Holter monitoring; specific wave; specific segment
Clinical competence in echocardiography: a statement for physicians from the ACP/ACC/AHA Task Force on Clinical Privileges in Cardiology, 1465
Comparison of thallium-201 single-photon emission computed tomography and electrocardiographic response during exercise in patients with normal rest electrocardiographic results, 800
Definition of the best prediction criteria of the time domain signal-averaged electrocardiogram for serious arrhythmic events in the postinfarction period, 908
Electrocardiographic indexes of dispersion of ventricular repolarization: an isolated heart validation study, 746
QRS time-integral in 12-lead electrocardiograms before and after radiofrequency catheter ablation in patients with Wolf-Parkinson-White syndrome, 1564
Task Force 2: training in electrocardiography, ambulatory electrocardiography and exercise testing (COCATS), 10
Electrophysiologic studies
Endocardial mapping of ventricular tachycardia in the intact human ventricle. III. Evidence of maladaptive reentry with spontaneous and induced block in portions of reentrant path complex, 1591
Insights into the Electrophysiology Study Versus Electrocardiographic Monitoring trial: its programmed stimulation protocol may introduce bias when assessing long-term antiarrhythmic drug therapy, 1601
Spontaneous sequences of onset of torsades de points in patients with acquired prolonged repolarization: a quantitative analysis of Holter recordings, 1564
Sympathetic activation, ventricular repolarization and beta blockade: implications for the antiarrhythmic effect of potassium channel blocking agents, 1609
Task Force 6: training in specialized electrophysiology, cardiac pacing and arrhythmia management (COCATS), 23
Embolism
Coagulation activity is increased in the left atrium of patients with mitral stenosis, 107
High risk of thromboembolism early after bioprosthetic cardiac valve replacement, 1111
Enalapril
Effect of captopril and enalapril on left ventricular geometry, function and collagen during healing after anterior and inferior myocardial infarction in a dog model, 1718
Effects of long-term therapy with enalapril on severity of functional mitral regurgitation in dogs with moderate heart failure, 768
Enalaprilat
Effect of long-term low dose aspirin on cardiac function and early hemodynamic response to enalaprilat in a canine model of severe heart failure, 1445
Endothelin receptor antagonists
Endothelin receptor antagonists in a beagle model of pulmonary hypertension: contribution to possible potential therapy?, 1213
Endothellium-derived relaxing factor
See also Nitric oxide
Endothelium-derived relaxing factor is important in mediating the high output state in dogs with moderate heart failure, 1213
Etiology
Limitations of head-up tilt test for evaluating the efficacy of therapeutic interventions in patients with vasovagal syncope: results of a controlled study of ephedrine versus placebo, 65
Exercise testing
See Stress testing
Exercise training
Effects of exercise training in patients with congestive heart failure: a critical review, 789
Physical training in patients with stable chronic
heart failure: effects on cardiorespiratory fitness and ultrastructural abnormalities of leg muscles, 1239

Fetal cardiology

Fibrinolysis
See Thrombolysis

Fluorine-18 fluorodeoxyglucose
Specificity and sensitivity of exercise-induced ST segment elevation for detection of residual viability: comparison with fluorodeoxyglucose and positron emission tomography, 1032

Gender issues
Comparison of 15-year survival for men and women after initial medical or surgical treatment for coronary artery disease: a CASS Registry study, 1009
Influence of age and gender on the presence of coronary calcium detected by ultrafast computed tomography, 76
Referral for coronary artery revascularization procedures after diagnostic coronary angiography: evidence for gender bias?, 1650
Tell me what ails you, and I’ll tell you why it’s your fault (editorial comment), 1010

Grafts
See also Surgery, coronary artery bypass

Hemostasis
Relation of saphenous vein graft obstruction to serum cholesterol levels, 193

