Subject Index: Volume 5

Abstracts
Abstracts: abstracts of papers to be presented at the 34th annual scientific session of the American College of Cardiology, Anaheim, California, March 10–14, 1985, 385

Acknowledgment
In appreciation, 1017

Acquired immune deficiency syndrome
Cardiac lesions in acquired immune deficiency syndrome (AIDS), 703

Activation mapping studies
Activation mapping in patients with coronary artery disease with multiple ventricular tachycardia configurations: occurrence and therapeutic implications of widely separate apparent sites of origin, 1075

Adenosine
Effect of adenosine and adenosine-5'-triphosphate on atrioventricular conduction in patients, 1212

Adenosine-5'-triphosphate
Effect of adenosine and adenosine-5'-triphosphate on atrioventricular conduction in patients, 1212

Alpha-adrenergic blockade
Attenuation of coronary vascular resistance by selective alpha-adrenergic blockade in patients with coronary artery disease, 840

American College of Cardiology news
Abstracts: abstracts of papers to be presented at the 34th annual scientific session of the American College of Cardiology, Anaheim, California, March 10–14, 1985, 385
American College of Cardiology extramural programs, 136
Convocation address, 1503
Newly elected members of the college, 803 1985–1986 board of governors, 1015 1985–1986 committee appointments, 1507 President’s page, 1502

Amiodarone
Acute effects of amiodarone on the electrophysiologic properties of isolated neonatal and adult cardiac fibers, 1109
Important differences between short- and long-term hemodynamic effects of amiodarone in patients with chronic ischemic heart disease at rest and during ischemia-induced left ventricular dysfunction, 1205
Pharmacokinetic evaluation of the digoxin-amiodarone interaction, 108

Anemia
Acute hemodynamic effects of increasing hemoglobin concentration in children with a right to left ventricular shunt and relative anemia, 357

Aneurysms
Childhood traumatic infarction causing left ventricular aneurysm: diagnosis by two-dimensional echocardiography, 1478
Rupture of the left sinus of Valsalva aneurysm into the pulmonary artery, 1005
Two-dimensional echocardiographic recognition and repair of subvalvular mitral aneurysm of the left ventricle in an infant, 765
Ventricular septal defect associated with aneurysm of the membranous septum, 118

Angina
Angiographic morphology and the pathogenesis of unstable angina pectoris, 609
Changes in diastolic properties of the regional myocardium during pacing-induced ischemia in human subjects, 399
Effect of nifedipine on coronary hemodynamics in patients with left anterior descending coronary occlusion, 318
Failure of transdermal nitroglycerin to improve exercise capacity in patients with angina pectoris, 1220
Percutaneous transluminal coronary angioplasty for the treatment of variant angina, 1046
A randomized study comparing propranolol and diltiazem in the treatment of unstable angina, 717
Relation and independence of angina pectoris and sudden death in persons with coronary atherosclerotic heart disease, 167B
Variant angina in an 11 year old boy, 761
Why is left ventricular diastolic pressure increased during angina pectoris? (editorial), 607

Angiography
Angiographic morphology and the pathogenesis of unstable angina pectoris, 609
Assessing cardiac anatomy with digital subtraction angiography, 485
Clinical superiority of a new nonionic contrast agent (ipamidol) for cardiac angiography, 250
Coronary angiographic significance of left anterior fascicular block during acute myocardial infarction, 9
Digital subtraction angiography in patients with transposition of the great arteries after surgical repair, 113
Left ventricular function after myocardial infarction: clinical and angiographic correlations, 619

Noninvasive testing in the evaluation of myocardial ischemia: agreement among tests, 59
Prevalence and significance of residual blood flow to the infarct zone during the acute phase of myocardial infarction, 827
Relation of left ventricular function and prognosis in hypertrophic cardiomyopathy: an angiographic study, 1064

Angioplasty
Changes in collateral channel filling immediately after controlled coronary artery occlusion by an angioplasty balloon in human subjects, 587
Comparative cost of myocardial revascularization: percutaneous transluminal angioplasty and coronary artery bypass surgery, 16
Experimental angioplasty: circumferential distribution of laser thermal energy with a laser probe, 934
Intracoronary thrombus: role in coronary occlusion complicating percutaneous transluminal coronary angioplasty, 198
Laser ablation of human atherosclerotic plaque without adjacent tissue injury, 929
Percutaneous transluminal coronary angioplasty for the treatment of variant angina, 1046
Sequence of mechanical, electrocardiographic and clinical effects of repeated coronary artery occlusion in human beings: echocardiographic observations during coronary angioplasty, 193

