Contents, Volume 24

Number 1

Publisher’s Note ............................................................... 1

HENNECART, F. and PLAGNE, A., On the subgroup generated by a small
doubling binary set .................................................. 5

VINCE, A., Graph recurrence ............................................. 15

TANIMOTO, S., A study of Eulerian numbers by means of an operator on
permutations .............................................................. 33

SHIKARE, M.M. and AZADI, G., Determination of the bases of a splitting
matroid ................................................................. 45

CHANG, G.J. and LU, C., Distance-two labelings of graphs .............. 53

KELAREV, A.V. and PRAEGER, C.E., On transitive Cayley graphs of
groups and semigroups .................................................. 59

BROWN, M.R., DE BEULE, J. and STORME, L., Maximal partial spreads
of $T_2(O)$ and $T_3(O)$ .................................................. 73

VAN DAM, E.R. and FON-DER-FLAASS, D., Codes, graphs, and schemes
from nonlinear functions ............................................... 85

USTIMENKO, V.A. and WOLDAR, A.J., Extremal properties of regular and
affine generalized $m$-gons as tactical configurations .................. 99

TUAN, N.D., A note on block-transitive point-imprimitive designs .... 113

BOWMAN, D., BRADLEY, D.M. and RYOO, J.H., Some multi-set inclu-
sions associated with shuffle convolutions and multiple zeta values . 121

BEDFORD, D., JOHNSON, M. and OLLIS, M.A., Defining sets for Latin
squares given that they are based on groups .......................... 129

Number 2

LUYCKX, D. and THAS, J.A., Derivation of $m$-systems .................. 137

FIORIN, S., A combinatorial study of partial order polytopes ........... 149