Heart rate
Continuous positive airway pressure increases heart rate variability in congestive heart failure, 672
Effects of oral pirenzepine on heart rate variability and baroreceptor reflex sensitivity after acute myocardial infarction, 915
Effects of physiologic and pharmacologic adrenergic stimulation on heart rate variability (letter), 958
Heart rate adjustment of ST segment depression and performance of the exercise electrocardiogram: a critical evaluation, 1726
Relation between heart rate variability and spontaneous and induced ventricular arrhythmias in patients with coronary artery disease, 437

Heart transplantation
Atrial emptying with orthotopic heart transplantation using bivacaval and pulmonary venous anastomoses: a magnetic resonance imaging study, 932
Dobutamine stress echocardiography in orthotopic heart transplant recipients, 1665
Immunosuppression switch in pediatric heart transplantation recipients: cyclosporine to FK 506, 1183

Hemodynamics
Clinical outcome of deferring angioplasty in patients with coronary artery disease and catheterization hemodynamic study, 342
Comparison with effects on systemic hemodynamic variables, 342
Mechanism of hemodynamic improvement by dual-chamber pacing for severe left ventricular dysfunction: an acute Doppler and catheterization hemodynamic study, 281

Hemostasis
Rapid arterial hemostasis and decreased access site complications after cardiac surgery
catheterization and angioplasty: results of a randomized trial of a novel hemostatic device, 1685

Heparin
Antithrombotic therapy for acute myocardial infarction, 238
Heparin and aspirin in unstable angina: insufficient sample size may lead to erroneous conclusions (letter), 553
Rational approach to use of heparin during cardiac catheterization in children, 725
Thrombin generation and activity during thrombosis, and concomitant heparin therapy in patients with acute myocardial infarction, 203

Hirudin
Antithrombotic therapy for acute myocardial infarction, 238
Hirudin: initial results in acute myocardial infarction, unstable angina and angioplasty, 305

Halter monitoring
Spontaneous sequences of onset of tachycardia in patients with acquired prolonged repolarization: a quantitative analysis of Holter recordings, 1564
Task Force 2: training in electrocardiography, ambulatory electrocardiography and exercise testing (COCATIS), 10

Hypertension
Adverse prognostic significance of concentric remodeling of the left ventricle in hypertensive patients with normal left ventricular mass, 871
Angiotensin II inhibits forearm vascular response to increased arterial pressure in hypertensive patients, and their capacity to predict cardiovascular risk, 1056
Empiric determination of the transition from concentric hypertrophy to congestive heart failure in essential hypertension, 888
Endothelin receptor antagonists in a beagle model of pulmonary hypertension: contribution to possible potential therapy?, 1213
Inhaled nitric oxide and hemodynamic evaluation of patients with pulmonary hypertension before transplantation, 1656
Should echocardiography be performed to assess effects of antihypertensive therapy? Test-retest reliability of echocardiography for measurement of left ventricular mass and function, 424

Hypothermia
Effects of heating on impulse propagation in superfused canine myocardium, 1457

Hypertrophy
See also Cardiomyopathy
Association of carotid atherosclerosis and left ventricular hypertrophy, 83
Electrocardiographic identification of increased left ventricular mass by simple voltage-duration products, 417
Empiric determination of the transition from concentric hypertrophy to congestive heart failure in essential hypertension, 888
Influence of left ventricular hypertrophy on left ventricular function during dynamic exercise in the presence or absence of coronary artery disease, 91

Hypoplastic left heart syndrome
Computer-simulated and clinical models agree on optimal postoperative management for hypoplastic left heart syndrome (letter), 1740

Hypothalamic-pituitary-thyroid axis
Hypothyroidism and serum lipoproteins: a review of theversible relationship, 1606

Hypothalamic-pituitary-adrenal axis
Hypothalamic-pituitary-adrenal axis in cardiovascular disease: implications for disease mechanism, 216

Insulin
Enhanced insulin response relates to acetylcholine-induced vasodilatation in vasospastic angina, 356