Antiarrhythmic agents
See also specific agents
Modification of the electrophysiologic matrix by antiarrhythmic drugs, 28B
Sustained symptomatic sinus node reentrant tachycardia: incidence, clinical significance, electrophysiologic observations and the effects of antiarrhythmic agents, 45

Antibodies
Antibodies and digitalis: the modern revolution in the use of an ancient drug, 111A
Measurement of antistreptokinase antibodies (IgG+M), 1500
Treatment of 63 severely digitalis-toxic patients with digoxin-specific antibody fragments, 118A

Aortic coarctation
Left ventricular wall stress and function in childhood coarctation of the aorta, 1161

Aortic valve disease
Idiopathic degeneration of the aortic valve: a
common cause of isolated aortic regurgitation, 347
Noninvasive detection of aortic insufficiency in patients with mitral stenosis by pulsed Doppler echocardiography, 176
Aortico-left ventricular tunnel
Aortico-left ventricular tunnel with ventricular septal defect: two-dimensional/Doppler echocardiographic diagnosis, 757
Aprindine
The utility of aprindine blood levels in the management of ventricular arrhythmias, 738
Argon laser
In vitro effects of argon laser radiation on blood; quantitative and morphologic analysis, 231
Arrhythmias
See also Fibillation, Tachyarrhythmias, Tachycardia, Ventricular Arrhythmias and specific type
Absence of cardioversion-induced ventricular arrhythmias in patients with therapeutic digoxin levels, 882
Ambulatory electrocardiographic correlates of ventricular inducibility during programmed electrical stimulation, 1087
Ambulatory electrocardiographic monitoring: can we predict sudden death?, 13B
Cellular electrophysiology of digitalis toxicity, 22A
Comparative study of encainide and disopyramide in chronic ventricular arrhythmias: a double-blind placebo-controlled crossover study, 1457
Digitalis cardiotoxicity, 91A
Effects of flecainide on the electrophysiologic properties of isolated canine and rabbit myocardial fibers, 303
Encircling endocardial incision interrupts effective vagal-induced prolongation of endocardial and epicardial refractoriness in the dog, 290
Patients with malignant or potentially malignant arrhythmias: opportunities and limitations of drug therapy in prevention of sudden death, 23B
Serial analysis of electrically induced ventricular arrhythmias in a canine model of myocardial infarction, 1095
Sudden death in a pediatric cardiology population, 1958 to 1983: relation to prior arrhythmias, 134B
Supraventricular arrhythmias in children, 122B
The utility of aprindine blood levels in the management of ventricular arrhythmias, 738
Ventricular arrhythmias and sudden death in children, 130B
Aspirin
Effect of high dose aspirin on coronary hemodynamics during pacing-induced myocardial ischemia, 210
Atherosclerosis
Experimental angioplasty: circumferential distribution of laser thermal energy with a laser probe, 934
Laser ablation of human atherosclerotic plaque without adjacent tissue injury, 929
Limitations of postmortem assessment of human coronary artery size and luminal narrowing: differential effects of tissue fixation and processing on vessels with different degrees of atherosclerosis, 342
Relation and independence of angina pectoris and sudden death in persons with coronary atherosclerotic heart disease, 167B
Renovascular disease in the elderly: an analysis of 50 patients, 1232
Role of platelets and thrombosis in coronary atherosclerotic disease and sudden death, 175B
Vaporization of atherosclerotic plaques by spark erosion, 1382
Atrial bigeminy
Mechanism of alternating bundle branch aberrancy with atrial bigeminy; electrocardiographic-electrophysiologic correlates, 1491
Atrial mass
