Subject Index: Volume 6

Ablation procedures
Atrial automatic tachycardia treatment by ablation procedures, 405
Closed chest catheter ablation of accessory pathway with permanent junctional reciprocating tachycardia, 1167
Right atrial thrombus formation after transvenous catheter ablation of atrioventricular node, 1428
Right coronary artery spasm complicating electrode catheter ablation of right lateral accessory pathway, 250

Adenosine
Diagnostic and therapeutic use of adenosine for supraventricular tachyarrhythmias, 417

American College of Cardiology news
Philip Reichert, MD, FACC, 1897-1985, American way and amiodarone (editorial), 262
President's page: Certification, recertification and continuing medical education, 1180
President's page: Funding for graduate medical education, 715
President's page: Strategic planning—whither now, 495
President's page: The College and affiliates-in-training, 262

Amiodarone
American way and amiodarone (editorial), 822
Life-threatening ventricular tachycardia treatment with amiodarone: role of Holter monitoring in predicting long-term clinical efficacy, 806
Pulmonary toxicity of amiodarone: early changes in pulmonary function tests during amiodarone rechallenge, 802
Quinidine-resistant persistent and paroxysmal atrial fibrillation, therapy with amiodarone, 1402
Rate-dependent effects of intravenous lidocaine, procaainamide and amiodarone on intraventricular conduction, 179
Risk factors for recurrence of symptomatic ventricular tachycardia identified in electrophysiologic study with amiodarone therapy, 814

Amyloidosis
Echocardiographic findings in systemic amyloidosis: spectrum of cardiac involvement and relation to survival, 737

Aneurysms
Atrial septal aneurysm diagnosis and classification by two-dimensional echocardiography: report of 80 consecutive cases, 1370
Ductus arteriosus aneurysm presenting as pulmonary artery obstruction: diagnosis and management, 234
Extracardiac left to right shunt with biventricular postinfarction rupture and pseudoaneurysm, 246
Fatal vasculitis (periarteritis nodosa) of coronary arteries: angiographic ambiguities and absence of aneurysms at autopsy, 707
Subvalvular left ventricular pseudoaneurysm after mitral valve replacement: two-dimensional echocardiographic findings, 1164
Systemic embolism in chronic left ventricular aneurysm: incidence and role of anticoagulation, 534
Ultrasound diagnosis of pseudoaneurysm and contiguous ventricular septal defect complicating inferior myocardial infarction, 1160

Angina pectoris
Absence of rebound from diltiazem therapy in Prinzmetal's variant angina, 174
Clinical correlates and angiographic occurrence of intraluminal coronary artery thrombus: role of unstable angina, 285
Coronary angiographic morphology in myocardial infarction: link between pathogenesis of unstable angina and myocardial infarction, 1233
Myocardial revascularization for postinfarction angina: results and long-term follow-up, 1121
Nifedipine vs isosorbide dinitrate double-blind crossover comparison for antianginal effects with propranolol exertional angina therapy, 1395
Nisolipidine: dose-ranging, placebo-controlled, double-blind study in effort angina: duration and extent of antianginal effects, 447
Serial exercise testing of effort angina: variable tolerance, fixed threshold, 1011
Silent myocardial ischemia: hemodynamic changes during exercise in cases of proven coronary artery disease with absence of angina pectoris, 275
Variant angina in 11 year old boy. Chest pain evaluation in children (letter), 1178
Variant angina in 11 year old boy. Sickle cell trait (letter), 1178

Angiography
Abnormal coronary flow reserve and abnormal radionuclide exercise test results with normal coronary angiograms, 1245
Clinical and angiographic assessment 6 months after double vessel percutaneous coronary angioplasty, 1239
Clinical correlates and angiographic occurrence of intraluminal coronary artery thrombus: role of unstable angina, 285
Clinical, scintigraphic, angiographic and functional evaluation after myocardial infarction with and without right ventricular dysfunction, 995
Coronary angiographic morphology in myocardial infarction: link between pathogenesis of unstable angina and myocardial infarction, 1233
Coronary flow reserve with normal coronary angiograms, 1254
Dopamine: its potential for inducing ischemic left ventricular dysfunction, 84
Exercise electrocardiography, thallium-201 myocardial perfusion imaging and radionuclide angiography in coronary artery disease assessment, 75
Fatal vasculitis (periarteritis nodosa) of coronary arteries: angiographic ambiguities and absence of aneurysms at autopsy, 707
Hypotensive response potentiated by nifedipine and diltiazem after contrast angiography, 785

Angioplasty, coronary
Clinical and angiographic assessment 6 months after double vessel percutaneous coronary angioplasty, 1239
Epidural wall motion and left ventricular function during coronary graft angioplasty in humans, 695
Immediate and short-term benefit of multileSION coronary angioplasty: influence of degree of revascularization, 983
Intimal smooth muscle cell proliferation as cause of recurrent coronary artery stenosis after percutaneous transluminal coronary angioplasty, 369
Nitroglycerin amelioration of left ventricular ischemia induced by percutaneous transluminal coronary angioplasty, 267
Percutaneous balloon angioplasty in infant with obstructed total anomalous pulmonary vein return, 894
Percutaneous transluminal coronary angioplasty (editorial), 992
Regional wall motion improvement after coronary thrombolysis with recombinant tissue plasminogen activator: importance of coronary angioplasty, 426
Total coronary artery occlusion therapy with angioplasty: experience in 76 consecutive patients, 526