Internal mammary artery
See Grafts

International health care
International comparison of waiting times for selected cardiovascular procedures, 557
International comparisons of waiting times for cardiovascular procedures: a commentary on the long quest (editorial comment), 564

Interventional cardiology
Task Force 3: training in cardiac catheterization and interventional cardiology (COCATIS), 14

Intimamedian
Intracoronary irradiation markedly reduces neointimal proliferation after balloon angioplasty in swine: persistent benefit at 6-month follow-up, 1451
Iodine-123 metaiodobenzylguanidine
See Metaiodobenzylguanidine

Irradiation
See Radiation

Ischemia
Echocardiographic Fourier phase and amplitude imaging for quantification of ischemic regional wall asynchrony: an experimental study using coronary microembolization in dogs, 1436
Restoration of antegrade flow in acute myocardial infarction: the first 15 years, 1S
Quantification of recruitable coronary collateral blood flow in conscious humans and its potential to predict future ischemic events, 1522
Isoprostanes
Response to isoprostanes as a prognostic indicator of evolution from hypertrophic cardiomyopathy to a phase resembling dilated cardiomyopathy, 687

Isosorbide dinitrate
Combined captopril and isosorbide dinitrate therapy for heart failure in essential hypertension, 888

Isoproterenol
Response to isoproterenol as a prognostic potential to predict future ischemic events, 1522

JACC
Peer review or poor review? (Editor's page), 1470

Kawasaki disease
Exercise capacity and incidence of myocardial perfusion defects after Kawasaki disease in children and adolescents, 1430
Kawasaki disease: unsafe at any age? (editorial comment), 1425

Lasers
See also Angioplasty
Nature of flow acceleration into a finite-sized orifice: steady and pulsatile flow studies on the flow convergence region using simultaneous ultrasound Doppler flow mapping and laser Doppler velocimetry, 1199

Letters to the editor
Assessment of cardiovascular autonomic function, 1473
Atrial function can only be assessed by combined use of volume- and pressure-assessing noninvasive methods, 552
Blood pressure measurement in athletes, 1741
Computer-simulated and clinical models agree on optimal postoperative management for hypoplastic left heart syndrome, 1740
Congestive heart failure and sodium dichloroacetate, 804
Correcting the QT interval: is it relevant?, 551
Early repair of tetralogy of Fallot and myocardiopathy, 554
Effects of physiologic and pharmacologic adrenergic stimulation on heart rate variability, 958
Exercise echocardiography, 280
Fluoros in myocardial reperfusion injury, 1742
Hemochromatosis and HemoTec activated coagulation time target values during percutaneous transluminal coronary angioplasty, 403
Heparin and aspirin in unstable angina: insufficient sample size may lead to erroneous conclusions, 553
Integrated Doppler backscatter power, 1474
Pathogenesis of stroke after nonanterior myocardial infarction, 1476
Question of incremental prognostic value of Doppler transmitral flow patterns in patients with congestive heart failure, 1223
Relation between QT and RR intervals, 551
Standard exercise test is still the most cost-effective, 1477
Therapeutic approach to microvascular angina (syndrome X), 1472
Use of backscattered Doppler signal intensity in estimation of volumetric flow rates, 1474

Long QT syndrome
See QT interval

Lumen
Nature of flow acceleration into a finite-sized orifice: steady and pulsatile flow studies on the flow convergence region using simultaneous ultrasound Doppler flow mapping and laser Doppler velocimetry, 1199
Recovery and viability of an acute myocardial infarct after tranmyocaridal laser revascularization, 258

Metaiodobenzylguanidine
Iodine-123 metaiodobenzylguanidine scintigraphic assessment of the transplanted human heart: evidence for late innervation, 927
Metaiodobenzylguanidine imaging in diabetes mellitus: assessment of cardiac sympathetic denervation and its relation to autonomic dysfunction and silent myocardial ischemia, 610