Diaphragmatic hernia mimicking an atrial mass: a two-dimensional echocardiographic pitfall, 922
Atrioventricular bypass tracts
Coexistent posteroapical and right-sided atrioventricular bypass tracts, 640
Electrophysiologic demonstration of concealed conduction in anomalous atrioventricular bypass tracts, 898
Atrioventricular conduction
See also Cardiac conduction
Atrioventricular conduction versus heart size from mouse to whale (editorial), 363
Effect of adenosine and adenosine-5′-triphosphate on atrioventricular conduction in patients, 1212
Role of atrial fibrillation and atrioventricular conduction (including Wolff-Parkinson-White syndrome) in sudden death, 17B
Atrioventricular node function
An “account” of digitalis and atrial fibrillation, 60A
Function of the atrioventricular node considered on the basis of observed histology and fine structure, 770
Laser catheter-induced atrioventricular nodal delays and atrioventricular block in dogs: acute and chronic observations, 259
Mechanisms of verapamil-induced conduction block in anomalous atrioventricular bypass tracts, 311
Atrioventricular valve
Two-dimensional echocardiographic spectrum of univentricular atrioventricular connection, 149
Autonomic nervous system
Digitalis and the autonomic nervous system, 92
Beta-adrenergic blocking agents
See also specific agent
Effects of beta-adrenergic blockade on the natural progression of myocardial infarct size and compensatory hypertrophy, 1132
Esmolol: a new ultrashort-acting beta-adrenergic blocking agent for rapid control of heart rate in postoperative supraventricular tachyarrhythmias, 1451
Long-term treatment with metoprolol after myocardial infarction: effect on 3 year mortality and morbidity, 1428
Regional coronary vasconstriction after combined beta-adrenergic and calcium channel blockade in patients with coronary artery disease, 1438
Bethesda conference reports
14th Bethesda conference report: noninvasive diagnostic instrumentation in the assessment of cardiovascular disease in the young, 1S
15th Bethesda conference: sudden cardiac death, 1B
Blood
In vitro effects of argon laser radiation on blood; quantitative and morphologic analysis, 231
Blood flow
Assessment of aortic blood flow velocities with continuous wave Doppler ultrasound in the neonate and young child, 113S
Assessment of cardiovascular function by digital angiography, 150S
Assessment of hemodynamic function with pulsed Doppler ultrasound, 104S
Carotid sinus reflex control of coronary blood flow in human subjects, 1312
Measurement of regional myocardial blood flow with N-13 ammonia and positron-emission tomography in intact dogs, 92
Positron computed tomography and its applications in the young, 140S
Prevalence and significance of residual blood flow to the infarct zone during the acute phase of myocardial infarction, 827
Regional coronary hemodynamic responses during the cold pressor test: lack of effect of nitroglycerin, 1319
Regional coronary vasconstriction after combined beta-adrenergic and calcium channel blockade in patients with coronary artery disease, 1438
Regional myocardial function is not affected by severe coronary depressurization provided coronary blood flow is maintained, 948
Relation between graded, subcritical impairments of coronary flow reserve and regional myocardial dysfunction induced by atrial pacing in dogs, 1116
Relation of coronary blood flow and reactive hyperemia to regional dysfunction induced by dopamine infusion in dogs: limitations in detecting subcritical coronary stenoses, 664
Blood pressure
See also Hypertension; Interventricular pressure gradient
Bundle branch aberrancy
Mechanism of alternating bundle branch aberrancy with atrial bigeminy;
electrocardiographic-electrophysiologic correlates, 1491

