Subject Index: Volume 31

Abciximab
Does intracoronary thrombus influence the outcome of high risk percutaneous transluminal coronary angioplasty? Clinical and angiographic outcomes in a large multicenter trial, 31

Ablation procedures
Clinical and electrophysiologic characteristics and long-term efficacy of slow-pathway catheter ablation in patients with spontaneous supraventricular tachycardia and dual atrioventricular node pathways without inducible tachycardia, 855
Comparisons of quality of life and cardiac performance after complete atrioventricular junction ablation and atroventricular junction modification in patients with medically refractory atrial fibrillation, 637
Effects of intracavitary blood flow and electrode-target distance on radiofrequency power required for transient conduction block in a Langendorf-perfused canine model, 231
Percutaneous transluminal septal myocardial ablation in hypertrophic obstructive cardiomyopathy: acute results and 3-month follow-up in 25 patients, 252
Therapeutic options in patients with obstructive hypertrophic cardiomyopathy and severe drug-refractory symptoms (editorial comment), 259

ACC Clinical Competence Statement
Recommendations for the assessment and maintenance of proficiency in coronary interventional procedures: statement of the American College of Cardiology, 722

ACC Expert Consensus Document
Radiation safety in the practice of cardiology, 892

ACC news
ACC chapter contact information, 1213
1998-1999 Board of Governors, 1210
Newly elected members of the College, 914

President’s page: convocation address, 1696
President’s page: looking back ... looking forward, 483
President’s page: time for celebration, 890
President’s page: very strong chain, 718

ACC Policy Statement
Access to cardiovascular care and related issues: Ad Hoc Task Force on Access to Cardiovascular Care, 485
American College of Cardiology Policy Statement on nuclear cardiology services, 720

ACC/AHA Practice Guidelines
ACC/AHA Guidelines for implantation of cardiac pacemakers and antibradycardia devices: a report of the American College of Cardiology/American Heart Association Task Force on Practice Guidelines (Committee on Pacemaker implantation), 1175

Acetycholine
Coronary endothelial dysfunction after Kawasaki disease: evaluation by intracoronary injection of acetycholine, 1074

Acute myocardial infarction
See Myocardial infarction

Adenosine
Coronary vascular responsiveness to adenosine is impaired additively by blockade of nitric oxide synthesis and a sulfonurea, 816
Impact of coronary risk factors on contribution of nitric oxide and adenosine to metabolic coronary vasodilatation in humans, 1274
Lack of adenosine causes myocardial refractoriness, 1134

Adenosine A1 receptor
Prolonging the delayed phase of myocardial protection: repetitive adenosine A1 receptor activation maintains rabbit myocardium in a preconditioned state, 1142

Adhesion molecules
Increased expression of neutrophil and monocyte adhesion molecules LFA-1 and their ligand ICAM-1 and VLA-4 throughout the acute phase of myocardial infarction: possible implications for leukocyte aggregation and microvascular plugging, 120

Adrenergic system
Myocardial dysfunction and adrenergic cardiac innervation in patients with insulin-dependent diabetes mellitus, 404

Age factors
Twenty-four-hour time domain heart rate variability and heart rate: relations to age and gender over nine decades, 593

AHA
See ACC/AHA Practice Guidelines

Alpha-adrenergic blocking agents
Postischemic left ventricular dysfunction is abolished by alpha-adrenergic blocking agents, 992

Alteplase
Clinical experience with primary percutaneous transluminal coronary angioplasty compared with alteplase (recombinant tissue-type plasminogen activator) in patients with acute myocardial infarction: a report from the Second National Registry of Myocardial Infarction (NRMI-2), 1240
Comparative efficacy of a two-hour regimen of streptokinase versus alteplase in acute massive pulmonary embolism: immediate clinical and hemodynamic outcome and one-year follow-up, 1057
Effects of reteplase and alteplase on platelet aggregation and major receptor expression during the first 24 hours of acute myocardial infarction treatment, 1466

Amiodarone
Cost-effectiveness analysis of invasive and noninvasive tests in high risk patients treated with amiodarone after acute myocardial infarction, 1481
Effects of amiodarone and its active metabolite desethylamiodarone on the ventricular defibrillation threshold, 1672

Amyloidosis
Expression of atrial natriuretic and brain natriuretic peptides and their genes in hearts of patients with cardiac amyloidosis, 754

Angina pectoris
See also Syndrome X
Acute coronary syndromes: is a united management strategy emerging? (editorial comment), 103
Alterations of the architecture of subendocardial arterioles in patients with hypertrophic cardiomyopathy and impaired coronary vasodilator reserve: a possible cause for myocardial ischemia, 1089
C-reactive protein is a potent predictor of mortality independently of and in combination with troponin T in acute coronary syndromes: a TIMI IIA substudy, 1460
Clinical value of acute rest technetium-99m tetrofosmin tomographic myocardial perfusion imaging in patients with acute chest pain and nondiagnostic electrocardiograms, 1011
Elevated plasma lipoprotein(a) is associated with coronary artery disease in patients with chronic stable angina pectoris, 1260
Endothelial tissue-type plasminogen activator release in coronary heart disease: transient reduction in endothelial fibrinolytic reserve in patients with unstable angina pectoris or acute myocardial infarction, 547
Peripheral vascular endothelial dysfunction in patients with angina pectoris and normal coronary arteriograms, 541
Protective effect of prodomal angina before myocardial infarction (letter), 1701
Short-term effects of transdermal estrogen replacement therapy on coronary vascular reactivity in postmenopausal women with angina pectoris and normal results on coronary angiograms, 139
Time to positivity of a rapid bedside assay for cardiac-specific troponin T predicts prognosis in acute coronary syndromes: a Thrombolysis in Myocardial Infarction (TIMI) IIA substudy, 326
Trends in quality of care for Medicare beneficiaries admitted to the hospital with unstable angina, 957
Unstable angina: good long-term outcome after a complicated early course, 1534

