Bibliography

Articles

1. Proximity and generalized uniformity, *Fund. Math.* 52 (1963) 235–252 (with E.M. Alfsen).
2. Totality of uniform structures with a linearly ordered base, *Fund. Math.* 52 (1963) 253–256 (with E.M. Alfsen).
3. Some properties of proximity and generalized uniformity, *Math. Scand.* 12 (1963) 47–56.
4. On real-valued proximity mappings, *Math. Ann.* 145 (1964) 413–419.
5. Uniform approximation in various function classes, *Math. Scand.* 14 (1964) 5–18.
6. On some classes of nearly open sets, *Pacific J. Math.* 15 (1965) 961–970.
7. A note on compactification by bounding systems, *J. London Math. Soc.* 40 (1965) 526–532.
8. On uniform spaces where all uniformly continuous functions are bounded, *Monatsh. Math.* 69 (1965) 167–176.
9. On Wallman-type compactifications, *Math. Z.* 91 (1966) 267–276.
10. Infinite-valued asymptotic points for functions holomorphic in the unit disc, *Det Kgl. Norske Videnskabers Selskabs Skrifter* No. 8 (1966) 1–14.
11. Remarks on topologies defined by local properties, *Avhandlingar utgitt av Det Norske Videnskaps-Akademi i Oslo I, Mat. Naturv. Klasse. Ny Ser No.* 8 (1966) 1–16.
12. Infinite-valued asymptotic points and Koebe arcs, *Math. Scand.* 19 (1966) 172–181.
13. Randverdier av holomorfe funksjoner, *Nordisk Matematisk Tidsskrift* 16 (1968) 84–87.
14. On p -systems and p -functions, *Det Kgl. Norske Videnskabers Selskabs Skrifter* No. 1 (1968) 1–10.
15. Note on the Peano axioms, *Det Kgl. Norske Videnskabers Selskabs Forhandlingar* 41 (5) (1968) 16–20.
16. A note on generalized peak points and uniform approximation, *Det Kgl. Norske Videnskabers Selskabs Forhandlingar* 42 (1) (1969) 1–5.
17. Annihilating measures and Dirichlet's problem, *Det Kgl. Norske Videnskabers Selskabs Skrifter* No. 9 (1972) 1–9.
18. Annihilating measures for $H(K)$, University of Trondheim, Departments of Mathematics, Preprint series No. 5/72, 1–18.
19. Multiple points and Wallman compactifications, *J. Austral. Math. Soc. (Ser. A)* 20 (1975) 274–280.

20. A note on a certain Boltzmann-type operator, University of Trondheim, Departments of Mathematics, Preprint series No. 4/75, 1–9.
21. On a construction of compactifications, University of Trondheim, Departments of Mathematics, Preprint series No. 5/75, 1–12.
22. Contiguity and Proximity without smallest Nearness, University of Trondheim, Departments of Mathematics, Preprint series No. 12/75, 1–6.
23. Classes of topologies defined by ideals, University of Trondheim, Departments of Mathematics, Preprint series No. 12/76, 1–16.
24. Remarks on compactifications constructed by Fomin and Wasileski, University of Trondheim, Departments of Mathematics, Preprint series No. 3/79, 1–9.
25. Remarks on compactification of mappings, University of Trondheim, Departments of Mathematics, Preprint series No. 1/80, 1–11.
26. Regular Wallman compactifications of rim-compact spaces, *J. Austral. Math. Soc. (Ser. A)* 31 (1981) 312–324.
27. Hereditary Wallman spaces, *Math. Japonica* 27 (1982) 327–333.
28. Completion of merotopic spaces and extension of uniformly continuous maps, *Topol. Appl.* 15 (1983) 29–44 (with K.C. Chattopadhyay).
29. Quasi-regular nearness spaces and extensions of nearness-preserving maps, *Pacific J. Math.* 105 (1983) 33–51 (with K.C. Chattopadhyay).
30. Merotopic spaces and extensions of closure spaces, *Canadian J. Math.* 35 (1983) 613–629 (with K.C. Chattopadhyay and W.J. Thron).
31. The theory of sequences of orthogonal L-polynomials, Padé approximants and continued fractions, H. Waadeland and Hans Wallin (editors), *Det Kgl. Norske Videnskabers Selskabs Skrifter* No. 1 (1983) 54–91 (with W.J. Thron).
32. Two-point Padé expansions for a family of analytic functions, *J. Comput. Appl. Math.* 9 (1983) 105–123 (with W.B. Jones and W.J. Thron).
33. Continued fractions and strong Hamburger moment problems, *Proc. Lond. Math. Soc. (3)* 47 (1983) 363–384 (with W.B. Jones and W.J. Thron).
34. Fixed point theorems on merotopic spaces, *J. Indian Math. Soc.* 47 (1983) 193–205 (with K.C. Chattopadhyay).
35. Completely convergent APT-fractions and strong Hamburger moment problems with unique solutions, *Det Kgl. Norske Videnskabers Selskabs Skrifter* No. 2 (1984) 1–7 (with W.J. Thron).
36. Orthogonal Laurent polynomials and the strong Hamburger moment problem, *J. Math. Anal. Appl.* 98 (1984) 528–554 (with W.B. Jones and W.J. Thron).
37. An extended Hamburger moment problem, *Proc. Edinburgh Math. Soc.* 28 (1985) 167–183.
38. Unique solvability of the strong Hamburger moment problem, *J. Austral. Math. Soc. (Series A)* 30 (1986) 5–19 (with W.J. Thron).
39. Continued fractions associated with Wiener’s linear prediction method, *Computational and Combinatorial Methods in Systems Theory*, C.I. Byrnes and A. Lindquist (editors), Elsevier Science Publishers B.V. (North-Holland) (1986) 27–40 (with W.B. Jones and W.J. Thron).
40. Schur Fractions, Perron-Carathéodory Fractions and Szegő Polynomials, a Survey, *Analytic Theory of Continued Fractions II*, W.J. Thron (editor), Springer Lecture Notes 1199 (1986) 127–158 (with W.B. Jones and W.J. Thron).

