
ACC 2004 ANNUAL SESSION HIGHLIGHTS

Highlights of the 53rd Annual Scientific Session of the American College of Cardiology—March 7–10, 2004

Sudhir S. Kushwaha, MD (Mayo Clinic, Rochester, MN)

Thomas M. Bashore, MD, FACC (Duke University Medical Center, Durham, NC)

Bijoy Khandheria, MD, FACC (Mayo Clinic College of Medicine, Rochester, MN)

Robert A. Harrington, MD, FACC (Duke Clinical Research Institute, Duke University Medical Center, Durham, NC)

James J. Ferguson, MD, FACC (St. Luke's Episcopal Hospital, Texas Heart Institute, Baylor College of Medicine, University of Texas Health Science Center at Houston, Houston, TX)

Stephen C. Hammill, MD, FACC (Mayo Clinic, Rochester, MN)

Carl J. Lavie, MD, FACC (Department of Cardiovascular Diseases and Internal Medicine, Ochsner Clinic Foundation, New Orleans, LA)

Daniel J. Murphy, JR, MD (Stanford University Medical Center, Palo Alto, CA)

The 53rd Annual Scientific Sessions of the American College of Cardiology once again presented a large amount of new material, and reviewed the important rapidly evolving areas within cardiovascular medicine. A symposium was held on the last day of the meeting at which the most important and interesting presentations at the sessions were summarized.

This Supplement to the *Journal of the American College of Cardiology* presents the Highlights of the Annual Scientific Sessions as discussed at that symposium. The authors have culled through the original research and structured sessions of the meeting to select the material that they believed would have the greatest impact upon cardiology. We are pleased to provide this as a Supplement to *JACC*.