Angiogenesis
Angiogenesis is enhanced in ischemic canine myocardium by transmyocardial laser revascularization, 1426

Angiography
Intravascular ultrasound predictors of angiographic restenosis in lesions treated with Palmaz-Schatz stent, 43
Intravenous electron-beam computed tomographic coronary angiography for segmental analysis of coronary artery stenoses, 1547
Measuring the effect of risk factors on coronary atherosclerotic coronary calcium score versus angiographic disease severity, 1267
Panoramic coronary angiography, 871
Quantitative coronary angiographic and intravascular ultrasound assessment of a
new nonarticulated stent: report from the Advanced Cardiovascular Systems Multilink Stent Pilot study, 50
Which variable of stent lesions severity best describes the significance of an isolated left anterior descending coronary artery lesion? Correlation between quantitative coronary angiography, intracoronary Doppler measurements and high dose dipyridamole echocardiography, 526

Angioplasty

See also Restenosis

Balloon angioplasty versus new device: intervention clinical outcomes: a comparison of the NHLBI PTCA and NACI registries, 558
Catheter-based intervention: pushing the envelope (editorial comment), 567
Clinical experience with primary percutaneous transluminal coronary angioplasty compared with altepase (recombinant tissue-type plasminogen activator) in patients with acute myocardial infarction: a report from the Second National Registry of Myocardial Infarction (NRMI-2), 1240
Clinical trial comparing primary stenting of the infarct-related artery with optimal primary angioplasty for acute myocardial infarction: results from the Florence Randomized Elective Stenting in Acute Coronary Occlusions (FRESICO) trial, 1234
Cost advantages of an ad hoc angioplasty strategy, 272
Development of interventional cardiology, 64B
Does intracoronary thrombus influence the outcome of high risk percutaneous transluminal coronary angioplasty? Clinical and angiographic outcomes in a large multicenter trial, 31
Effect of high dose verapamil on restenosis after peripheral angioplasty, 1299
Efficacy of coronary stenting versus balloon angioplasty in small coronary arteries, 307
High dose heparin as initial therapy before primary angioplasty for acute myocardial infarction: results of the Heparin in Early Patenty (HEAP) pilot study, 289
Influence of a randomized clinical trial on practice by participating investigators: lessons from the Coronary Angioplasty Versus Excisional Atherectomy Trial (CAVEAT), 265
Long-term follow-up after deferral of percutaneous transluminal coronary angioplasty of intermediate stenosis on the basis of coronary pressure measurement, 841
Modifiable risk factors for vascular access site complications in the IMPACT II trial of angioplasty with versus without eptifibatide, 1518
Multivessel balloon angioplasty should be abandoned in diabetic patients (editorial comment), 20
Outcome of coronary bypass surgery versus coronary angioplasty in diabetic patients with multivessel coronary artery disease, 10
Rescue angioplasty after failed thrombolysis: technical and clinical outcomes in a large thrombolysis trial primary stenting of the
Safety and cost-effectiveness of early discharge after primary angioplasty in low risk patients with acute myocardial infarction, 967
Selective suction and pressure-regulated retroinfusion: an effective and safe approach to retrograde protection against myocardial ischemia in patients undergoing normal and high risk percutaneous transluminal coronary angioplasty, 1525
Systematic direct angioplasty and stent-supported direct angioplasty therapy for cardiogenic shock complicating acute myocardial infarction: in-hospital and long-term survival, 294
Tissue-type plasminogen activator therapy versus primary coronary angioplasty: impact on myocardial tissue perfusion and regional function 1 month after uncomplicated myocardial infarction, 338
Understanding the CAVEAT paradox (editorial comment), 273

Angiotensin-converting enzyme

Angiotensin-converting enzyme gene

Insertion/deletion polymorphism of the angiotensin I-converting enzyme gene is associated with coronary artery plaque calcification as assessed by intravascular ultrasound, 841
Angiotensin-converting enzyme inhibitors

Regression of radial artery wall hypertrophy and improvement of carotid artery compliance after long-term antihypertensive treatment in elderly patients, 1064
Anisotropy

Anisotropic conduction in the triangle of Koch of mammalian hearts: electrophysiologic and anatomic correlations, 629
Antiarrhythmic therapy

Underestimation of coronary artery disease extent and severity by dipyridamole thallium-201 SPECT myocardial perfusion imaging in patients receiving antiarrhythmic therapy, 1540
Antiarrhythmia devices

ACC/AHA Guidelines for implantation of cardiac pacemakers and antiarrhythmia devices: a report of the American College of Cardiology/American Heart Association Task Force on Practice Guidelines (Committee on Pacemaker implantation), 1175
Anticoagulation

Anticoagulation in dilated cardiomyopathy, 745
Antimyosin antibodies

Evaluation of biopsy classification for rejection: relation to detection of myocardial damage by monoclonal antimyosin antibody imaging, 1357
Antioxidants

Antioxidants in Chinese green tea (letter), 1214
Increased oxidative stress in patients with congestive heart failure, 1352
Antiplaete agents

Antiplaete agents and survival: a cohort analysis from the Studies of Left Ventricular Dysfunction (SOLVD) trial, 419
Antithrombotic therapy

Randomized comparison of direct thrombin inhibition versus heparin in conjunction with fibrinolytic therapy for acute myocardial infarction: results from the GUSTO-IB trial, 1493
Aortic valve disease

Flow dependence of valve area in aortic stenosis: relation to valve morphology, 654
Arrhythmias

Effects of epinephrine and phenylephrine on QT interval dispersion in congenital long QT syndrome, 1400
Arrhythmias, ventricular