Calcium channel blocking agents
See also specific agent
Regional coronary vasoconstriction after combined beta-adrenergic and calcium channel blockade in patients with coronary artery disease, 1438

Cardiac conduction
See also Atroventricular conduction
Morphologic substrates of sudden death: summary, 81B
Myocardial metabolism: the conduction and cardiac sympathetic systems: metabolic aspects, 157B
Normal variations and pathologic changes in structure of the cardiac conduction system and their functional significance, 71B

Cardiac function
Cardioneuropathy and extracardiac neural disease, 66B
Comparison of magnetic resonance imaging and echocardiography in determination of cardiac dimensions in normal subjects, 1369
Computed tomography of the heart: evaluation of anatomy and function, 55S
Echocardiographic assessment of cardiac function in infants and children, 95S
Global cardiac remodeling after acute myocardial infarction: a study in the rat model, 135S
The heart as a sensory organ, 83B
On the mechanisms underlying cardiac standstill: factors determining success or failure of escape pacemakers in the heart, 35B
Specific techniques for assessing function: introduction, 82S
The stabilizing and unstabilizing influences of neurogenic and vascular activities of the heart as related to sudden cardiac death, 105B
Ultrasonic assessment of cardiac function in the intact human fetus, 84S

Cardiac glycosides
See also Digitalis; Digi­toxin; Digoxin
Cellular mechanism of action of cardiac glycosides, 10A
Digitalis and the autonomic nervous system, 35A
Digitalis cardiotoxicity, 91A
Effects of digitalis on cell biochemistry: sodium pump inhibition, 16A
Effects of digitalis on the normal and the failing heart, 51A
Extracardiac and coronary vascular effects of digitalis, 99A
Factors affecting tolerance to digitalis, 69A
Pharmacokinetic interactions between digoxin and other drugs, 82A
Pharmacokinetics, bioavailability and serum levels of cardiac glycosides, 43A
Role of serum digoxin assay in patient management, 106A

Cardiac neuroanatomy
The heart as a sensory organ, 83B
Neural control of the heart: summary of discussion, 111B

Cardiomyopathies
Cardiomyopathies and their role in sudden death, 185B
Clinical improvement in hypertrophic cardiomyopathy after inferior myocardial infarction, 797
Diagnosis and therapeutic evaluation of a pediatric case of cardiomyopathy using phosphorus-31 nuclear magnetic resonance spectroscopy, 745
Mitrail valve alternans, 1257
Relation of left ventricular function and prognosis in hypertrophic cardiomyopathy: an angiographic study, 1064
Unusual distribution of left ventricular hypertrophy in obstructive hypertrophic cardiomyopathy: localized postero­basal free wall thickening in two patients, 1474

Cardiomyopathy
Cardiomyopathy and extracardiac neural disease, 66B

Cardiovascular function
Assessment of cardiovascular function by digital angiocardiology, 150S

Cardioversion
Absence of cardioversion-induced ventricular arrhythmias in patients with therapeutic digoxin levels, 882
Cardioversion and the digitalized patient (editorial), 889

Carotid artery testing
Assessment of cardiovascular function by electrical ventricular endocardial ablation: a model, 1355
Paroxysmal fascicular tachycardia: sequelae of left ventricular electrical catheterization, 904
Pigtail catheter for extraction of pacemaker lead (letter), 1020
Sequelea of left ventricular electrical endocardial ablation, 956
Is transseptal catheterization necessary? (editorial), 1393
Transvenous atrial tachycardia: electrical and venous catheterization, 999
Underestimation of prosthetic mitral valve areas: role of transseptal catheterization in avoiding unnecessary repeat mitral valve surgery, 1387

Catheterization, laser
Laser catheter-induced atrioventricular nodal function delays and atrioventricular block in dogs: acute and chronic observations, 259
Cold pressor test
Regional coronary hemodynamic responses during the cold pressor test: lack of effect of nitroglycerin, 1319

Computed tomography
Computed tomographic analysis of the effects of hypersmolar mannitol and methylprednisolone on myocardial infarct size, 273
Computed tomography of the heart: evaluation of anatomy and function, 55S
Detection of intrapericardial hematoma after open heart surgery: the roles of echocardiography and computed tomography, 1496
Measurement of regional myocardial blood flow with N-13 ammonia and positron-emission tomography in intact dogs, 92
Positron computed tomography and its applications in the young, 140S

Congenital heart defects
See also Pediatric cardiology
Total correction of tetralogy of Fallot at age 40 years and older: long-term follow-up, 40

Congenital heart disease
See also Pediatric cardiology
Anatomy and function of the heart and intrathoracic vessels in congenital heart disease: evaluation with the Dynamic Spatial Reconstructor, 70S
Assessing cardiac anatomy with digital subtraction angiography, 48S
Echocardiographic techniques for assessing normal and abnormal fetal cardiac anatomy, 20S
Persistent left superior vena cava and right superior vena cava drainage into the left atrium without arterial hypoxemia, 374
Two-dimensional echocardiography in the older child, 375

Congestive heart failure
Alterations in left ventricular function, coronary hemodynamics and myocardial catecholamine balance with MDL 17043, a new inotropic vasodilator agent, in patients with severe heart failure, 326
Cellular mechanism of action of cardiac glycosides, 10A
Comparison of left and right ventricular end-systolic pressure-volume relations in congestive heart failure, 1326
Effect of enalapril, a new angiotensin-converting enzyme inhibitor, in a controlled trial in heart failure, 101
Effects of digitalis on the normal and the failing heart, 51A
Inotropic, vascular and neuroendocrine effects of nifedipine in heart failure: comparison with nitroprusside, 731
MDL 17,043: short- and long-term cardiopulmonary and clinical effects in patients with heart failure, 1422
MDL 17,043 therapy in severe congestive heart failure: characterization of the early and late hemodynamic, pharmacokinetic, hormonal and clinical response, 1414
Relative attenuation of sympathetic drive during exercise in patients with...
Coronary artery dimensions