Metabolism
Heterogeneity of ventricular function and myocardial oxidative metabolism in nonischemic dilated cardiomyopathy, 1258

Methylthiobutyl isonitrile
Quantitative angiographic measurements of isolated left anterior descending coronary artery stenosis: correlation with exercise echocardiography and technetium-99m
Metoprolol
Predictors of systolic and diastolic improvement in patients with dilated cardiomyopathy treated with metoprolol, 154
Selection of medical treatment in stable angina pectoris: results of the International Multicenter Angina Exteerne (IMAGE) study, 1516

Time course of improvement in left ventricular function, mass and geometry in patients with congestive heart failure treated with beta-adrenergic blockade, 1154

Microbubbles

Shu 508A
Clinical evaluation of left heart Doppler contrast enhancement by a saccharide-based transpulmonary contrast agent, 500

Silent defects
Is silent ischemia painless because it is mild? (editorial comment), 1513
Mental stress, pain perception and risk of silent ischemia (editorial comment), 1504
Metiodobenzylguanidine imaging in diabetes mellitus: assessment of cardiac sympathetic denervation and its relation to autonomic dysfunction and silent myocardial ischemia, 610
Psychophysical responses to a speech stressor: correlation of plasma beta-endorphin levels at rest and after psychological stress with thermally measured pain threshold in patients with coronary artery disease, 1499

Skeletal muscle
Exercise intolerance in chronic heart failure is not associated with impaired recovery of muscle function or submaximal exercise performance, 1232
Physical training in patients with stable chronic heart failure: effects on cardiorespiratory fitness and ultrastructural abnormalities of leg muscles, 1239

Smoking
Tobacco industry—blowing smoke (Editor’s page), 1736

Sodium dichloroacetate
Congestive heart failure and sodium dichloroacetate (letter), 804

Sotolol
Aggravation of postcardioversion atrial dysfunction by sotalol, 665
Insights into the Electrophysiology Study Versus ElectrocadioGraphic Monitoring trial: its programmed stimulation protocol may introduce bias when assessing long-term antiarrhythmic drug therapy, 1601
Sympathetic activation, ventricular repolarization and Ikr blockage: implications for the antiarrhythmic effect of potassium channel blocking agents, 1609

ST segment
Clinicopathologic characteristics of elderly patients with persistent ST segment elevation and inverted T wave: evidence of insidious or healed myocarditis?, 1641
Heart rate adjustment of ST segment depression and performance of the exercise electrocardiogram: a critical evaluation, 1726
Noninvasive assessment of speed and stability of infarct-related artery reperfusion: results of the GUSTO ST Segment Monitoring Study, 1552
Specificity and sensitivity of exercise-induced ST segment elevation for detection of residual viability: comparison with fluorodeoxyglucose and positron emission tomography, 1052
ST segment and T wave characteristics as indicators of coronary heart disease risk: the Zutphen study, 1321

Stenosis
See also Restenosis
Differential progression of complex and smooth stenoses within the same coronary tree in men with stable coronary artery disease, 837
Directional atherectomy versus balloon angioplasty for coronary ostial and nonostial left anterior descending coronary artery lesion: results from a randomized multicenter trial, 1380
Quantitative angiographic measurements of isolated left anterior descending coronary artery stenosis: correlation with exercise echocardiography and technetium-99m 2-mercaptoacetyl isonitrite single-photon emission computed tomography, 1486
Right coronary artery stenosis: an independent predictor of atrial fibrillation after coronary artery bypass surgery, 198
Stent implantation of saphenous vein graft soro-ostial lesions in patients with unstable ischemic syndromes: immediate angiographic results and long-term clinical outcome, 866

Stenting
Stent implantation of saphenous vein graft soro-ostial lesions in patients with unstable ischemic syndromes: immediate angiographic results and long-term clinical outcome, 866