Arrhythmic cardiac arrest due to isolated coronary artery spasm: long-term outcome of seven resuscitated patients, 57
Arterioles

Alterations of the architecture of subendocardial arterioles in patients with hypertrophic cardiomyopathy and impaired coronary vasodilator reserve: a possible cause for myocardial ischemia, 1089
Ascorbic acid

See Vitamin C

Aspirin

Trends in quality of care for Medicare beneficiaries admitted to the hospital with unstable angina, 957
Warfarin versus aspirin in paroxysmal atrial fibrillation (letter), 1702
Atherectomy

Influence of a randomized clinical trial on practice by participating investigators: lessons from the Coronary Angioplasty Versus Excisional Atherectomy Trial (CAVEAT), 265
Understanding the CAVEAT paradox (editorial comment), 273
Atheroma

Mobile aortic atheroma and systemic emboli: efficacy of anticoagulation and influence of plaque morphology on recurrent stroke, 134
Atherosclerosis

Arterial calcification and not lumen stenosis is highly correlated with atherosclerotic plaque burden in humans: a histologic study of 723 coronary artery segments using nondecalcifying methodology, 126
B-mode ultrasound assessment of pravastatin treatment effect on carotid and femoral artery walls and its correlation with coronary angiographic findings: a report of the Regression Growth Evaluation Statin Study (REGRESS), 1561
Conjugated equine estrogens inhibit progression of atherosclerosis but have no effect on intimal hyperplasia or arterial remodeling induced by balloon catheter injury in monkeys, 1158
Impact of coronary risk factors on contribution of nitric oxide and adenosine to metabolic coronary vasodilatation in humans, 1274
Insertion/deletion polymorphism of the angiotensin I-converting enzyme gene is associated with coronary artery plaque calcification as assessed by intravascular ultrasound, 987
Interactive role of infection, inflammation and traditional risk factors in atherosclerosis and coronary artery disease, 1217
Low plasma ascorbic acid independently predicts the presence of an unstable coronary syndrome, 980
Measuring the effect of risk factors on coronary atherosclerosis: coronary calcium score versus angiographic disease severity, 1267
Mobile aortic atheroma and systemic emboli: efficacy of anticoagulation and influence of plaque morphology on recurrent stroke, 134
Modulation of circulating cellular adhesion molecules in postmenopausal women with coronary artery disease, 1555
Pravastatin has cholesterol-lowering independent...
Atrial fibrillation/flutter
Circadian rhythms of antroventricular conduction properties in chronic atrial fibrillation and without heart failure, 158
Comparisons of quality of life and cardiac performance after complete atroventricular junction ablation and atroventricular junction modification in patients with medically refractory atrial fibrillation, 637
Demonstration of a posterior atrial input to the antroventricular junction during sustained anterograde slow pathway conduction, 1615
Atrial septal defect
Expression of atrial natriuretic factor and dual atrioventricular node pathways without inducible tachycardia, 855
Early recurrences of atrial fibrillation after electrical cardioversion: a result of fibrolytic-induced electrical remodeling of the atria?, 1670
Is pharmacologic cardioversion really preferable to electrical cardioversion of atrial fibrillation? (letter, 1446
Likelihood of spontaneous conversion of atrial fibrillation to sinus rhythm, 588
Role of autonomic tone in facilitating spontaneous onset of typical atrial flutter, 602
Transcatheter echocardiographic correlates of clinical risk of thromboembolism in nonvalvular atrial fibrillation, 1622
Warfarin versus aspirin in paroxysmal atrial fibrillation (letter), 1702
Atrial function
Comparative efficacy of the maze procedure for restoration of atrial contraction in patients with and without giant left atrium associated with mitral valve disease, 1097
Effect of direct current shocks on left atrial mechanical function in patients with structural heart disease, 1395
Atrial input
Demonstration of a posterior atrial input to the antroventricular node during sustained antegrade slow pathway conduction, 1615
Atrial isomerism
Management and outcomes of right atrial isomerism: a 20-year experience, 1120
Atrial natriuretic factor
Expression of atrial natriuretic and brain natriuretic peptides and their genes in hearts of patients with cardiac amyloidosis, 754
Marked elevation of brain natriuretic peptide levels in pericardial fluid is closely associated with left ventricular dysfunction, 399
Atrial pressure–area relation
Assessment of left atrial pressure–area relation in humans by means of retrograde left atrial catheterization and echocardiographic automatic boundary detection: effects of dobutamine, 426
Atrial septal defect
Closure of left atrial septal defects with the Amplatzer occlusion device: preliminary results, 1110
Intermediate-term results of phase I Food and Drug Administration trials of buttoned-device occlusion of secundum atrial septal defects, 674
Transcatheter closure of atrial septal defect: are we there yet? (editorial comment), 1117
Atrial tachycardia
“Cristal tachycardias”: origin of right atrial tachycardias from the crista terminalis identified by intracardiac echocardiography, 451
Atrioventricular junction
Comparisons of quality of life and cardiac performance after complete atroventricular junction ablation and antroventricular junction modification in patients with medically refractory atrial fibrillation, 637
Atrioventricular node
Circadian rhythms of antroventricular conduction properties in chronic atrial fibrillation and without heart failure, 158
Clinical and electrophysiologic characteristics and long-term efficacy of slow-pathway catheter ablation in patients with spontaneous supraventricular tachycardia and dual antroventricular node pathways without inducible tachycardia, 855
Demonstration of a posterior atrial input to the antroventricular node during sustained antegrade slow pathway conduction, 1615
Atrioventricular septal defect
Morphometric analysis of antroventricular septal defect with common valve orifice, 217
Autoimmune disease
Autoimmune-associated congenital heart block: demographic and mortality, morbidity and recurrence rates obtained from a national neonatal lupus registry, 1658
Autonomic nervous system
Gender differences in autonomic and hemodynamic reactions to abrupt coronary occlusion, 301
Role of autonomic tone in facilitating spontaneous onset of typical atrial flutter, 602
Scintigraphic assessment of regionalized defects in myocardial sympathetic innervation and blood flow regulation in diabetic patients with autonomic neuropathy, 1575
Baroreceptors
Differential effect of acute baroreceptor unloading on cardiac and systemic sympathetic tone in congestive heart failure, 583
Baroreflex sensitivity
Assessing baroreflex sensitivity in post-myocardial infarction patients: comparison of spectral and phenylephrine techniques, 344
Reduced cardiopulmonary baroreflex sensitivity in patients with hypertrophic cardiomyopathy, 1377
Beta-adrenergic blocking agents
See also specific agent
Long-term effects of beta-adrenergic blocking agent treatment on hemodynamic function and left ventricular remodeling in rats with experimental myocardial infarction: importance of timing of treatment and infarct size, 692
Beta-adrenergic blocking agents
Combined oral positive inotropic and beta-blocker therapy for treatment of refractory class IV heart failure, 1336
Outcome with calcium channel antagonists after myocardial infarction: a community-based study, 111
Beta-adrenergic blocking agents
Phosphodiesterase inhibitors in refractory heart failure: bridge to beta-blockade? (editorial comment), 1341
Bisoprolol
Long-term effects of beta-adrenergic blocking agent treatment on hemodynamic function and left ventricular remodeling in rats with experimental myocardial infarction: importance of timing of treatment and infarct size, 692
Blood flow
Assessment of diagnostic performance of quantitative flow measurements in normal subjects and patients with angiographically documented coronary artery disease by means of nitrogen-13-ammonia and positron emission tomography, 534
Comparative effects of isoproterenol and dobutamine on myocardial oxygen consumption, blood flow distribution and total body oxygen consumption in conscious lambs with and without an aortopulmonary left to right shunt, 473
Effects of intracavitary blood flow and electrode-target distance on radiofrequency power required for transient conduction block in a Langendorff-perfused canine model, 231
Evaluation of coronary flow velocity dynamics and flow reserve in patients with Kawasaki disease by means of a Doppler guide wire, 833
Flow dynamics of angiographically no-flow patent internal mammary artery grafts, 1049
Long-term follow-up after deferral of percutaneous transluminal coronary angioplasty of intermediate stenosis on the basis of coronary pressure measurement, 841
Nitric oxide inhibition impairs blood flow during exercise in hearts with a collateral-dependent myocardial region, 597
Quantification of mitral regurgitation using the systolic/diastolic pulmonary venous flow velocity ratio, 1383
Scintigraphic assessment of regionalized defects in myocardial sympathetic innervation and blood flow regulation in diabetic patients with autonomic neuropathy, 1575
Tissue-type plasminogen activator therapy versus primary coronary angioplasty: impact on myocardial tissue perfusion and regional function 1 month after uncomplicated myocardial infarction, 338
Books received, 916
Bradykinin
Functional effects of endogenous bradykinin in congestive heart failure, 1679
Brain natriuretic factor
Expression of atrial natriuretic and brain natriuretic peptides and their genes in hearts of patients with cardiac amyloidosis, 754
Marked elevation of brain natriuretic peptide levels in pericardial fluid is closely associated with left ventricular dysfunction, 399
Plasma brain natriuretic peptide levels increase in proportion to the extent of right ventricular dysfuntion in pulmonary hypertension, 202
Bundle branch block
Acute myocardial infarction and complete bundle branch block at hospital admission:
Cardiac catheterization