41. A multi-point Padé approximation problem, *Analytic Theory of Continued Fractions II*, W.J. Thron (editor), Springer Lecture Notes 1199 (1986) 263–268.
42. Continued Fractions Associated with Trigonometric and Other Strong Moment Problems, *Constr. Approx.* 2 (1986) 197–211 (with W.B. Jones and W.J. Thron).
43. Perron-Carathéodory Continued Fractions, Rational Approximations and its Applications in Mathematics and Physics, J. Gilewicz (editor), Springer Lecture Notes 1237 (1987) 189–206 (with W.B. Jones and W.J. Thron).
44. Unique solvability of an extended Hamburger moment Problem, *J. Math. Anal. Appl.* 124 (1987) 502–519.
45. Unique solvability of an extended Stieltjes moment problem, *Proc. Amer. Math. Soc.* 102 (1988) 78–82.
46. Multi-point Padé approximation and orthogonal rational functions, *Non-linear Numerical Methods and Rational Approximation* (Ed. A. Cuyt) (1988) 259–270.
47. Laurent continued fractions corresponding to pairs of power series, *J. Approx. Theory* 55 (1988) 119–139.
48. Asymptotic expansions and contractive Laurents fractions, *Proc. London Math. Soc.* (3) 56 (1988) 78–100.
49. Solution of the strong Hamburger moment problem by Laurent continued fractions, *Appl. Numer. Math.* 4 (1988) 351–360.
50. Rational Functions and Quadrature Formulae, *Analysis* 8 (1988) 347–366 (with W.J. Thron).
51. Orthogonal rational functions with poles in a finite subset of \mathbf{R} Proceedings of the Second International Symposium on Orthogonal Polynomials and their Applications, Segovia 1986, Springer Lecture Notes 1329 (1988) 300–307.
52. Contractive Laurent fractions and nested discs, *J. Approx. Theory* 56 (1989) 134–151.
53. Moment theory, orthogonal polynomials, quadrature, and continued fractions, associated with the unit circle, *Bull. London Math. Soc.* 21 (1989) 113–152 (with W.B. Jones and W.J. Thron).
54. A Farvard theorem for rational functions, *J. Math. Anal. Appl.* 142 (1989) 508–520 (with E. Hendriksen).
55. Positive multipoint Padé continued fractions, *Proc. Edinburgh Math. Soc.* 32 (1989) 261–269 (with E. Hendriksen).
56. Multipoint Padé approximants and related continued fractions, *Analytic Theory of Continued Fractions III*, Lisa Jacobsen (editor), Springer Lecture Notes 1406 (1989) 76–87.
57. A survey of some results on separate convergence of continued fractions, *Analytic Theory of Continued Fractions III*, Lisa Jacobsen (editor), Springer Lecture Notes 1406 (1989) 88–114.
58. Some remarks on nearness problems for continued fraction expansions, *Analytic Theory of Continued Fractions III*, Lisa Jacobsen (editor), Springer Lecture Notes 1406 (1989) 115–123 (with H. Waadeland).
59. Laurent polynomials and Gaussian quadrature, *Det Kongelige Norske Videnskabers Selskab, Sdrifter* No. 2 (1989) 102–120.
60. Strongly bounded functions and corresponding PC-fractions, *J. Math. Anal. Appl.* 151 (1990) 379–395 (with H. Waadeland).
61. Convergence of two-point Padé approximants to series of Stieltjes, *J. Comput. Appl. Math.* 32 (1990) 97–105 (with P. Gonzalez-Vera).