Streptokinase
Current issues concerning thrombolytic therapy for acute myocardial infarction, 185
Impairment of fibrinolysis by streptokinase, urokinase and recombinant tissue-type plasminogen activator in the presence of radiographic contrast agents, 1069
Lessons we have learned from the GUSTO trial, 105
Noninvasive assessment of speed and stability of infarct-related artery reperfusion: results of the GUSTO ST Segment Monitoring Study, 1552

Stress, mental
Mental stress, pain perception and risk of silent ischemia (editorial comment), 1504
Psychophysical responses to a speech stressor: correlation of plasma beta-endorphin levels at rest and after psychological stress with thermally measured pain threshold in patients with coronary artery disease, 1499
Stress testing
See also Thallium-201 studies
Adenosine pharmacologic stress myocardial perfusion tomographic imaging in patients with significant aortic stenosis: diagnostic efficacy and comparison of clinical, hemodynamic and electrocardiographic variables with 100 age-matched control subjects, 99
Exercise echocardiography (letter), 280
Exercise echocardiography after coronary artery bypass surgery: correlation with coronary arteriography, 1019
Exercise-induced mitral regurgitation is a predictor of motheed events in subjects with mitral valve prolapse, 693
Exercise-induced regurgitation in a mitral valve prolapse: is it a new disease? (editorial comment), 700
Exercise intolerance in chronic heart failure is not associated with impaired recovery of muscle function or submaximal exercise performance, 1232
Heart rate adjustment of ST segment depression and performance of the exercise electrocardiogram: a critical evaluation, 1276
Improvement in exercise capacity of candidates awaiting heart transplantation, 163
Incremental value of simultaneous assessment of myocardial function and perfusion with technetium-99m sestamibi for prediction of extent of coronary artery disease, 1024
Influence of left ventricular hypertrophy on left ventricular function during dynamic exercise in the presence or absence of coronary artery disease, 91
Influence of preload reserve on stroke volume response to exercise in patients with left ventricular systolic dysfunction: a Doppler echocardiographic study, 680
Observations suggesting a high incidence of exercise-induced severe mitral regurgitation in patients with mild rheumatic mitral valve disease at rest, 128
Optimal stage duration in dobutamine stress echocardiography, 605
Preserved right ventricular ejection fraction predicts exercise capacity and survival in advanced heart failure, 1143
Quantitative angiographic measurements of isolated left anterior descending coronary artery stenotic correlation with exercise echocardiography and technetium-99m 2-methoxy isobutyl isonitrile single-photon emission computed tomography, 1480
Selection of medical treatment in stable angina pectoris: results of the International Multicenter Angina Exercise (IMAGE) study, 1516
Specificity and sensitivity of exercise-induced ST segment elevation for detection of residual viability: comparison with fluordeoxyglucose and positron emission tomography, 1032
Standard exercise test is still the most cost-effective (letter), 1477
Task Force 2: training in electocardiography, ambulatory electrocardiography and exercise testing (COCATS), 10
Transesophageal dobutamine stress echocardiography in the evaluation of coronary artery disease, 823
Stroke
Pathogenesis of stroke after nonanterior myocardial infarction (letter), 1476
Stroke volume
Influence of preload reserve on stroke volume response to exercise in patients with left ventricular systolic dysfunction: a Doppler echocardiographic study, 680
Sudden death
Correlation between cardiac involvement and ST segment elevation for detection of residual viability (editorial comment), 554
Superoxide dismutase
Potentiation of endogenous nitric oxide with superoxide dismutase inhibits platelet-mediated thrombosis in injured and stenotic arteries, 269
Surgery
Outcome of cardiac surgery for carcinoid heart disease, 410
Surgery, coronary artery bypass
See also Gralla
Comparison of 15-year survival for men and women after initial medical or surgical treatment for coronary artery disease: a CASS Registry study, 1000