Angioscopy
Coronary angioscopy during cardiac catheterization, 93

Angiotensin
See Renin-angiotensin system

Antiarrhythmic agents
See also specific agents
Ambulatory monitoring vs programmed stimulation in assessing efficacy of class IA antiarrhythmic agents for ventricular tachycardia, 539
Anticoagulant therapy
Systemic embolism in chronic left ventricular aneurysm: incidence and role of anticoagulation, 534

Aorta
See also Coarctation of aorta
Two-dimensional measurement of aortic vessel diameter in Doppler echocardiographic estimates of left ventricular stroke volume, 66

Aortic valve
Continuous wave Doppler velocities correlated to cardiac catheterization gradients: experimental model of aortic stenosis, 1306
Flow rate changes affecting aortic, pulmonary and mitral valve area and flow velocity: impact on quantitative Doppler flow calculations, 653
Frequency content of systolic murmurs: an answer to the riddle of aortic stenosis? (editorial), 64

Intraoperative two-dimensional echocardiography, localization of aortic dissection intimal flap, 1155
Right ventricular wall thickness increase in left ventricular pressure overload: echocardiographic evaluation of hypertrophic response of nonstressed ventricle, 550
Spectral analysis of murmur in evaluation of aortic stenosis, 55
Transposition of great arteries with functional aortic valve atresia, 630

Arrhythmias
See also Tachyarrhythmias; Ventricular arrhythmias
Arrhythmias, 1225
Cardiac arrhythmias with surgical repair of Ebstein's anomaly, 1351
Occurrence and transmission of localized repolarization abnormalities and transmission in vitro, 152
Repolarization abnormalities and arrhythmias (editorial), 161

Aspergillosis
Angiographic pulmonary aspergillosis: presentation as massive pulmonary saddle embolism in immunocompromised patient, 486

Atherosclerosis
See also Coronary artery disease
Cardiac transplant patient with accelerated atherosclerosis, 243
Coronary luminal shape and arc of disease-free wall: morphologic observations and clinical relevance (editorial), 1100
Disease-free wall in coronary atherosclerosis: its relation to degree of obstruction, 1096
Failure of verapamil to retard atherosclerosis in Watanabe heritable hyperlipidemic rabbit: animal model of familial hypercholesterolemia, 141

Athlete
16th Bethesda conference: cardiovascular abnormalities in athlete: recommendations regarding eligibility for competition, 1189
Classification of sports, 1198
Left ventricular diastolic function in elite athletes with physiologic cardiac hypertrophy, 545
Legal consequences of standard setting for competitive athletes with cardiovascular abnormalities, 1191
Task Force I: congenital heart disease, 1200
Task Force II: acquired valvular heart disease, 1209
Task Force III: hypertrophic cardiomyopathy, other myocardial diseases and mitral valve prolapse, 1215
Task Force IV: systemic arterial hypertension, 1218
Task Force V: ischemic heart disease, 1222
Task Force VI: Arrhythmias, 1225

Atrial fibrillation
Cardiac arrhythmias with surgical repair of Ebstein's anomaly, 1351
Digoxin and quinidine effects on atrial fibrillation threshold in dogs, 119
Quinidine-resistant persistent and paroxysmal atrial fibrillation, therapy with amiodarone, 1402
Pedicu atrial flutter: a collaborative study of 380 cases, 871

Atrial septal defects
See Septal defects

Atrial size
Pacemaker hemodynamics assessed noninvasively by Doppler echocardiography: importance of left atrial size, 196

Atrial tachycardias
Ablation procedures for treatment of atrial tachycardia, 405

Atrioventricular node
Atrioventricular nodal or atriojunctional reentrant tachycardia? (editorial), 1393
Curative surgery for atrioventricular junctional ("AV nodal") reentrant tachycardia, 1383
Pseudoarrhythmogenic fast and slow pathway conduction: electrophysiologic findings with dual atrioventricular nodal pathways, 927
Right atrial thrombus formation after transvenous catheter ablation of atrioventricular node, 1428

Azathioprine
Lack of objective improvement in ventricular systolic function from azathioprine and prednisone therapy for myocarditis, 797

Beta-Adrenergic blocking agents
Cardioselective and nonselective beta-adrenoceptor blocking drugs in hypertension: blood pressure effects compared in mental and physical activity, 186
Decreased mortality after myocardial infarction with beta-receptor blockers (editorial), 973

Bethanidine sulfate
Efficacy in prevention of ventricular tachyarrhythmias during programmed stimulation, 510

Bisecting conference
16th Bethesda conference: cardiovascular abnormalities in athlete: recommendations regarding eligibility for competition, 1189