Electrophysiologic studies
Anisotropic conduction in the triangle of Koch of mammalian hearts: electrophysiologic and anatomic correlations, 629
Clinical and electrophysiologic characteristics and long-term efficacy of slow-pathway catheter ablation in patients with spontaneous supraventricular tachycardia and dual atrioventricular node pathways without inducible tachycardia, 855
Early recurrences of atrial fibrillation after electrical cardioversion: a result of fibrillation-induced electrical remodeling of the atria?, 167
Loss of cardiac magnesium in experimental heart failure prolongs and destabilizes repolarization in dogs, 701
Mechanisms for spontaneous termination of monomorphic sustained ventricular tachycardia: results of activation mapping of reentrant circuits in the epicardial border zone of subacute canine infarcts, 460
Embolism
Anticoagulation in dilated cardiomyopathy, 745
Comparative efficacy of a two-hour regimen of streptokinase versus alteplase in acute massive pulmonary embolism: immediate clinical and hemodynamic outcome and one-year follow-up, 1057
Mobile aortic atheroma and systemic emboli: efficacy of anticoagulation and influence of plaque morphology on recurrent stroke, 134
Noninvasive differential diagnosis between chronic pulmonary thromboembolism and primary pulmonary hypertension by means of Doppler ultrasound measurement, 1367
Transeosophageal echocardiographic correlates of clinical risk of thromboembolism in nonvalvular atrial fibrillation, 1622
Endalpahaprotension
Effect of enalapril on endothelial function in young insulin-dependent diabetic patients: a randomized, double-blind study, 1330
Endocarditis
Echocardiography in Staphylococcus aureus bacteremia (letter), 1443
Endomyocardial biopsy
Evaluation of biopsy classification for rejection: relation to detection of myocardial damage by monoclonal anti-myosin antibody imaging, 1357
Endothelin-1
Handgrip increases endothelin-1 secretion in normotensive young male offspring of hypertensive parents, 1362
Reduced responsiveness to endothelin-1 in peripheral resistance vessels of patients with syndrome X, 1585
Endothelium
Coronary endothelial dysfunction after Kawasaki disease: evaluation by intracoronary injection of acetycholine, 1074
Does lipoprotein(a) impair endothelial function?, 359
Does passive smoking impair endothelium-dependent coronary artery dilation in women?, 811
Effect of enalapril on endothelial function in young insulin-dependent diabetic patients: a randomized, double-blind study, 1330
Heterogeneous vasomotor responses of coronary conduit and resistance vessels in hypertension, 374
Nitric oxide modulation of neutrophil-endothelium interaction: difference between arterial and venous coronary bypass grafts, 823
Peripheral vascular endothelial dysfunction in patients with angina pectoris and normal coronary arteriograms, 341
Short-term effects of transdermal estrogen replacement therapy on coronary vascular reactivity in postmenopausal women with angina pectoris and normal results on coronary angiograms, 139
Vitamin C improves endothelium-dependent vasodilation in patients with insulin-dependent diabetes mellitus, 552
Enzymes
Myonecrosis after revascularization procedures, 241
with fibrinolytic therapy for acute myocardial infarction: results from the GUSTO-Ib trial, 1493
Thrombin generation, inhibition and clinical outcomes in patients with acute myocardial infarction treated with thrombolytic therapy and heparin: results of the GUSTO trial, 497
Trends in quality of care for Medicare beneficiaries admitted to the hospital with unstable angina, 957
Use and effectiveness of intravenous heparin therapy for treatment of acute myocardial infarction in the elderly, 973