62. Szegő functions and multipoint Padé approximation, *J. Comput. Appl. Math.* 32 (1990) 107–116 (with P. Gonzalez-Vera).
63. Szegő polynomials associated with Wiener–Levinson filters, *J. Comput. Appl. Math.* 32 (1990) 387–406 (with W.B. Jones and E. Saff).
64. Convergence of the Schur algorithm, *Proc. Amer. Math. Soc.* 110 (1990) 1003–1007.
65. Biorthogonal Laurent polynomials with biorthogonal derivatives, *Rocky Mountain J. Math.* 21 (1991) 301–317 (with E. Hendriksen).
66. Applications of Szegő polynomials to digital signal processing, *Rocky Mountain J. Math.* 21 (1991) 387–436 (with W.B. Jones).
67. A modified Schur algorithm and an extended Hamburger moment problem, *Trans. Amer. Math. Soc.* 327 (1991) 283–311.
68. A nearness result for PC-fractions, *J. Math. Anal. Appl.* 159 (1991) 158–167 (with H. Waadeland).
69. Orthogonal rational functions similar to Szegő polynomials, *Proceeding of Third International Symposium on Orthogonal Polynomials and their Applications* (eds.: C. Brezinski, L. Gori and A. Ronveaux) *IMACS Annals of Computing and Applied Mathematics* 9 (1991) 195–204 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
70. Orthogonality and quadrature on the unit circle, *Proceeding of Third International Symposium on Orthogonal Polynomials and their Applications* (eds.: C. Brezinski, L. Gori and A. Ronveaux) *IMACS Annals of Computing and Applied Mathematics* 9 (1991) 205–210 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
71. The computation of orthogonal rational functions and their interpolating properties, *Numerical Algorithms* 2 (1992) 85–118 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
72. A Favard theorem for orthogonal rational functions on the unit circle, *Numerical Algorithms* 3 (1992) 81–89 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
73. A moment problem associated to rational Szegő functions, *Numer. Algorithms* 3 (1992) 91–104 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
74. Orthogonal rational functions and quadratures on the unit circle, *Numer. Algorithms* 3 (1992) 105–116 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
75. Asymptotics for Szegő polynomial zeros, *Numer. Algorithms* 3 (1992) 255–264 (with W.B. Jones and H. Waadeland).
76. Convergence properties related to p-point Padé approximants of Stieltjes transforms, *J. Approx. Theory* 73 (1993) 149–161.
77. Szegő polynomials applied to frequency analysis, *J. Comput. Appl. Math.* 46 (1993) 217–228 (with W.B. Jones, W.J. Thron and H. Waadeland).
78. Moment problems and orthogonal functions, *J. Comput. Appl. Math.* 48 (1993) 49–68 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
79. Orthogonal rational functions on the unit circle and the real line, *Koninklijke Nederlandse Akademie van Wetenschappen Verhandelingen, Afd. Natuurkunde, Eerste Reeks, Deel* 40 (1993) 241–252 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
80. Asymptotics of zeros of orthogonal and para-orthogonal Szegő polynomials in frequency analysis, *Continued Fractions and Orthogonal Functions*, S.C. Cooper and W.J. Thron (editors), Marcel Dekker, 1994, 153–190 (with W.B. Jones and H. Waadeland).