Bisoprolol
Percutaneous endomyocardial biopsy monitoring by two-dimensional echocardiography, 609

Blood pressure
See Hypertension; Hypotension; Pulmonary artery

Calcium
Cardiac calcium channels and their control by neurotransmitters and drugs, 1409
Contrast agent effects on coronary sinus ionized calcium and left ventricular hemodynamics in dogs, 845
Mechanism of cardiovascular effects of contrast media: evidence for transient myocardial calcium ion imbalance (editorial), 854

Captopril
Hemodynamic and clinical significance of pulmonary vascular response to long-term captopril therapy with severe chronic heart failure, 635

Cardiac arrest
See also Heart failure
Duration of inadequate coronary perfusion pressure effect on resuscitation from cardiac arrest, 113

Cardiac glycosides
See Digoxin; Digitalis

Cardiac tamponade
Intravascular volume alterations affecting relation between right ventricular diastolic pressure and hemodynamic severity of cardiac tamponade, 1057

Cardiokymography
Accuracy of cardiokymography during exercise testing: results of multicenter study, 502

Cardiomyopathies
Dynamic subaortic obstruction in hypertrophic cardiomyopathy: analysis by pulsed Doppler echocardiography study, 1
Dynamic subaortic obstruction in hypertrophic cardiomyopathies: criteria and controversy (editorial), 16
Hypertrophic cardiomyopathy, other myocardial diseases and mitral valve prolapse, 1215
Idiopathic dilated cardiomyopathy in the young: clinical profile and natural history, 1126
Right ventricular wall thickness increase in left ventricular pressure overload: echocardiographic evaluation of hypertrophic response of nonstressed ventricles, 550
Tachycardia and cardiomyopathies: the chicken-egg dilemma revisited (editorial), 1172

Catheter ablation
See Ablation procedures

Catheterization, cardiac
Continuous wave Doppler determination of right ventricular pressure: a simultaneous Doppler catheterization study in 127 patients, 750
Continuous wave Doppler velocities correlated to cardiac catheterization gradients: experimental model of aortic stenosis, 1306
Coronary angiography during cardiac catheterization, 93
Surgery for uncomplicated atrial septal defect without routine preoperative cardiac catheterization, 49

Chest pain
Prognostic significance of normal quantitative planar thallium-201 stress scintigraphy with chest pain, 27
Variant angina in 11 year old boy. Chest pain evaluation in children (letter), 1178

Coarctation of aorta
Left ventricular hyperkinesia at rest and during exercise in normotensive patients 2 to 27 years after coarctation repair, 879
Surgery for coarctation of aorta (editorial), 983

Computed tomography
Myocardial infarction fraction measurement with single photon emission computed tomography, 145

Congenital heart defects
See also Pediatric cardiology; specific defects
Anomalous left coronary artery from pulmonary artery: significance of associated cardiac defects, 237
Congenital heart disease, 1200
Incidence increase among offspring of affected parents, 376
Intelligence and hypoxemia in children with congenital heart disease: fact or artifact?, 889
Results of modified Fontan operation for congenital heart lesions in patients without preoperative sinus rhythm, 228
Percutaneous balloon angioplasty in infant with obstructed total anomalous pulmonary vein return, 894

Congestive heart failure
Enalapril effect on cardiovascular response to exercise and exercise tolerance in patients with congestive heart failure, 163
Hemodynamic effects of an oral dopamine receptor agonist (fenoldopam) for congestive heart failure, 792
Milrinone for congestive heart failure: acute and chronic hemodynamic and clinical evaluation, 453

Contrast media
Effects of contrast agents on coronary sinus ionized calcium and left ventricular hemodynamics in dogs, 845
Mechanism of cardiovascular effects of contrast media: evidence for transient myocardial calcium ion imbalance (editorial), 854

Coronary artery
Anomalous left coronary artery from pulmonary artery: significance of associated cardiac defects, 237
Artifactual regional gray level variability in contrast-enhanced two-dimensional echocardiographic images: effect on coronary perfusion bed measurements, 831
Fetal vasculitis (pierarteritis nodosa) of coronary arteries: angiographic ambiguities and absence of aneurysms at autopsy, 707
Leukotriene C4 reduction in blood flow in normal and narrowed coronary arteries of dogs, 1047
Smooth muscle contraction bands in media of coronary arteries: postmortem marker of antemortem coronary spasm?, 1329

Coronary artery disease
See also Atherosclerosis; Coronary artery occlusion
Catheterization of coronary arteries: postmortem, 1329
Identification of subtle regional ventricular dysfunction from gated blood pool scans at rest in cases of coronary artery disease, 589
Left ventricular asynchrony effect on time constant and extrapolated pressure of left ventricular pressure decay in coronary artery disease, 597
Methionine intolerance: a possible risk factor for coronary artery disease, 725
Multivessel coronary disease diagnosis by interaction of supplementary scintigraphic indicators of ischemia and stress electrocardiography, 581
Prognostic significance of normal quantitative planar thallium-201 stress scintigraphy with chest pain, 27
Silent myocardial ischemia: hemodynamic changes during exercise in cases of proven coronary artery disease with absence of angina pectoris, 725
Tomographic gated blood pool radionuclide ventriculography: analysis of wall motion and left ventricular volumes with coronary artery disease, 349