Hibernation
Prolonged myocardial hibernation exacerbates cardiomyocyte degeneration and impairs recovery of function after revascularization, 1018

Hirudin
Randomized comparison of direct thrombin inhibition versus heparin in conjunction with fibrinolytic therapy for acute myocardial infarction: results from the GUSTO-Ib trial, 1493

Hospital discharge
Safety and cost-effectiveness of early discharge after primary angioplasty in low risk patients with acute myocardial infarction, 967

Hyperemia
Correlations between hemodynamic changes and tomographic sestamibi imaging during dipyridamole-induced coronary hyperemia, 75
Impaired myocardial vasodilation during hyperemic stress with dipridamole in hypertergidicleremia, 1568

Hypertension
Circadian blood pressure changes and myocardial ischemia in hypertensive patients with coronary artery disease, 1627
Handgrip increases endothelin-1 secretion in normotensive young male offspring of hypertensive parents, 1362
Heterogeneous vasomotor responses of coronary conduit and resistance vessels in hypertension, 374
Homogeneously reduced versus regionally impaired myocardial blood flow in hypertensive patients: two different patterns of myocardial perfusion associated with degree of hypertrophy, 366
Noninvasive differential diagnosis between chronic pulmonary thromboembolism and primary pulmonary hypertension by means of Doppler ultrasound measurement, 1367
Outcome of pulmonary vascular disease and pregnancy: a systematic overview from 1978 to 1996, 1650
Partitioning of pulmonary vascular resistance in primary pulmonary hypertension, 1372
Plasma brain natriuretic peptide levels increase in proportion to the extent of right ventricular dysfunction in pulmonary hypertension, 202
Before predicting survival in children with pulmonary hypertension and congenital heart disease (letter), 1447
Prognostic value of a new electrocardiographic method for diagnosis of left ventricular hypertrophy in essential hypertension, 383
Regression of radial artery wall hypertrophy and improvement of carotid artery compliance after long-term antihypertensive treatment in elderly patients, 1064

Hypertriglyceridemia
Impaired myocardial vasodilation during hyperemic stress with dipridamole in hypertergidicleremia, 1568

Hypertrophy

C-reactive protein is a potent predictor of mortality independently of and in combination with troponin T in acute coronary syndromes: a TIMI IIA substudy, 1460

Case-control study of passive smoking at home and risk of acute myocardial infarction, 797

Clinical experience with primary percutaneous transluminal coronary angioplasty compared with alteplase (recombinant tissue-type plasminogen activator) in patients with acute myocardial infarction: a report from the Second National Registry of Myocardial Infarction (NRMI), 1240

Clinical trial comparing primary stenting of the infarct-related artery with optimal primary angioplasty for acute myocardial infarction: results from the Florence Randomized Elective Stenting in Acute Coronary Occlusions (FRESCO) trial, 1234

Cost-effectiveness analysis of invasive and noninvasive tests in high risk patients treated with amiodarone after acute myocardial infarction, 1481

Cost-effectiveness of tests to assess the risk of sudden death after acute myocardial infarction (editorial comment), 1490

Design and baseline characteristics of the Veterans Affairs Non-Q-Wave Infarction Strategies In-Hospital (VANWISH) trial, 312

Effects of rt-PA and alteplase on platelet aggregation and major receptor expression during the first 24 hours of acute myocardial infarction treatment, 1466

Heparin for acute myocardial infarction: the controversy continues (editorial comment), 964

High dose heparin as initial therapy before primary angioplasty for acute myocardial infarction: results of the Heparin in Early Patency (HEAP) pilot study, 289

Hypothermic, closed circuit pericardio perfusion: a potential cardioprotective technique in acute regional ischemia, 1667

Increased expression of neutrophil and monocyte adhesion molecules LFA-1 and their ligand ICAM-1 and VLA-4 throughout the acute phase of myocardial infarction: possible implications for leukocyte aggregation and microvascular plugging, 120

Influence of collateral circulation on in-hospital death from anterior acute myocardial infarction, 512

Influence of payor on use of invasive cardiac procedures and patient outcome after myocardial infarction in the United States, 1474
Long-term effects of beta-adrenergic blocking agent treatment on hemodynamic function and left ventricular remodeling in rats with experimental myocardial infarction: importance of timing of treatment and infarct size, 692

Myocardial perfusion

Myocardial ischemia

Alterations of the architecture of subendocardial myocardial perfusion: two different patterns of myocardial perfusion associated with degree of hypertrophy, 366

