SolarPACES 2013

Table of contents

Preface to the proceedings of the SolarPACES 2013 International Conference
R. Pitchumani

Solar Collectors

Direct steam generation in parabolic trough collectors
M. Alguacil, J. Lohr, C. Prieto, A. Rodriguez

Selective coatings for new concepts of parabolic trough collectors
J. Barriga, H. Cachafeiro, B. Coto, J. Goikoetxea, U. Ruiz de Gopegui

Life cycle cost optimized heliostat size for power towers
K.R. Bhargav, F. Gross, P. Schramek

Advanced CFD&HT numerical modeling of solar tower receivers
G. Colomer, J. Chiva, O. Lehmkuhl, A. Oliva

Heliostat cost reduction – where to now?
J. Coventry, J. Pye

Blue sky cooling for parabolic trough plants
E. du Marchie van Voorthuysen, R. Roes

Study of different cleaning methods for solar reflectors used in CSP plants
A. Fernández-García, R. Aguilar, L. Álvarez-Rodrigo, L. Martínez-Arcos, J.M. Márquez-Payés

Parabolic mirrors for a 100 m-long parabolic trough in Beijing Badaling solar power test plant
X. Fu, B. Gong, Z.F. Wang, E.S. Xu, G.F. Yuan

Optical characterization parameters for line-focusing solar concentrators: Measurement procedures and extended simulation results
P. Horta, T. Osório

</table>
Issues with beam-down concepts
  
L. Vant-Hull

Evaluation of advanced heliostat reflective facets on cost and performance
  
J. Yellowhair, C. Andraka

**Thermal Receivers**

Experimental results of gradual porosity wire mesh absorber for volumetric receivers
  
A. Avila-Marin, M. Alvarez-Lara, J. Fernandez-Reche

Thermal performance of a quartz tube solid particle air receiver
  
F. Bai, Z. Wang, F. Wang, Y. Wang, Y. Zhang, X. Zhang

Solar thermal power system augmented with LHP
  
S. Basha, A. Ambirajan, L. Bansal, S. Basu, P. Kumar, D. Sarma

Experimental and numerical study of the heat transfer characteristics in solar thermal absorber tubes with circumferentially non-uniform heat flux
  
C. Chang, X. Li, Q.Q. Zhang

Alternative designs of a high efficiency, north-facing, solid particle receiver
  
J. Christian, C. Ho

Optimization of solar tower hybrid pressurized air receiver using CFD and mathematical optimization
  
K. Craig, P. Gauche, H. Kretzschmar

Assessment of the overall efficiency of gas turbine-driven CSP plants using small particle solar receivers
  
P. Fernández del Campo, F. Miller

Design space exploration of a 5 MWth small particle solar receiver
  
P. Fernández del Campo, A. Hunt, M. McDowell, F. Miller

Thermal stresses analysis of a circular tube in a central receiver
  
O. Flores, M. García-Villalba, C. Marugán-Cruz, D. Santana

Lab-scale experimentation and CFD modeling of a small particle heat exchange receiver
  
L. Frederickson, M. Dordevich, F. Miller

3-D numerical simulation of heat transfer and turbulent flow in a receiver tube of solar parabolic trough concentrator with louvered twisted-tape inserts
  
S. Ghadiri Jafarbeigloo, M. Yaghoubi, A.H. Zamamian

Towards a commercial parabolic trough CSP system using air as heat transfer fluid
  
P. Good, G. Ambrosetti, M. Barbato, A. Pedretti, A. Steinfeld, G. Zanganeh

Linear Fresnel collector receiver: Heat loss and temperatures
  
A. Heimsath, F. Cuevas, A. Hofer, P. Nitz, W. Platzer
Technology advancements for next generation falling particle receivers

Parametric study of volumetric absorber performance

A. Kribus, C. Caliot, Y. Gray, M. Grijnevitch

Effects of geometry and material properties on the residual stress of glass-to-metal seals in solar receiver tubes

D. Lei, Z. Wang

Numerical simulation on the performance of a combination of external and cavity absorber for solar power plant

Y. Luo, X. Du, Y. Yang, L. Yang

Performance analysis of a novel air-based cavity receiver

P. Matarrese, S. Airaghi, G. Ambrosetti, M. Barbato, A. Gaetano, D. Montorfano, A. Pedretti

High-temperature fluidized receiver for concentrated solar radiation by a beam-down reflector system

K. Matsubara, N. Gokon, C. Hyun Seok, Y. Kazuma, T. Kodama, A. Sakurai, L. Soon-Jae, S. Suzuki, K. Yoshida

Optical analysis and thermal modeling of a window for a small particle solar receiver