Coronary artery fistula (fistula)
Contrast echocardiographic recognition of left coronary artery fistula to the left and right ventricles, 923
Right coronary artery–pulmonary artery arteriovenous fistula secondary to open heart surgery, 933

Coronary artery occlusion
See also Coronary artery disease; Coronary artery stenosis; Ischemia
Abnormalities in cardiac metabolism sustained regionally after transient coronary artery occlusion, 336
Angioplasty in total coronary artery occlusion: experience in 76 consecutive patients, 526
Comparative echocardiographic study of recovery of diastolic vs systolic function after brief periods of coronary artery occlusion: differential nifedipine effects before and during occlusion, 1289
Contrast echocardiography in acute myocardial ischemia. Effect of injection site of contrast agent effect on estimation of area at risk for necrosis after coronary occlusion, 825
Coronary anatomic explanation for ischemia during intermittent coronary artery occlusion, 41
Creatine kinase release after brief coronary artery occlusion (editorial), 1304
Creatine kinase release not associated with myocardial necrosis after short periods of coronary artery occlusion in conscious baboons, 1299
Experimental myocardial infarction effect on ST segment response to tachycardia, 665
Infarct size in relation to occluded bed size in barbiturate-anesthetized vs conscious dogs, 1035
Nitroglycerin-induced hypotension effect on myocardial blood flow in two vessel occlusion-stenosis, anesthetized canine model, 856
Synchronized diastolic retroperfusion study during coronary artery occlusion, 328
Total coronary artery occlusion therapy with angioplasty: experience in 76 consecutive patients, 526

Coronary artery spasm
Electrode catheter ablation of right lateral accessory pathway complicated by right coronary spasm, 250
Histamine-induced spasm not significantly modulated by prostanooids in swine model, 321
Smooth muscle contraction bands in media of coronary arteries: postmortem marker of antemortem coronary spasm?, 1329

Coronary artery stenosis
Intimal smooth muscle cell proliferation as cause of recurrent coronary artery stenosis after percutaneous transluminal coronary angioplasty, 369
Nitroglycerin-induced hypotension: effect on myocardial blood flow in two vessel occlusion-stenosis, anesthetized canine model, 856

Coronary artery thrombus
Clinical correlates and angiographic occurrence of intraluminal coronary artery thrombus: role of unstable angina, 285
Laser recanalization of acutely thrombosed coronary arteries in live dogs: early results, 1052
Right atrial thrombus formation after transvenous catheter ablation of atrioventricular node, 1428

Creatine kinase
Creatine kinase release after brief coronary occlusion (editorial), 1304
Creatine kinase release not associated with myocardial necrosis after short periods of coronary artery occlusion in conscious baboons, 1299

Cystic fibrosis
Cardiac function with cystic fibrosis: hemodynamic changes during exercise in cases of proven coronary artery disease with absence of angina pectoris, 725