Myocardial reperfusion

See Ischemic preconditioning

Myocardial stillness

Myocardial contractility: a variable of regional myocyte function, 1165

Myocardial velocity gradient

Comparative usefulness of myocardial velocity gradient in detecting ischemic myocardium by a dobutamine challenge, 89

Myocardial viability

Dobutamine magnetic resonance imaging predicts contractile recovery of chronically dysfunctional myocardium after successful revascularization, 1040

Myocardium

Nitric oxide inhibition impairs blood flow during exercise in hearts with a collateral-dependent myocardial region, 67

Myocytes

Prolonged myocardial hibernation exacerbates cardiomyocyte degeneration and impairs recovery of function after revascularization, 1018

Neopterin

Increased neopterin in patients with chronic and acute coronary syndromes (letter), 1215

Neutrophils

Increased expression of neutrophil and monocyte adhesion molecules ICAM-1 and VLA-4 throughout the acute phase of myocardial infarction: possible implications for leukocyte aggregation and microvascular plugging, 120

Nitric oxide

Nitric oxide modulation of neutrophil-endothelium interaction: difference between arterial and venous coronary bypass grafts, 823

Nitrates

Randomized, double-blind, placebo-controlled study of the preventive effect of supplemental oral vitamin C on attenuation of development of nitrate tolerance, 1323

Nitric oxide

Coronary vascular responsiveness to adenosine is impaired additively by blockade of nitric oxide synthesis and a sulfonylurea, 816

Impact of coronary risk factors on contribution of nitric oxide and adenosine to metabolic coronary vasodilation in humans, 1274

Nitric oxide inhibition impairs blood flow during exercise in hearts with a collateral-dependent myocardial region, 67

Nitric oxide modulation of neutrophil-endothelium interaction: difference between arterial and venous coronary bypass grafts, 823

Reduced responsiveness to endothelin-1 in peripheral resistance vessels of patients with syndrome X, 1585

Nitric oxide synthase gene

Association of the missense Glu298Asp variant of the endothelial nitric oxide synthase gene with myocardial infarction, 1506

Nitrogen-13 ammonia

Assessment of diagnostic performance of quantitative flow measurements in normal subjects and patients with angiographically documented coronary artery disease by means of nitrogen-13-ammonia and positron emission tomography, 534

Nitroglycerin

Long-term nitroglycerin treatment is associated with supersensitivity to vasoconstrictors in men with stable coronary artery disease: prevention by concomitant treatment with captopril, 83

Nuclear cardiology

American College of Cardiology Policy Statement on nuclear cardiology services, 720

OCP-18790

Direct myocardial effects of OCP-18790 in human heart failure: beneficial effects on contractile and diastolic function demonstrated by intracoronary infusion with pressure-volume analysis, 1344

Operator volume

Operator volume and outcomes in 12,988 percutaneous coronary interventions, 570

Outcomes

Plasminogen activator
See also Alteplase
Endothelial tissue-type plasminogen activator release in coronary heart disease: transient reduction in endothelial fibrinolytic reserve in patients with unstable angina pectoris or acute myocardial infarction, 547
Randomized comparison of direct thrombin inhibition versus heparin in conjunction with fibrinolytic therapy for acute myocardial infarction: results from the GUSTO-Ib trial, 1493
Tissue-type plasminogen activator therapy versus primary coronary angioplasty: impact on myocardial tissue perfusion and regional function 1 month after uncomplicated myocardial infarction, 338
Platelet
Effects of reteplase and alteplase on platelet aggregation and major receptor expression during the first 24 hours of acute myocardial infarction treatment, 1466
Increased platelet reactivity and circulating monocyte-platelet aggregates in patients with stable coronary artery disease, 352
Positive inotropic agents
Combined oral positive inotropic and beta-blocker therapy for treatment of refractory class IV heart failure, 1336
Practice patterns
Influence of a randomized clinical trial on practice by participating investigators: lessons from the Coronary Angioplasty Versus Excisional Atherectomy Trial (CAVEAT), 265
Pravastatin
B-mode ultrasound assessment of pravastatin treatment effect on carotid and femoral artery walls and its correlation with coronary angiographic findings: a report of the Regression Growth Evaluation Statin Study (REGRESS), 1561
Pravastatin has cholesterol-lowering independent effects on the artery wall of atherosclerotic monkeys, 684
Preconditioning
Energy metabolism after ischemic preconditioning in streptozotocin-induced diabetic rat hearts, 707
Pregnancy
Outcome of pulmonary vascular disease and pregnancy: a systematic overview from 1978 to 1996, 1650
Procaïnamide
Conversion efficacy and safety of intravenous ibutilide compared with intravenous procainamide in patients with atrial flutter or fibrillation, 1414
Prognosis
Assessing prognosis by means of radionuclide perfusion imaging: what technique and which variable should be used? (editorial comment), 1286
Thallium reinfusion versus standard stress/delay redistribution imaging for prediction of cardiac events, 1280
Timeto positivity of a rapid bedside assay for cardiac-specific troponin T predicts prognosis in acute coronary syndromes: a Thrombosis in Myocardial Infarction (TIMI) 11A substudy, 326
Pulmonary artery resistance
Partitioning of pulmonary vascular resistance in primary pulmonary hypertension, 1372
Pulmonary valve disease
Clinical anatomy of the normal pulmonary root compared with that in isolated pulmonary valvular stenosis, 1420
Pulmonary vascular disease
Outcome of pulmonary vascular disease and pregnancy: a systematic overview from 1978 to 1996, 1650
Pulmonary veins
Quantification of mitral regurgitation using the systolic/diastolic pulmonary venous flow velocity ratio, 1383
QT interval
Effects of epinephrine and phenylephrine on QT interval dispersion in congenital long QT syndrome, 1400
QT dispersion as a marker of risk in patients awaiting heart transplantation (letter), 1442
Quality of care
Trends in quality of care for Medicare beneficiaries admitted to the hospital with unstable angina, 957
Quality of life
Comparisons of quality of life and cardiac performance after complete atrioventricular junction ablation and atrioventricular junction modification in patients with medically refractory atrial fibrillation, 637
What is the most important thing in your life? (Editor’s page), 1174
Radial artery
Regression of radial artery wall hypertrophy and improvement of carotid artery compliance after long-term antihypertensive treatment in elderly patients, 1064
Radiation safety
Radiation safety in the practice of cardiology (ACC Expert Consensus Document), 892
Renin-angiotensin system
Long-term nitroglycerin treatment is associated with supersensitivity to vasoconstrictors in men with stable coronary artery disease: prevention by concomitant treatment with captopril, 83
Reperfusion injury