A.M. Mecit, F. Miller, A. Whitmore

Ultra-refractory diboride ceramics for solar plant receivers

Optimization of high temperature SiC volumetric solar absorber

S. Mey, C. Caliot, G. Flamant, Y. Gray, A. Kribus

CRS Sales: Abengoa’s molten salt pilot power tower plant celebrates one year of uninterrupted operation

C. Montero, P. Llorente, J. Martinez, R. Navío, M. Romero

A pressurized air receiver for solar-driven gas turbines

P. Pozivil, V. Aga, A. Steinfeld, A. Zagorskiy

New designs of molten-salt tubular-receiver for solar power tower

M.R. Rodríguez-Sánchez, C. Marugán-Cruz, D. Santana, A. Sánchez-González

Dome window and mount design for a 5 MWth solar receiver

E. Saung, F. Miller

Laser induced release of encapsulated noble gas in SCHOTT receiver

O. Sohr, T. Kuckelkorn, M. Möllenhoff

Optical characterization and modeling of coatings intended as high temperature solar selective absorbers

A. Soum-Glaude, M. Bichotte, I. Bousquet, G. Flamant, S. Quoizola, L. Thomas

Strategies enhancing efficiency of cavity receivers

R. Uhlig, R. Flesch, S. Giuliano, B. Gobereit, P. Liedke
Modeling and analysis of stress in high temperature molten salt trough receivers
  N. Viljoen

Proof of concept test of a centrifugal particle receiver
  W. Wu, L. Amsbeck, R. Buck, R. Pitz-Paal, R. Uhlig

Effects of RANS-type turbulence models on the convective heat loss computed by CFD in the solar two power tower
  R. Zanino, R. Bonifetto, J. Christian, C. Ho, L. Savoldi Richard

CFD analysis of a receiving cavity suitable for a novel CSP parabolic trough receiver

A novel CSP receiver based on airlight energy technology - Optimization of the thermal insulation system by means of CFD analysis
  S.A. Zavattoni, G. Ambrosetti, M.C. Barbato, A. Gaetano, D. Montorfano, A. Pedretti

High performance coatings for solar receivers and new dedicated manufacturing solution
  M. Zettl

Transient analysis of a molten salt cavity receiver
  Q. Zhang, C. Chang, X. Li, H. Liu, Z. Wang

**Heat Transfer Fluids**

Impurity influence in physico-chemical and corrosion properties of Chilean solar nitrates
  A.G. Fernandez Diaz-Carralero, H. Galleguillos, M. Grágeda

A new heat transfer fluid for concentrating solar systems: Particle flow in tubes

Liquid metal as a heat transport fluid for thermal solar power applications
  D. Frazer, C. Cionea, P. Hosemann, E. Stergar

Study on solid particles as a thermal medium
  C. Nguyen, S. Abdel-Khalik, H. Al-Ansary, A. Alrished, S. Jeter, D. Sadowski

Liquid metals as efficient coolants for high-intensity point-focus receivers: Implications to the design and performance of nextgeneration CSP systems
  J. Pacio, A. Fritsch, C. Singer, R. Uhlig

Adsorption study of silica gel particle for improvement in design of adsorption beds used in solar driven cooling units
  A. Sanyal, S. Basu, P. Kumar

**Thermal/Thermochemical Energy Storage**

Packed rock bed thermal storage in power plants: Design considerations
  K. Allen, D. Kröger, T. von Backström
100-Wh multi-purpose particle reactor for thermochemical heat storage in concentrating solar power plants
  _S. Alvarez de Miguel, J. González-Aguilar, M. Romero_

Dish Stirling advanced latent storage feasibility
  _C. Andraka_

Comparison of thermocline molten salt storage performances to commercial two-tank configuration
  _G. Angelini, A. Lucchini, G. Manzolini_

A regenerative heat storage system for central receiver technology working with atmospheric air
  _A. Avila-Marin, M. Alvarez-Lara, J. Fernandez-Reche_

Off-eutectic binary salt finite volume method
  _E. Baché, S. Fereres, C. Le Bot, E. Palomo_

Study of thermocline tank performance in dynamic processes and stand-by periods with an analytical function
  _R. Bayón, E. Rivas, E. Rojas_

Numerical modeling of solar thermochemical reactor for kinetic analysis
  _S. Bellan, E. Alonso, J. Gonzalez-Aguilar, C. Perez-Rabago, M. Romero_

Experimental and numerical investigation of stability of packed bed thermal energy storage for CSP power plant
  _A. Bruch, R. Couturier, J.F. Fourmigue, S. Molina_

