

Discrete Mathematics

Volume 306, Issues 8–9, 1 May 2006

Contents

Contributions

- F. Caselli and M. Marietti*
Formulas for multi-parameter classes of Kazhdan–Lusztig polynomials in $\mathfrak{S}(n)$ 711
- G. Chartrand, Sin-Min Lee and P. Zhang*
Uniformly cordial graphs 726
- H.H. Cho, S.-R. Kim and J. Yeun Lee*
On the graph inequality $\theta_E(G) \geq \theta_E(G^m)$ 738
- E.E. Eischen*
Decomposition of almost complete tripartite graphs into two isomorphic factors of fixed diameter 745
- R. Häggkvist and K. Markström*
Cycle double covers and spanning minors II 762
- E. Máčajová and M. Škoviča*
Irreducible snarks of given order and cyclic connectivity 779
- Y.-P. Tsao and G.J. Chang*
Profile minimization on products of graphs 792
- I. Zverovich and I. Zverovich*
Bipartite bihypergraphs: A survey and new results 801
- #### Notes
- J.E. Bonin*
Extending a matroid by a cocircuit 812
- K. Carlson and M. Develin*
On the bondage number of planar and directed graphs 820
- D. Eisenstat and G. Gordon*
Non-isomorphic caterpillars with identical subtree data 827
- T. Gerlach, F. Göring, J. Harant and M. Tkáč*
On cycles through specified vertices 831
- C.H. Jepsen and M. Gu*
Dissections of $p:q$ rectangles into 13 $p:q$ rectangular elements 836

A.P. Kisielewicz and K. Przesławski

On the number of minimal partitions of a box into boxes

843

I. Leader and P.A. Russell

Consistency for partition regular equations

847