Defibrillator
Automatic implantable cardioverter-defibrillator: overview, 461
Electrode chest wall coupling agents of defibrillator: influence on transmural
impedance and shock success, 682
Implanted defibrillator: relation of defibrillating lead configuration and clinical variables to defibrillation threshold, 1315
Out-of-hospital automatic cardioversion of ventricular tachycardia with cardioverter-defibrillator, 482
Digitalis
Mortality in survivors of acute myocardial infarction associated with digitalis therapy: observations in Beta-Blocker Heart Attack Trial, 976
Digoxin
Digoxin and quinidine effects on atrial fibrillation threshold in dogs, 119
Diltiazem
Absence of rebound from diltiazem therapy in Prinzmetal's variant angina, 174
Hyperglycemia-coma and diltiazem (letter), 494
Hypotensive response potentiated by nifedipine and diltiazem after contrast angiography, 785
Dopamine
Hemodynamic effects of an oral dopamine receptor agonist (fenoldopam) for congestive heart failure, 792
Inotropic stimulation of repurfused myocardium with dopamine: infarct size and myocardial function effects, 1026
Ischemic left ventricular dysfunction potentially induced by dopamine, 84
Doppler ultrasound
See Echocardiography; Ultrasound
Ductus arteriosus
Aneurysm of ductus arteriosus presenting as pulmonary artery obstruction: diagnosis and management, 234
Histologic studies of normal and persistent ductus arteriosus, 394
Transitional circulation of newborn: two-dimensional Doppler echocardiographic study, 623
Echocardiography
See also Ultrasound
Amyloidosis echocardiographic findings: spectrum of cardiac involvement and relation to survival, 737
Aortic dissection intimal flap localization by intraoperative two-dimensional echocardiography, 1155
Artifactual regional gray level variability in contrast-enhanced two-dimensional echocardiographic images: effect on coronary perfusion bed measurements, 831
Atrial level right to left intracardiac shunt associated with postoperative hypoxemia: contrast two-dimensional echocardiography demonstration, 920
Atrial septal aneurysm diagnosis and classification by two-dimensional echocardiography: report of 80 consecutive cases, 1370
Cardiac abnormalities echocardiographic study in families of patients with Marfan's syndrome, 1016
Cardiac function with cystic fibrosis: evaluation by two-dimensional and Doppler echocardiography, 701
Cardiac output determination by echocardiographic Doppler methods: relative accuracy of various sites for measurement (editorial), 663
Comparative echocardiographic study of recovery of diastolic vs systolic function after brief periods of coronary occlusion: differential nifedipine effects before and during occlusion, 1289
Conduction system with prolonged QT interval, 1110
Constrictive pericarditis analysis with M-mode echocardiography, 471
Continuous wave Doppler determination of right ventricular pressure: a simultaneous Doppler catheterization study in 127 patients, 750
Contrast echocardiography in acute myocardial ischemia. Effect of injection site of contrast agent on estimation of area at risk for necrosis after coronary occlusion, 825
Contrast echocardiography recognition of left coronary artery fistula to the left and right ventricles, 923
Diastolic forward blood flow in pulmonary artery detected by Doppler echocardiography, 1372
Double orifice mitral valve findings using two-dimensional echocardiography, 383
Dynamic subaortic obstruction in hypertrophic cardiomyopathy: analysis by pulsed Doppler echocardiography study, 1
Flow rate changes affecting aortic, pulmonary and mitral valve area and flow velocity: impact on quantitative Doppler flow calculations, 653
Functional and pathologic effects of multiple echocardiographic contrast injections on myocardium, brain and kidney, 687
High pulse repetition frequency vs continuous wave Doppler echocardiography in assessing high flow velocity in valvular stenosis and regurgitation, 565
Left coronary artery fistula to the left and right ventricles recognized by contrast echocardiography, 923
Left ventricular mass and volume/mass ratio determination by two-dimensional echocardiography in normal adults, 1021
Myocardial perfusion imaging by contrast echocardiography: where are we going? (editorial), 621
Myocardial perfusion imaging in humans by contrast echocardiography using polygelin colloid solution, 612
Osteogenic sarcomas mimicking left atrial myxomas: clinical and two-dimensional echocardiographic features, 1422
Pacemaker herniodynamics assessed noninvasively by Doppler echocardiography: importance of left atrial size, 196
Paraseptal structure recognition by echocardiography, 913
Percutaneous endomyocardial biopsy monitoring by two-dimensional echocardiography, 609
Smoke-like echo in left atrial cavity in mitral valve disease: its features and significance, 744
Subvalvular left ventricular pseudoneurosyrm after mitral valve replacement: two-dimensional echocardiographic findings, 1164
Tense pericardial effusion manifested by echocardiography, 467
Transitional circulation of newborn: two-dimensional Doppler echocardiographic study, 623
Two-dimensional measurement of aortic vessel diameter in Doppler echocardiographic estimates of left ventricular systolic function, 66
Ventricular septal defect detection by pulsed Doppler echocardiography (letter), 493
Editorial
A new look at repolarization abnormalities and arrhythmias, 161
A long look at surgery for coarctation of aorta, 887
Amiodarone and the American way, 822
Atioventricular nodal or atriojunctional reentrant tachycardia?, 1393
Coronary luminal shape and the arc of disease-free wall: morphologic observations and clinical relevance, 1100
Creatine kinase release after brief coronary occlusion, 1304
Determination of cardiac output by echocardiographic Doppler methods: relative accuracy of various sites for measurement, 663
Dynamic subaortic obstruction in hypertrophic cardiomyopathies: criteria and controversy, 16
Frequency content of systolic murmurs: an answer to the riddle of aortic stenosis?, 64
Increasing importance of Doppler echocardiography, 366
Is the renin-angiotensin system really unnecessary in patients with severe chronic heart failure: price we pay for interfering with evolution, 171
Ischemia at a distance—so close yet so far, 46
Malignant ventricular arrhythmias early after myocardial infarction: brighter prospects, 769
Management of sustained ventricular tachycardia, 213
Mechanism of cardiovascular effects of contrast media: evidence for transient myocardial calcium ion imbalance, 854
Myocardial perfusion imaging by contrast echocardiography: where are we going?, 621
Noninvasive intracardiac pressure measurement using Doppler ultrasound, 575
Percutaneous transluminal coronary angioplasty, 992
Role of ventricular ectopic activity in sudden death, 40
Tachycardia and cardiomyopathy: the chicken-egg dilemma revisited, 1172
Threshold of pericardial constraint: pericardial reserve volume and auxiliary pericardial functions, 296
Why do beta-receptor blockers decrease mortality after myocardial infarction?, 973

Education update
Adult and pediatric cardiovascular training programs in United States, 942

Ejection fraction
Cardiac function with cystic fibrosis: evaluation by two-dimensional and Doppler echocardiography, 701
Dynamic subaortic obstruction in hypertrophic cardiomyopathy: analysis by pulsed Doppler echocardiography, 1
Left ventricular hyperkinesis at rest and during exercise in normotensive patients 2 to 27 years after coarctation repair, 879
Pericardium: significance in human subjects: effect on left ventricular volume, pressure and ejection, 290
Tomographic gated blood pool radionuclide ventriculography: analysis of wall motion and left ventricular volumes with coronary artery disease, 349