Catheter closure of moderate- to large-sized patent ductus arteriosus using a new Amplatzer duct occluder: immediate and short-term results, 878
Closure of atrial septal defects with the Amplatzer occlusion device: preliminary results, 1110
Double-helix coil for occlusion of large patent ductus arteriosus: evaluation in a chronic lamb model, 677
Intermediate-term results of phase I Food and Drug Administration trials of buttoned-device occlusion of secundum atrial septal defects, 674
Primary arterial switch operation for transposition of the great arteries with intact ventricular septum in infants older than 21 days, 883
Reopening after successful coil occlusion for patent ductus arteriosus, 444
Transcatheter closure of atrial septal defect: are we there yet? (editorial comment), 1117

Surgery, valve
Left ventricular length-force-shortening relations before and after surgical correction of chronic mitral regurgitation, 180

Survival rates
Before predicting survival in children with pulmonary hypertension and congenital heart disease (letter), 1447

Sympathetic nervous system
Differential effect of acute baroreceptor unloading on cardiac and systemic sympathetic tone in congestive heart failure, 583

Syncope
Syncope in patients with an implantable cardioverter-defibrillator: incidence, prediction and implications for driving restrictions, 608

Syndrome X
Reduced responsivity to endothelin-1 in peripheral resistance vessels of patients with syndrome X, 1585
Role of abnormal pain sensitivity and behavioral factors in determining chest pain in syndrome X, 62

Systemic lupus erythematosus
Autoimmune-associated congenital heart block: demographics and mortality, morbidity and recurrence rates obtained from a national neonatal lupus registry, 1658

Systolic function
Antiplatelet agents and survival: a cohort analysis from the Studies of Left Ventricular Dysfunction (SOLVD) trial, 419
Transient ischemia does not limit subsequent ischemic regional dysfunction in humans: a transesophageal echocardiographic study during minimally invasive coronary artery bypass surgery, 1035

Tachycardia
See also Atrial tachycardia; Ventricular tachycardia

Technetium-99m
Clinical value of acute rest technetium-99m tetrofosmin tomographic myocardial perfusion imaging in patients with acute chest pain and nondiagnostic electrocardiograms, 1011
Comparison of Technetium-99m tetrofosmin and thallium-201 single-photon emission computed tomographic imaging for detection of myocardial perfusion defects in patients with coronary artery disease, 331
Correlations between hemodynamic changes and tomographic septalamb imaging during diprydiamole-induced coronary hyperemia, 75

Tetralogy of Fallot
Development of a double-chambered right ventricle after repair of tetralogy of Fallot, 1127

Tetrofosmin
See Technetium-99m

Thallium-201 studies
Assessing prognosis by means of radionuclide perfusion imaging: what technique and which variable should be used? (editorial comment), 1286
Comparison of Technetium-99m tetrofosmin and thallium-201 single-photon emission computed tomographic imaging for detection of myocardial perfusion defects in patients with coronary artery disease, 331
Prognostic value of exercise thallium-201 imaging performed within 2 years of coronary artery bypass graft surgery, 848
Thallium reinjection versus standard stress/delay redistribution imaging for prediction of cardiac events, 1280
Underestimation of coronary artery disease extent and severity by diprydiamole thallium-201 SPEC myocardial perfusion imaging in patients receiving antianginal therapy, 1540

Thrombin
Thrombin generation, inhibition and clinical outcomes in patients with acute myocardial infarction treated with thrombolytic therapy and heparin: results of the GUSTO trial, 497

Thrombocytopenia
Heparin-induced thrombocytopenia, 1449

Thrombolytic therapy
See also specific agent
Acute coronary syndromes: is a united management strategy emerging? (editorial comment), 103
Early noninvasive identification of failed reperfusion after intravenous thrombolytic therapy in acute myocardial infarction, 1499
Prognostic significance of ST segment shift early after resolution of ST elevation in patients with acute inferior myocardial infarction treated with thrombolytic therapy: the GUSTO-Ib ST Segment Monitoring trial, 783
Randomized comparison of direct thrombin inhibition versus heparin in conjunction with fibrinolytic therapy for acute myocardial infarction: results from the GUSTO-Ib trial, 1493
Recurrent ischemia after thrombolysis: importance of associated clinical findings, 94
Rescue angioplasty after failed thrombolysis: technical and clinical outcomes in a large thrombolysis trial, 1511
Significance of ST segment elevations in posterior chest leads (V7 to V9) in patients with acute inferior myocardial infarction: application for thrombolytic therapy, 506
Thrombin generation, inhibition and clinical outcomes in patients with acute myocardial infarction treated with thrombolytic therapy and heparin: results of the GUSTO trial, 497
Thrombolytic therapy and equivalence trials (editorial comment), 494