Limitations and postmortem assessment of human coronary artery size and luminal narrowing: differential effects of tissue fixation and processing on vessels with different degrees of atherosclerosis, 342

Coronary artery disease

Activation mapping in patients with coronary artery disease with multiple ventricular tachycardia configurations: occurrence and therapeutic implications of widely separate apparent sites of origin, 1075

Angiographic morphology and the pathogenesis of unstable angina pectoris, 10

Attenuation of coronary vascular resistance by selective alpha2-adrenergic blockade in patients with coronary artery disease, 840

Detection of coronary artery disease by two-dimensional echocardiography and transesophageal atrial pacing, 1188

Echocardiography in assessing cardiac anatomy: summary and discussion, 44S

Late results of combined mitral valve replacement and coronary bypass surgery, 29

Left ventricular function before and after diltiazem in patients with coronary artery disease, 723

Prognostic value of a coronary artery jeopardy score, 1055

Quantitative split dose thallium-201 imaging with exercise: a technique for obtaining rest and exercise perfusion images in one setting and markedly reducing the study time, 70

Risk factor modification (letter), 383

Value of two-dimensional echocardiography in evaluating coronary artery disease: a randomized blinded analysis, 911

Coronary heart disease

Lessons from epidemiology: summary of general discussion, 155B

Patients with malignant or potentially malignant ventricular arrhythmias: opportunities and limitations of drug therapy in prevention of sudden death, 23B

Validation of exercise-enhanced risk assessment of coronary heart disease events: longitudinal changes in incidence in Seattle community practice, 875

Coronary occlusion

Changes in collateral channel filling immediately after controlled coronary artery occlusion by an angioplasty balloon in human subjects, 587

Effect of nifedipine on coronary hemodynamics in patients with left anterior descending coronary occlusion, 31B

Effect of regional ischemia on the left ventricular end-systolic pressure-volume relation in chronically instrumented dogs, 297

Intra coronary thrombus: role in coronary occlusion complicating percutaneous transluminal coronary angioplasty, 198

Sequence of mechanical, electrocardiographic and clinical effects of repeated coronary artery occlusion in human beings: echocardiographic observations during coronary angioplasty, 193

Thrombolysis with recombinant tissue plasminogen activator in atherosclerotic thrombotic occlusion, 85

Thrombolytic therapy during acute myocardial infarction due to sudden occlusion of the left main coronary artery, 1254

Coronary sinus

Effects of pressure-controlled intermittent coronary sinus occlusion on regional ischemic myocardial function, 939

Correction

Figure legend to title page in Vol. 5, No. 5 (supplement A), 1501

International mexiletine and placebo antiarrhythmic coronary trial: I. report on arrhythmia and other findings (J Am Coll Cardiol 1984;4:1148-63), 384

Counterpulsation

Intraaortic balloon counterpulsation as a temporary support measure in decompensated critical aortic stenosis, 711

D-[6-14C] glucose

Dual carbon-labeled isotope experiments using D-[6-14C] glucose and L-[1,2,3-14C]lactate: a new approach for investigating human myocardial metabolism during ischemia, 1138

Digitals

An "account" of digitals and atrial fibrillation, 60A

Antibodies and digitals: the modern revolution in the use of an ancient drug, 111A

Cardioversion and the digitized patient (editorial), 889

Cellular electrophysiology of digitals toxicity, 22A

Cellular mechanism of action of cardiac glycosides, 10A

Digitals and the autonomic nervous system, 35A

Digitals cardiotoxicity, 91A

Effects of digitals on cell biochemistry: sodium pump inhibition, 16A

Effects of digitals on the normal and the failing heart, 51A

Enhancement of triggered activity in ischemic Purkinje fibers by ouabain: a mechanism of increased susceptibility to digitals toxicity in myocardial infarction, 672

Extracardiac and coronary vascular effects of digitals, 99A

Factors affecting tolerance to digitals, 69A

The foxglove, "the old woman from Shropshire" and William Withering, 3A

Treatment of 63 severely digitalis-toxic patients with digoxin-specific antibody fragments, 118A