Electrocardiography
Acute right ventricular infarction electrocardiographic findings: sensitivity and specificity of alterations in right precordial leads V₆₆, V₆₆, V₆, V₂ and V₆, 1273
Cardiokymography accuracy during exercise testing: results of multicenter study, 502
Determinants of outcome of electrophysiologic study of ventricular tachyarrhythmias, 298
Exercise electrocardiography, thallium-201 myocardial perfusion imaging and radionuclide angiography in coronary artery disease assessment, 75
Left ventricular hypertrophy detection by electrocardiography: development and prospective validation of improved criteria, 572
Multivessel coronary disease diagnosis by interaction of supplementary scintigraphic indicators, ischemia and stress electrocardiography, 581
Spatial R wave amplitude changes during exercise in cases of proven coronary artery disease with absence of angina pectoris, 275
Spatial R wave amplitude changes during exercise: relation to left ventricular ischemia and function, 603

Electrode catheter ablation
See Ablation procedures

Embolism, pulmonary
Angioinvasive pulmonary aspergillosis: presentation as massive pulmonary saddle embolism in immunocompromised patient, 486
Systemic embolism in chronic left ventricular aneurysm: incidence and role of anticoagulation, 534
Enalapril
Enalapril effects on cardiovascular response to exercise and exercise tolerance with congestive heart failure, 163

Exercise testing
Abnormal coronary flow reserve and abnormal radionuclide exercise test results with normal coronary angiograms, 1245
Cardiokymography: accuracy during exercise testing: results of multicenter study, 502
Clinical data for predicting improvement in exercise capacity after cardiac rehabilitation, 19
Effort angina evaluation with serial exercise testing: variable tolerance, fixed threshold, 1011
Enalapril effect on cardiovascular response to exercise and exercise tolerance in patients with congestive heart failure, 163
Exercise electrocardiography, thallium-201 myocardial perfusion imaging and radionuclide angiography in coronary artery disease assessment, 75
Lactate production during maximal and submaximal exercise with chronic heart failure, 717
Left ventricular hyperkinesis at rest and during exercise in normotensive patients 2 to 27 years after coarctation repair, 879
Limb circulation and metabolism during exercise affected by renin-angiotensin system in cases of heart failure, 556
Massive myocardial invasion of malignant lymphoma as cause of intractable heart failure, conduction disturbances and myocardial infarction, 937
Renin-angiotensin system in severe chronic heart failure (editorial), 171

Heart murmur
Frequency content of systolic murmurs: an answer to the riddle of aortic stenosis? (editorial), 64
Spectral analysis of murmur in evaluation of aortic stenosis, 45

Heart transplantation
Accelerated atherosclerosis in cardiac transplant patient, 243

Histamine
Prostanojan effect on histamine-induced coronary artery spasm, 321

Holter monitoring
Ambulatory monitoring vs programmed stimulation in assessing efficacy of class IA antiarrhythmic agents for ventricular tachycardia, 539

Life-threatening ventricular tachycardia treatment with amiodarone: role of Holter monitoring in predicting long-term clinical efficacy, 906

Hypercholesterolemia
Failure of verapamil to retard atherosclerosis in Watanabe heritable hyperlipidemic rabbit: animal model of familial hypercholesterolemia, 141

Hypertension
Cardioselective and nonselective beta-adrenoceptor blocking drugs in hypertension: blood pressure effects compared in mental and physical activity, 186
Nitroglycerin-induced paradoxical pulmonary vasoconstriction in idiopathic pulmonary hypertension, 490
Quantitative assessment of pulmonary hypertension in patients with tricuspid regurgitation using continuous wave Doppler ultrasound, 359

Systemic arterial hypertension, 1218

Hypertrophy, cardiac
Dynamic subaortic obstruction in hypertrophic cardiomyopathy: analysis by pulsed Doppler echocardiography, 1
Electrocardiographic detection of left ventricular hypertrophy: development and prospective validation of improved criteria, 572
Left ventricular diastolic function in elite athletes with physiologic cardiac hypertrophy, 545
Right ventricular wall thickness increase in left ventricular pressure overload: echocardiographic evaluation of
Hypotension

Hemodynamic and clinical significance of pulmonary vascular response to long-term captopril therapy with severe chronic heart failure, 635
Nifedipine and diltiazem potentiation of hypotensive response after contrast angiography, 785
Nitroglycerin-induced hypotension: effect on myocardial blood flow in two vessel occlusion-stenosis, anesthetized canine model, 856

Intraaortic balloon counterpulsation therapy

Nitroglycerin and intraaortic balloon counterpulsation therapy for acute myocardial infarction, 434

Iobexol

Contrast agent effects on coronary sinus ionized calcium and left ventricular hemodynamics in dogs, 845