81. An alternative way of using Szegő polynomials in frequency analysis, *Continued Fractions and Orthogonal Functions*, S.C. Cooper and W.J. Thron (editors), Marcel Dekker, 1994, 141–152 (with W.B. Jones and H. Waadeland).
82. Recurrence relations for orthogonal functions, *Continued Fractions and Orthogonal Functions*, S.C. Cooper and W.J. Thron (editors), Marcel Dekker, 1994, 23–46 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
83. Application of Szegő polynomials to frequency analysis, *SIAM J. Math. Anal.* 25 (1994) 491–512 (with W.B. Jones and H. Waadeland).
84. Quadrature formulas on the unit circle based on rational functions, *J. Comput. Appl. Math.* 50 (1994) 159–170 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
85. Orthogonal rational functions with poles on the unit circle, *J. Math. Anal. Appl.* 182 (1994) 221–243 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
86. Orthogonality and boundary interpolation, *Nonlinear Numerical Methods and Rational Approximation II*, Annie Cuyt (editor), Kluwer, 1994, 37–48 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
87. Quadrature formulas on the unit circle and two-point Padé approximation, *Nonlinear Numerical Methods and Rational Approximation II*, Annie Cuyt (editor), Kluwer, 1994, 303–316 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
88. Solutions of the Stieltjes moment problem, *Comm. Anal. Theory Continued Fractions* 3 (1994) 32–51.
89. Asymptotics for orthogonal rational functions, *Trans. Amer. Math. Soc.* 346 (1994) 307–329 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
90. Orthogonal rational functions on the unit circle: theory, applications and generalizations, *Orthogonal Polynomials on the Unit Circle: Theory and Applications*, Universidad Carlos III de Madrid (1994), 22pp. (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
91. Numerical quadratures on the unit circle. A survey with some new results, *Orthogonal Polynomials on the Unit Circle: Theory and Applications*, Universidad Carlos III de Madrid (1994), 20pp. (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
92. Favard theorem for reproducing kernels, *J. Comput. Appl. Math.* 57 (1995) 57–76 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
93. Convergence of modified approximants associated with orthogonal rational functions, *J. Comput. Appl. Math.* 57 (1995) 77–86 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
94. Classical and strong moment problems, *Comm. Anal. Theory Continued Fractions* 4 (1995) 4–38.
95. Convergence of orthogonal rational functions, *Comput. Methods Function Theory 1994*, World Scientific (1995) 111–124 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
96. Solutions of the strong Stieltjes moment problem, *Methods Appl. Anal.* 2 (1995) 320–347.
97. Extremal solutions of the strong Stieltjes moment problem, *J. Comput. Appl. Math.* 65 (1995) 309–318.
98. Solutions of the strong Hamburger moment problem, *J. Math. Anal. Appl.* 197 (1996) 227–248.
99. Orthogonal rational functions and modified approximants, *Numer. Algorithms* 11 (1996) 57–69 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
100. Some results about numerical quadrature on the unit circle, *Adv. Comput. Math.* 5 (1996) 297–328 (with P. Gonzalez-Vera and J.C. Santos-Leon).

101. On the convergence of multipoint Padé-type approximants and quadrature formulas associated with the unit circle, *Numer. Algorithms* 13 (1996) 321–344 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
102. Generalized Szegő theory in frequency analysis, *J. Math. Anal. Appl.* 206 (1997) 280–307 (with H. Waadeland).
103. Rates of convergence of multipoint rational approximants and quadrature formulas on the unit circle, *J. Comput. Appl. Math.* 77 (1997) 77–101 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
104. Asymptotic properties of zeros of orthogonal rational functions, *J. Comput. Appl. Math.* 77 (1997) 255–275 (with H. Waadeland).
105. Orthogonal rational functions and nested disks, *J. Approx. Theory* 89 (1997) 344–371 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
106. A Favard theorem for rational functions with poles on the unit circle, *East J. Approx.* 3 (1997) 21–38 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
107. A rational moment problem on the unit circle, *Methods Appl. Anal.* 4 (1997) 283–310 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
108. A note on para-orthogonal Laurent polynomials, *Comm. Anal. Theory Continued Fractions* 6 (1997) 21–31.
109. Natural solutions of strong Stieltjes moment problems derived from PC-fractions, *Orthogonal Functions, Moment Theory and Continued Fractions: Theory and Applications*, W.B. Jones and A. Sri Ranga (editors), Marcel Dekker, 1998, 15–30 (with C. Bonan-Hamada and W.B. Jones).
110. A class of indeterminate strong Stieltjes moment problems with discrete distributions, *Orthogonal Functions, Moment Theory and Continued Fractions: Theory and Applications*, W.B. Jones and A. Sri Ranga (editors), Marcel Dekker, 1998, 31–35 (with C. Bonan-Hamada, W.B. Jones and W.J. Thron).
111. Continued fractions and orthogonal rational functions, *Orthogonal Functions, Moment Theory and Continued Fractions: Theory and Applications*, W.B. Jones and A. Sri Ranga (editors), Marcel Dekker, 1998, 69–100 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
112. Interpolation of Nevanlinna functions by rationals with poles on the real line, *Orthogonal Functions, Moment Theory and Continued Fractions: Theory and Applications*, W.B. Jones and A. Sri Ranga (editors), Marcel Dekker, 1998, 101–110 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
113. Remarks on canonical solutions of strong moment problems, *Orthogonal Functions, Moment Theory and Continued Fractions: Theory and Applications*, W.B. Jones and A. Sri Ranga (editors), Marcel Dekker, 1998, 359–374.
114. Orthogonal rational functions and interpolatory product rules on the unit circle. I: Recurrence and interpolation, *Analysis* 18 (1998) 167–183 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
115. Orthogonal rational functions and interpolatory product rules on the unit circle. II: Quadrature and convergence, *Analysis* 18 (1998) 185–200 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
116. Nevanlinna matrices for the strong Stieltjes moment problem, *J. Comput. Appl. Math.* 99 (1998) 311–318.
117. Lens-shaped regions for strong Stieltjes moment problems, *Methods Appl. Anal.* 6 (1999) 195–208.
118. Strong Stieltjes moment problems, *Continued Fractions: From Analytic Number Theory to Constructive Approximation*, Contemporary Mathematics Series 236, American Mathematical Society (1999) 57–75.