William Withering: an account of the foxglove and some of its medical uses 1785-1985: introduction, 1A

Digoxin

Pharmacokinetics, bioavailability and serum levels of cardiac glycosides, 43A

Diltiazem

Left ventricular function before and after diltiazem in patients with coronary artery disease, 723

A randomized study comparing propranolol and diltiazem in the treatment of unstable angina, 717

Disopyramide

Comparative study of encainide and disopyramide in chronic ventricular arrhythmias: a double-blind placebo-controlled crossover study, 1457

Dopamine

Relation of coronary blood flow and reactive hyperemia to regional dysfunction induced by dopamine infusion in dogs: limitations in detecting subcritical coronary stenoses, 664

Doppler ultrasound

Assessment of aortic blood flow velocities with continuous wave Doppler ultrasound in the neonate and young child, 113S

Assessment of hemodynamic function with pulsed Doppler ultrasound, 104S

Resolution and display requirements for ultrasound Doppler/evaluation of the heart in children, infants and the unborn human fetus, 12S

Ultrasonic assessment of cardiac function in the intact human fetus, 84S

Ductus arteriosus

Assessment of the ductus arteriosus in preterm infants utilizing suprasternal two-dimensional/Doppler echocardiography, 973

Dynamic Spatial Reconstructor

Anatomy and function of the heart and intrathoracic vessels in congenital heart disease: evaluation with the Dynamic Spatial Reconstructor, 70S

Echocardiography

Acute infarction, left ventricular thrombus and systemic embolization: an approach to management (editorial), 1281
Aortic-left ventricular tunnel with ventricular septal defect: two-dimensional/Doppler echocardiographic diagnosis, 757

Assessment of the ductus arteriosus in preterm infants, utilizing suprasternal two-dimensional/Doppler echocardiography, 973

‘Atrial systolic notch’ and ‘early diastolic notch’ on the interventricular septal echogram in constrictive pericarditis (letter), 1020

Auscultatory and echocardiographic features of mobile left atrial thrombus, 379

Childhood traumatic infarction causing left ventricular aneurysm: diagnosis by two-dimensional echocardiography, 1478

Comparison of magnetic resonance imaging and echocardiography in determination of cardiac dimensions in normal subjects, 1369

Correlation of two-dimensional echocardiography and pathologic findings in porcine valve dysfunction, 224

Detection of coronary artery disease by two-dimensional echocardiography and transesophageal atrial pacing, 1188

Detection of endocarditis-associated perivalvular abscesses by two-dimensional echocardiography, 647

Detection of intrapericardial hematoma after open heart surgery: the roles of echocardiography and computed tomography, 1496

Diaphragmatic hernia mimicking an atrial mass: a two-dimensional echocardiographic pitfall, 992

Doppler echocardiographic features of ventricular septal rupture in myocardial infarction, 182

Echocardiographic assessment of cardiac function in infants and children, 955

An echocardiographic index for separation of right ventricular volume and pressure overload, 918

Echocardiography in assessing cardiac anatomy: summary and discussion, 445

Echocardiography in the neonate and young infant, 305

Emolic potential of left ventricular thrombus after myocardial infarction: a two-dimensional echocardiographic study of 119 patients, 1276

Exercise systolic blood pressure: a powerful determinant of increased left ventricular mass in patients with hypertension, 1224

Impending paradoxical embolism from atrial thrombus: correct diagnosis by transesophageal echocardiography and prevention by surgery, 1002

Late systolic click from isolated tricuspid valve prolapse simulating paradoxical splitting of the second heart sound, 793

Noninvasive assessment of left and right ventricular filling in myocardial infarction with a two-dimensional Doppler echocardiographic method, 1155

Noninvasive detection of aortic insufficiency in patients with mitral stenosis by pulsed Doppler echocardiography, 176

Postoperative regression of left ventricular dimensions in aortic insufficiency: a long-term echocardiographic study, 856

Prediction of gradients in fibrous subaortic stenosis by continuous wave two-dimensional Doppler echocardiography: animal studies, 1363

Prevalence of mitral valve prolapse in normal children, 1173

Primary cardiac tumors: experience with 30 consecutive patients since the introduction of two-dimensional echocardiography, 1465

Rapid ventricular filling in left ventricular hypertrophy: I. physiologic hypertrophy, 862

Resolution and display requirements for ultrasound Doppler/evaluation of the heart in children, infants and the unborn human fetus, 125

