The Ronald A. Hites Award for an Outstanding Research Publication in JASMS

The Award is given annually for an exemplary paper published in the previous two volumes of the Journal of the American Society for Mass Spectrometry. The Award recognizes a high-quality presentation of outstanding original research. Papers may be nominated by anyone who reads JASMS. Nominations are accepted year-round and should include a nomination letter not to exceed one page. Individuals may submit one nomination letter per year. Nominations should be submitted to the ASMS office as indicated on the ASMS website (http://www.asms.org/). The deadline for nomination for a given year’s award is January 31st of that year. The Award-winning manuscript is selected by a confidential committee. Selection is based on the committee’s judgment of each paper’s innovative aspects, technical quality, likely stimulation of future research, likely impact on future applications, and quality of presentation. Manuscript citations and impact factor may also be considered but are not the major determinants of selection. The corresponding author will receive a personal award of $2000 and all co-authors will receive certificates of commendation. The Award is named in honor of Professor Ronald A. Hites of Indiana University, who led the creation of JASMS in 1988 while president of ASMS. The Award prize is sponsored by the ASMS and is presented at the ASMS Annual Conference.