Coronary artery bypass graft surgery after thrombolytic therapy in the Thrombolysis in Myocardial Infarction trial, Phase II (TIMI II), 395
Exercise echocardiography after coronary artery bypass surgery: correlation with coronary angiography, 1019
Incremental prognostic value of exercise thallium-201 myocardial single-photon emission computed tomography late after coronary artery bypass surgery, 403
Right coronary artery stenosis: an independent predictor of atrial fibrillation after coronary artery bypass surgery, 198
Surgery, pediatric
Cardiac catheterization and test occlusion of the interatrial communication after the fenestrated Fontan operation, 1712
Computer-simulated and clinical models agree on optimal postoperative management for hypoplastic left heart syndrome (letter), 1760
Determinants of successful balloon valvotomy in infants with critical pulmonary stenosis or membranous pulmonary atresia with intact ventricular septum, 460
Early repair of tetralogy of Fallot and ventricular arrhythmia (letter), 554
Pulmonary/systemic flow ratio in children after cavo pulmonary anastomosis, 735
Video-assisted thoracoscopic vascular ring division in infants and children, 943
Surgery, valve
See also Valvotomy
Anterior leaflet procedures during mitral valve repair do not adversely influence long-term outcome, 134
Left ventricular function in chronic mitral regurgitation: preoperative and postoperative comparison, 113
Partial atrioventricular canal defect: long-term follow-up after initial repair in patients >40 years old, 1189
Syndrome X
Anatomic and physiologic heterogeneity in patients with syndrome X: an intravascular ultrasound study, 1310
Cardiac syndrome X: clinical characteristics and left ventricular function: long-term follow-up, 807
Continuing conundrum of syndrome X: further evidence of heterogeneity (editorial comment), 1218
Effects of acute amphetamine administration on cardiac functional reserve in patients with syndrome X, 1547
Estimation of coronary flow reserve by transesophageal coronary sinus Doppler measurements in patients with syndrome X and patients with significant left coronary artery disease, 1039
Therapeutic approach to microvascular angina (syndrome X) (letter), 1472
Systolic function
Influence of preload reserve on stroke volume response to exercise in patients with left ventricular systolic dysfunction: a Doppler echocardiographic study, 680
T wave
Clinical and pathologic characteristics of elderly patients with persistent ST segment elevation and inverted T waves: evidence of ischemic or healed myocardial infarction?, 1641
ST segment and T wave characteristics as indicators of coronary heart disease risk: the Zinfen study, 1321
Tachycardias
See Arrhythmias, ventricular
Tachycardia
See also Ventricular tachycardia
Anatomically and electrogan-guided stepwise approach for effective and safe catheter ablation of the fast pathway for elimination of atrioventricular node reentrant tachycardia, 974
Catheter ablation of permanent functional reciprocating tachycardia with radiofrequency current, 548
Fast pathway ablation for atrioventricular node reentrant tachycardia (editorial comment), 982
Incidence of symptomatic atrial fibrillation in patients with pulmonary supraventricular tachycardia, 894
Technetium-99m
Incremental value of simultaneous assessment of myocardial function and perfusion with technetium-99m sestamibi for prediction of extent of coronary artery disease, 1024
Quantitative angiographic measurements of isolated left anterior descending coronary artery stenosis: correlation with exercise denervation and its relation to autonomic dysfunction and silent myocardial ischemia, 610
Sympathetic nervous system
Metaiodobenzylguanidine imaging in diabetes mellitus: assessment of cardiac sympathetic denervation and its relation to autonomic dysfunction and silent myocardial ischemia, 610
Thallium-201 studies
Impaired myocardial blood flow in patients with a history of silent myocardial ischemia is not associated with impaired exercise tolerance, 1360
Echoangiography and techneumum-99m 2-methoxy isobutyl isonitrite single-photon emission computed tomography, 1486

Technetium-99m sestamibi tomographic evaluation of residual ischemia after anterior myocardial infarction, 590