Right heart thrombus: recognition, diagnosis and management, 1239

Seminar on contrast two-dimensional echocardiography: applications and new developments. Part VIII. Generating precision microbubbles for use as an echocardiographic contrast agent, 978

Sequence of mechanical, electrocardiographic and clinical effects of repeated coronary artery occlusion in human beings: echocardiographic observations during coronary angioplasty, 193

Spontaneous echocardiographic contrast and hepatic congestion (letter), 1500

Two-dimensional echocardiographic recognition and repair of subvalvular mitral aneurysm of the left ventricle in an infant, 765

Two-dimensional echocardiographic spectrum of univentricular atrioventricular connection, 149

Two-dimensional echocardiography in cardiac tamponade occurring after cardiac surgery, 1250

Two-dimensional echocardiography in the older child, 375

Unusual distribution of left ventricular hypertrophy in obstructive hypertrophic cardiomyopathy: localized posterobasal free wall thickening in two patients, 1474

Value of two-dimensional echocardiography in evaluating coronary artery disease: a randomized blinded analysis, 911

Echocardiography, fetal

Echocardiographic techniques for assessing normal and abnormal fetal cardiac anatomy, 205

Ultrasound assessment of cardiac function in the intact human fetus, 845

Activation mapping in patients with coronary artery disease with multiple ventricular tachycardia configurations: occurrence and therapeutic implications of widely separate apparent sites of origin, 1075

Electrically induced ventricular tachyarrhythmias in the experimentally infarcted canine model (editorial), 1107

Electrophysiologic effects and clinical efficacy of oral propafenone therapy in patients with ventricular tachycardia, 1407

Importance of pacing site in entrainment of ventricular tachycardia, 781

Improved method for evaluating ventriculotraarial conduction before implantation of atrial-sensing double chamber pacemakers, 1395

Prediction of sudden death and spontaneous ventricular tachycardia in survivors of complicated myocardial infarction: value of the response of programmed stimulation using a maximum of three ventricular extrastimuli, 1292

Significance of inducible tachycardia in patients with syncope of unknown origin: a long-term follow-up, 216

Surgical management of refractory supraventricular tachycardia, 124

Wolff-Parkinson-White syndrome and supraventricular tachycardia during infancy: management and follow-up, 130

**Takayasu’s arteritis**

Severe Takayasu’s arteritis of the pulmonary arteries: report of a case with successful surgical treatment, 369

**Tamponade**

Two-dimensional echocardiography in cardiac tamponade occurring after cardiac surgery, 1250
Tetralogy of Fallot

Total correction of tetralogy of Fallot at age 40, younger and older: long-term follow-up, 40

Thallium-201 myocardial imaging in children, 128S

Acute infarction, left ventricular thrombus and systemic embolization: an approach to management (editorial), 1281

Auscultatory and echocardiographic features of mobile left atrial thrombus, 379

Coronary vasomotion, coronary thrombosis, myocardial infarction and the camel’s back (editorial), 617

Embolic potential of left ventricular thrombus after myocardial infarction: a two-dimensional echocardiographic study of 119 patients, 1276

Fibrinolytic therapy of St. Jude valve thrombosis under guidance of digital cinefluoroscopy, 1244

Impending paradoxical embolism from atrial thrombus: correct diagnosis by transesophageal echocardiography and prevention by surgery, 1002

Intracoronary thrombus: role in coronary occlusion complicating percutaneous transluminal coronary angioplasty, 198

Right heart thrombus: recognition, diagnosis and management, 1239

Scintigraphic evidence of the "no reflow" phenomenon in human beings after coronary thrombolyis, 593

Thrombolysis with recombinant tissue plasminogen activator in atherosclerotic thrombotic occlusion, 85

Tissue plasminogen activator

Thrombolysis with recombinant tissue plasminogen activator in atherosclerotic thrombotic occlusion, 85

Tomography

See Computed tomography

Transient entrainment

Importance of pacing site in entrainment of ventricular tachycardia, 781

Tricuspid valve

Late systolic click from isolated tricuspid valve prolapse simulating paradoxical splitting of the second heart sound, 793

Truncus arteriosus

Truncus arteriosus with single pulmonary artery: influence of pulmonary vascular obstructive disease on early and late operative results, 1168

Trometamol-99m pyrophosphate

Thallium-201 myocardial imaging in children, 128S

Valve disease