Ischemia

See also Myocardial infarction
C-11 palmitic acid retention and clearance in ischemic and reperfused canine myocardium, 311
Cardiac metabolism abnormalities sustained regionally after transient ischemia in chronic dog model, 336

Dopamine potential for inducing ischemic left ventricular dysfunction, 84
Energy metabolism in reperfused heart muscles: metabolic correlates to function, 864
Ischemia and reperfusion—so close yet so far (editorial), 46
Ischemic heart disease, 1222
Left ventricular global and regional function in relation to extent of myocardial ischemia, 104
Multivessel coronary disease diagnosis by interaction of supplementary scintigraphic indicators of ischemia and stress electrocardiography, 581
Nitroglycerin amelioration of left ventricular ischemia induced by percutaneous transluminal coronary angioplasty, 267
Oxygen free radical system as potential mediator of myocardial injury, 215
Silent myocardial ischemia: hemodynamic changes during exercise in cases of proven coronary artery disease with absence of angina pectoris, 275
Spatial R wave amplitude changes during exercise: relation to left ventricular ischemia and function, 603
Synchronized diastolic retroperfusion treatment study of acute myocardial ischemia, 328

Isosorbide dinitrate

Antianginal effects of nifedipine vs isosorbide dinitrate with propranolol, exertional angiina therapy, 1395

Kidney

Functional and pathologic effects of multiple echocardiographic contrast injections on myocardium, brain and kidney, 687

Laser therapy

Excimer laser: gross, light microscopic and ultrastructural analysis of potential advantages for use in laser therapy of cardiovascular disease, 1102
Laser recanalization of acutely thrombosed coronary arteries in live dogs: early results, 1052

Letters to the editor

Aneurysm of the interatrial septum, 956
Diltiazem and hyperglycemia-coma, 494
Doppler detection of ventricular septal defect, 493
Inotropic effect of methylxanthines, 260
Ioxaglate, iopamidol and diatrizoate in coronary arteriography, 956
Precordial ST segment deviations during acute myocardial infarction, 260
Variant angina in an 11 year old boy, Evaluation of chest pain in children, 1178
Variant angina in an 11 year old boy, Sickle cell trait, 1178
Leukotriene C4
Blood flow reduction by leukotriene C4 in normal and narrowed coronary arteries of dogs, 1047

Lidocaine

Rate-dependent effects of intravenous lidocaine, procainamide and amiodarone on intraventricular conduction, 179
Verapamil and lidocaine effects in canine model of sudden coronary death, 674

Lymphoma

Massive myocardial invasion of malignant lymphoma as cause of intractable heart failure, conduction disturbances and myocardial infarction, 937

Marfan's syndrome

Cardiac abnormalities echocardiographic study in families of patients with Marfan's syndrome, 1016

Metabolism

Abnormalities in cardiac metabolism sustained regionally after transient ischemia in dog model, 336
Creatine kinase release after brief coronary occlusion (editorial), 1304
Creatine kinase release not associated with myocardial necrosis after short periods of coronary artery occlusion in conscious baboons, 1297
Energy metabolism in reperfused heart muscles: metabolic correlates to function, 864
Lactate production during maximal and submaximal exercise with chronic heart failure, 717

Methionine

Intolerance to methionine as possible risk factor for coronary artery disease, 725

Mexiletine

Clinical evaluation of oral mexiletine therapy for ventricular arrhythmias, 780

Milrinone

Congestive heart failure therapy with milrinone: acute and chronic hemodynamic and clinical evaluation, 453

Mitral valve

Flow rate changes affecting aortic, pulmonary and mitral valve area and flow velocity: impact on quantitative Doppler flow calculations, 653
Hypertrophic cardiomyopathy, other myopericardial diseases and mitral valve prolapse, 1215
Smoke-like echo in the left atrial cavity in mitral valve disease: its features and significance, 744
Subvalvular left ventricular pseudoaneurysm after mitral valve replacement: two-dimensional echocardiographic findings, 1164
Two-dimensional echocardiographic findings in double orifice mitral valve, 383