Thrombus, thrombosis
Does intracoronary thrombus influence the outcome of high risk percutaneous transluminal coronary angioplasty? Clinical and angiographic outcomes in a large multicenter trial, 31
Endothelial tissue-type plasminogen activator release in coronary heart disease: transient reduction in endothelial fibrinolytic reserve in patients with unstable angina pectoris or acute myocardial infarction, 547

Time to therapy
Time to therapy and salvage in myocardial infarction, 1246

Tomography
See also Computed tomography
Assessment of diagnostic performance of quantitative flow measurements in normal subjects and patients with angiographically documented coronary artery disease by means of nitrogen-13-ammonia and positron emission tomography, 534

Transplantation

B-mode ultrasound assessment of pravastatin treatment effect on carotid and femoral artery walls and its correlation with coronary angiographic findings: a report of the Regression Growth Evaluation Statin Study (REGRESS), 1561
Intravascular ultrasound predictors of angiographic restenosis in lesions treated with Palmaz-Schatz stent, 43
Quantitative coronary angiographic and intravascular ultrasound assessment of a new nonarticulated stent: report from the Advanced Cardiovascular Systems Multilink Stent Pilot study, 50

Valve disease
See Aortic valve disease; Mitral valve disease; Surgery, valve

Vascular access site
Modifiable risk factors for vascular access site complications in the IMPACT II trial of angioplasty with versus without eptifibatide, 1518

Vasoconstriction
Long-term nitroglycerin treatment is associated with supersensitivity to vasoconstrictors in men with stable coronary artery disease: prevention by concomitant treatment with captopril, 83
Reduced responsiveness to endothelin-1 in peripheral resistance vessels of patients with syndrome X, 1585

Vasodilation
Does passive smoking impair endothelium-dependent coronary artery dilation in women?, 811

Vasodilator reserve? (letter), 1098
Impact of coronary risk factors on contribution of nitric oxide and adenosine to metabolic coronary vasodilation in humans, 1274
Impaired myocardial vasodilation during hyperemic stress with dipridamole in hypertriglyceridemia, 1568
Peripheral vascular endothelial dysfunction in patients with angina pectoris and normal coronary angiograms, 541
Vitamin C improves endothelium-dependent vasodilation in patients with insulin-dependent diabetes mellitus, 552

Vasomotion
Heterogeneous vasomotor responses of coronary conduit and resistance vessels in hypertension, 374
Short-term effects of transdermal estrogen replacement therapy on coronary vascular reactivity in postmenopausal women with angina pectoris and normal results on coronary angiograms, 139

Vasospasm
Arrhythmic cardiac arrest due to isolated coronary artery spasm: long-term outcome of seven resuscitated patients, 57

Ventricular arhythmias
See Arrhythmias, ventricular

Ventricular fibrillation
Electrocardiographic identification of abnormal ventricular depolarization and repolarization in patients with idiopathic ventricular fibrillation, 1406

Ventricular filling
Restrictive left ventricular filling patterns are predictive of diastolic ventricular interaction in chronic heart failure, 413

Ventricular function
Biphasic response in dobutamine predicts improvement of global left ventricular function after surgical revascularization in patients with stable coronary artery disease: implications of time course of recovery on diagnostic accuracy, 1002
Dobutamine magnetic resonance imaging predicts contractile recovery of chronically dysfunctional myocardium after successful revascularization, 1040
Marked elevation of brain natriuretic peptide levels in pericardial fluid is closely associated with left ventricular dysfunction, 399
Plasma brain natriuretic peptide levels increase in proportion to the extent of right ventricular dysfunction in pulmonary hypertension, 202
Postischemic left ventricular dysfunction is abolished by alpha-adrenergic blocking agents, 992
Prolonged myocardial hibernation exacerbates cardiomyocyte degeneration and impairs recovery of function after revascularization, 1018
Therapeutic options in patients with obstructive hypertrophic cardiomyopathy and severe drug-refractory symptoms (editorial comment), 259
Warfarin anticoagulation and survival: a cohort analysis from the studies of left ventricular dysfunction, 749

Ventricular geometry
Influence of left ventricular geometry patterns on prognosis in patients with or without coronary artery disease, 1635

Ventricular outlet tract obstruction
Morphometric analysis of atriointimal septal defect with common valve orifice, 217

Ventricular septal defect
Primary arterial switch operation for transposition of the great arteries with intact ventricular septum in infants older than 21 days, 883

Ventricular tachycardia
Clinical and electrophysiologic characteristics and long-term efficacy of slow-pathway catheter ablation in patients with spontaneous supraventricular tachycardia and dual atrioventricular node pathways without inducible tachycardia, 855
Mechanisms for spontaneous termination of monomorphic sustained ventricular tachycardia: results of activation mapping of reentrant circuits in the epicardial border zone of subacute canine infarcts, 460
Paroxysmal supraventricular tachycardia in the general population, 150

Ventricular volume
Left ventricular length-force-shortening relations before and after surgical correction of chronic mitral regurgitation, 180

Verapamil
Effect of high dose verapamil on restenosis after peripheral angioplasty, 1299

Viability
See Myocardial viability

Vitamin C
Low plasma ascorbic acid independently predicts the presence of an unstable coronary syndrome, 780
Randomized, double-blind, placebo-controlled study of the preventive effect of supplemental oral vitamin C on attenuation of development of nitrate tolerance, 1323
Vitamin C improves endothelium-dependent vasodilation in patients with insulin-dependent diabetes mellitus, 552

Warfarin
Mobile aortic atheroma and systemic emboli: efficacy of anticoagulation and influence of plaque morphology on recurrent stroke, 134
Warfarin anticoagulation and survival: a cohort analysis from the studies of left ventricular dysfunction, 749
Warfarin versus aspirin in paroxysmal atrial fibrillation (letter), 1702

Weather
Rain in New Spain (California) are not mainly of weather and health, 1439

Withdrawal of care