119. A density problem for orthogonal rational functions, *J. Comput. Appl. Math.* 105 (1999) 199–212 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
120. Orthogonal Laurent polynomials and strong moment theory: A survey, *J. Comput. Appl. Math.* 105 (1999) 51–91 (with W.B. Jones).
121. A note on modified PC-fractions, *Comm. Anal. Theory Continued Fractions* 7 (1999) 23–33.
122. Riesz criterion for the strong Hamburger moment problem, *Comm. Anal. Theory Continued Fractions* 7 (1999) 34–50.
123. Elements of a theory of orthogonal rational functions, *Revista de la Academia Canaria de Ciencias* 11 (1–2) (1999) 127–152 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
124. Orthogonal rational functions and interpolatory product rules on the unit circle. III: Convergence of general sequences, *Analysis* 20 (2000) 99–120 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
125. Monotonicity of multi-point Padé approximants, *Comm. Anal. Theory Continued Fractions* 8 (2000) 14–27 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
126. Canonical and extremal solutions of strong Hamburger moment problems, *Comm. Anal. Theory Continued Fractions* 8 (2000) 117–129.
127. Interpolation by rational functions with nodes on the unit circle, *Acta Appl. Math.* 61 (2000) 101–118 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
128. Quadrature and orthogonal rational functions, *J. Comput. Appl. Math.* 127 (2001) 67–91 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
129. Determinacy of a rational moment problem, *J. Comput. Appl. Math.* 133 (2001) 241–252 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
130. Orthogonal rational functions and continued fractions, *Special Functions 2000: Current Perspective and Future Directions*, J. Bustoz, M.E.H. Ismail and S.K. Suslov (editors), Kluwer Academic Publishers (2001) 87–109 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
131. Regularity of certain Laurent polynomials, *Proceedings of the International Conference on Analysis and its Applications, Chennai 2000*, Allied Publishers Ltd. (2001) 139–145.
132. Szegő quadrature formulas for certain Jacobi-type weights, *Mathematics of Computation*, American Mathematical Society 71 (2002) 683–701 (with L. Daruis and P. Gonzalez-Vera).
133. A rational Stieltjes moment problem, *Applied Mathematics and Computation*, 128 (2002) 217–235 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
134. Repeated Thiele fractions, *Comm. Anal. Theory Continued Fractions* 10 (2002) 48–58.
135. Orthogonal rational functions and tridiagonal matrices, *J. Comput. Appl. Math.* 153 (2003) 89–97 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
136. Orthogonal rational functions and quadrature on the real half line, *J. Complexity* 19 (2003) 212–330 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
137. Navalinna matrices for the strong Hamburger moment problem, *Rocky Mountain J. Math.* 33 (2003) 475–488.
138. Positivity of continued fractions associated with rational Stieltjes moment problems, *Rocky Mountain J. Math.* 33 (2003) 609–627 (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
139. Paraorthogonal polynomials in frequency analysis, *Rocky Mountain J. Math.* 33 (2003) 629–645 (with L. Daruis and W. Van Assche).

140. Szegő quadrature and frequency analysis, *Electron. Trans. Numer. Anal.* to appear (with L. Daruis and W. Van Assche).
141. Orthogonal rational functions on the real half line with poles in $[-\infty, 0]$, *J. Comput. Appl. Math.*, to appear (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
142. Orthogonal rational functions on the unit circle: from the scalar to the matrix case, submitted (with A. Bultheel, P. Gonzalez-Vera and E. Hendriksen).
143. Domain of validity of Szegő quadrature formulas, submitted (with J.C. Santos-Leon).

Book

Orthogonal Rational Functions, *Cambridge Monographs on Applied and Computational Mathematics*, Volume 5, Cambridge University Press, 1999.