Tetralogy of Fallot
Early repair of tetralogy of Fallot and ventricular arrhythmia (letter), 554

In utero pulmonary artery and aortic growth and potential for progression of pulmonary outflow tract obstruction in tetralogy of Fallot, 579

Thallium-201 studies
Comparison of thallium-201 single-photon emission computed tomography and electrocardiographic response during exercise in patients with normal rest electrocardiographic results, 380

Incremental prognostic value of exercise thallium-201 myocardial single-photon emission computed tomography late after coronary artery bypass surgery, 403

Rest-redistribution thallium-201 scintigraphy to determine myocardial viability early after myocardial infarction, 210

Role of adenosine thallium-201 tomography for defining long-term risk in patients after acute myocardial infarction, 1333

Thoracoscopy
Video-assisted thoracoscopic vascular ring division in infants and children, 943

Thrombin
Thrombin generation and activity during thrombolysis and concomitant heparin therapy in patients with acute myocardial infarction, 285

Thrombolytic therapy
See also Coronary reperfusion, specific agent

Angiographic predictors of reocclusion after thrombolytic results from the Thrombolysis in Myocardial Infarction (TIMI) 4 trial, 592

Antithrombotic therapy for acute myocardial infarction, 258

Appearance of abnormal Q waves early in the course of acute myocardial infarction: implications for efficacy of thrombolytic therapy, 1084

Cardiac rupture associated with thrombolytic therapy: impact of time to treatment in the Late Assessment of Thrombolytic Efficacy (LATE) study, 1063

Coronary artery bypass graft surgery after thrombolytic therapy in the Thrombolysis in Myocardial Infarction trial, Phase II (TIMI II), 395

Cost and quality of life: thrombolysis and primary angioplasty, 385

Current issues concerning thrombolytic therapy for acute myocardial infarction, 188

Improved posteriorobasal segment function after thrombolysis is associated with decreased incidence of significant mitral regurgitation in a first inferior myocardial infarction, 1558

Restoration of anterograde flow in acute myocardial infarction: the first 15 years, 15

Thrombin generation and activity during thrombolysis and concomitant heparin therapy in patients with acute myocardial infarction, 203

Time to thrombolytic treatment: factors affecting delay and their influence on outcome, 35

Thrombosis
See also Antithrombotic therapy

Angiographic identification of coronary thrombus in patients with postinfarction angina, 1282

Comparative results of transluminal extraction coronary athrectomy in saphenous vein graft lesions with and without thrombus, 1700

Doppler left ventricular flow pattern versus conventional predictors of left ventricular thrombus after acute myocardial infarction, 1341

Left atrial appendage thrombus is not uncommon in patients with acute atrial fibrillation and a recent embolic event: a transeosophagal echocardiographic study, 452

Potentiation of endogenous nitric oxide with superoxide dimutase inhibits platelet-mediated thrombosis in injured and stenotic arteries, 1269

Transesophageal echocardiographic screening for atrial thrombus before cardioversion of atrial fibrillation: when should we look, before we leap? (editorial comment), 1362

Tilt testing
Characterization of subcutaneous microvascular blood flow during tilt table-induced neurally mediated syncope, 70

Limitations of head-up tilt test for evaluating the efficacy of therapeutic interventions in patients with vasovagal syncope: results of a controlled study of etilefrine versus placebo, 65

Tomography
See also Technetium-99m; Thallium-201 studies

Adenosine pharmacologic stress myocardial perfusion tomographic imaging in patients with significant aortic stenosis: diagnostic efficacy and comparison of clinical, hemodynamic, and noninvasive variables with 100 age-matched control subjects, 99

Specificity and sensitivity of exercise-induced ST segment elevation for detection of residual viability: comparison with fluorodeoxyglucose and positron emission tomography, 1052

Torsade de points
Spontaneous sequences of onset of torsade de points in patients with acquired prolonged repolarization: a quantitative analysis of Holter recordings, 1564

Training
