(Cell 133, 250–264; April 18, 2008)

In Figure 4B of the above article, the first lane for measuring Zfp296 gene expression was inadvertently deleted when preparing the final figure; this caused a misalignment of this panel with the other panels in the figure. The modified figure below shows the corrected version for Figure 4B. We apologize for any inconvenience caused by this error.