Myocardial infarction

See also Ischemia, Myocardial injury
Acute right ventricular infarction: electrocardiographic findings: sensitivity and specificity of alterations in right precordial leads V4R, V3R, V1, V2 and V3, 1273
Beta-receptor blockers for decreased mortality after myocardial infarction (editorial), 973
Clinical, scintigraphic, angiographic and functional evaluation after myocardial infarction with and without right ventricular dysfunction, 995
Coronary angiographic morphology in myocardial infarction: link between pathogenesis of unstable angina and myocardial infarction, 1233
Coronary artery thrombus: importance in acute myocardial infarction, 285
Crista supraventricularis anatomy: importance for understanding right ventricular function, right ventricular infarction and related conditions, 1083
Digitalis therapy associated with mortality in survivors of acute myocardial infarction: observations in Beta-Blocker Heart Attack Trial, 976
Early infarct expansion: structural or functional?, 839
Experimental myocardial infarction: effect on ST segment response to tachycardia, 665
Extracardiac left to right shunt with biventricular postinfarction rupture and pseudoaneurysm, 246
High dose intravenous streptokinase for acute myocardial infarction: preliminary results of multicenter trial, 957
Inotropic stimulation of reperfused myocardium with dopamine: infarct size and myocardial function effects, 1026
Intraaortic balloon counterpulsation and intravenous nitroglycerin for acute myocardial infarction: brighter prospects (editorial), 769
Massive myocardial invasion of malignant lymphoma as cause of intractable heart failure, conduction disturbances and myocardial infarction, 434
Myocardial revascularization for postinfarction angina: results and long-term follow-up, 1121
Occluded bed size in relation to infarct size in barbiturate-anesthetized vs conscious dogs, 1026
Pacing importance in initiation of ventricular tachyarrhythmias in canine model of chronic myocardial infarction, 99
Photon emission computed tomography in measurement of myocardial infarction fraction, 145
Percutaneous transluminal angiography, 785
Reentrant ventricular arrhythmias in the late myocardial infarction period: spontaneous vs induced reentry and intramural vs epicardial circuits, 124
Regional wall motion improvement after coronary thrombolysis with recombinant tissue plasminogen activator: importance of coronary angioplasty, 426
Scintigraphically detected predominant right ventricular dysfunction in acute myocardial infarction: clinical and hemodynamic correlates and implications for therapy and prognosis, 1264
Silent myocardial ischemia: hemodynamic changes during exercise in cases of proven coronary artery disease with absence of angina pectoris, 275
Survival after hospital discharge in matched populations with inferior or anterior myocardial infarction, 731
Sustained ventricular tachyarrhythmias within 2 months of acute myocardial infarction: medical and surgical therapy results after resuscitation from initial episode, 759
Time from onset of symptoms to thrombolytic therapy: major determinant of myocardial salvage with acute transmural infarction, 518
Ultrasound diagnosis of pseudoaneurysm and contiguous ventricular septal defect complicating inferior myocardial infarction, 1160
Ventricular arrhythmia treatment with oxprenolol: the European Infarction Study experience, 963
Myocardial injury
See also Myocardial infarction; Ischemia
Oxygen free radical system as potential mediator of myocardial injury, 215
Myocardial ischemia
See Ischemia
Myocarditis
Lack of objective improvement in ventricular systolic function from
azathioprine and prednisone therapy for myocarditis, 797
Nonsteroidal anti-inflammatory drug exacerbation of Cossackie B3 murine myocarditis, 1078
Myocardium
C-11 palmitic acid retention and clearance in ischemic and reperfused canine myocardium, 31
Energy metabolism in reperfused heart muscles: metabolic correlates to function, 864
Functional and pathologic effects of multiple echocardiographic contrast injections on myocardium, brain and kidney, 687
Inotropic stimulation of reperfused myocardium with dopamine: infarct size and myocardial function effects, 1026
Massive myocardial invasion of malignant lymphoma as cause of intractable heart failure, conduction disturbances and myocardial infarction, 937
Revascularization of myocardium for postinfarction angina: results and long-term follow-up, 1121
Myotonic dystrophy
Ventricular tachycardia and sudden death in myotonic dystrophy: clinical, electrophysiologic and pathologic features, 254
Nifedipine
Antianginal effects of nifedipine vs isosorbide dinitrate with propranolol, exertional angina therapy, 1395
Comparative echocardiographic study of recovery of diastolic vs systolic function after brief periods of coronary occlusion: differential nifedipine effects before and during occlusion, 1289
Hypotensive response potentiated by nifedipine and diltiazem after contrast angiography, 785
Nisoldipine
Dose-ranging, placebo-controlled, double blind trial of nisoldipine in effort angina: results and long-term follow-up, 1121
Nitroglycerin
Hypotension induced by nitroglycerin: effect on myocardial blood flow in two vessel occlusion-stenosis, anesthetized canine model, 856
Intraaortic balloon counterpulsation and intravenous nitroglycerin for acute myocardial infarction, 434
Paradoxical pulmonary vasconstriction induced by nitroglycerin in idiopathic pulmonary hypertension, 490
Percutaneous transluminal coronary angioplasty-induced left ventricular ischemia ameliorated by nitroglycerin, 267
Oxyprenolol
Ventricular arrhythmia treatment with oxprenolol: the European Infarction Study experience, 963
Oxygen free radical system
Myocardial injury potentially mediated by oxygen free radical system, 215
Pacemakers
Atrial sensing and pacing stability after dual chamber pulse generator implantation, 1338
Doppler echocardiographic noninvasive assessment of pacemaker hemodynamics: importance of left atrial size, 196
Permanent triggered antiarrhythmia pacemakers in management of recurrent sustained ventricular tachycardia, 206
Respiratory-dependent ventricular pacing vs fixed ventricular and atrial-ventricular synchronous pacing: aerobic and hemodynamic variables, 646
Supraventricular tachycardias automatically terminated by pacemaker, 201
Pacing, cardiac
See Atrioventricular node; Pacemakers
Palmitic acid
C-11 palmitic acid retention and clearance in ischemic and reperfused canine myocardium, 31
Pediatric cardiology