Evaluation of annual efficiencies of high temperature central receiver concentrated solar power plants with thermal energy storage
  _B. Ehrhart, D. Gill_

Thermochemical cycle of a mixed metal oxide for augmentation of thermal energy storage in solid particles
  _B. Ehrhart, E. Coker, N. Siegel, A. Weimer_

Molten oxide glass materials for thermal energy storage
  _B. Elkin, T. Dyer, L. Finkelstein, J. Raade_

Experimental study of heat loss from a thermal energy storage system for use with a high-temperature falling particle receiver system

An innovative concept of a thermal energy storage system based on a single tank configuration using stratifying molten salts as both heat storage medium and heat transfer fluid, and with an integrated steam generator
  _W. Gaggioli, F. Fabrizi, F. Fontana, L. Rinaldi, P. Tarquini_

A new thermocline-PCM thermal storage concept for CSP plants. Numerical analysis and perspectives
  _P.A. Galione, O. Lehmkuhl, C.D. Pérez-Segarra, J. Rigola, I. Rodríguez_

An evaluation of pressure measurement technology and operating performance using Sandia’s molten salt test loop
  _D. Gill, R. Briggs, W. Kolb_

Characterization of several Moroccan rocks used as filler material for thermal energy storage in CSP power plants
Monolithic ceramic redox materials for thermochemical heat storage applications in CSP plants
  G. Karagiannakis

Dynamic behavior of a sensible-heat based thermal energy storage
  A. Kere, V. Goetz, E. Mercier, R. Olives, X. Py, N. Sadiki

Experimental investigation into a packed bed thermal storage solution for solar gas turbine systems
  P. Klein, T. Roos, T.J. Sheer

Process simulation for solar steam and dry reforming
  S. Kluczka, S. Alexopoulos, J. Eckstein, M. Roeb, C. Vaeßen

Simulation and testing of a latent heat thermal energy storage unit with metallic phase change material
  J. Kotzé, P. Erens, T. von Backström

High-temperature thermal storage system for solar tower power plants with open-volumetric air receiver simulation and energy balancing of a discretized model
  V. Kronhardt, S. Alexopoulos, T. Doerbeck, B. Hoffschildt, M. Hänel, M. Reißel, J. Sattler

Corrosion of iron stainless steels in molten nitrate salt
  A. Kruizinga, D. Gill

Thermochemical energy storage in kW-scale based on CaO/Ca(OH)2
  M. Linder, C. Roßkopf, M. Schmidt, A. Wörner

Development of solid particle thermal energy storage for concentrating solar power plants that use fluidized bed technology
  Z. Ma, G. Glatzmaier, M. Mehos

Using encapsulated phase change salts for concentrated solar power plant
  A. Mathur, R. Kasetty, J. Mendez, k. Nithyanandam, J. Oxley

Numerical simulation of single- and dual-media thermocline tanks for energy storage in concentrating solar power plants
  C. Mira, S.M. Flueckiger, S. Garimella

Thermochemical energy storage by water-splitting via redox reaction of alkali metals
  H. Miyaoka, T. Ichikawa, Y. Kojima

Numerical study of a structured thermocline storage tank using vitrified waste as filler material
  F. Motte, S.L. Bugler-Lamb, Q. Falcoz, X. Py

Design methodology and experimental platform for the validation of PCM storage modules for DSG solar plants
  M. Olcese, R. Couturier, J. Fournigue, P. Garcia, O. Raccour, J. Robin, S. Rougé, B. Senechal, B. Thonon

CFD model of a molten salt tank with integrated steam generator
  E. Rivas, R. Bayón, F. Fabrizi, W. Gaggioli, L. Rinaldi, E. Rojas

Status of the development of a new High Temperature Thermal Energy Storage System (HTTESS) for CSP-power plants
  G. Schneider, H. Maier
Active fluidization storage applications for CSP
  K. Schwaiger, M. Haider

sandTES – An active thermal energy storage system based on the fluidization of powders

Thermal storage concept for solar thermal power plants with direct steam generation
  M. Seitz, P. Cetin, M. Eck

Numerical investigation of a high temperature stratified storage with integrated steam generator
  B. Seubert, T.P. Fluri, W.J. Platzer

Physical properties of solid particle thermal energy storage media for concentrating solar power applications
  N. Siegel, M. Gross, C. Ho, T. Phan, J. Yuan

System analysis and test loop design for the CellFlux storage concept
  W. Steinmann, M. Eck, C. Odenthal

Thermochemical solar energy storage via redox oxides: Materials and reactor/heat exchanger concepts
  S. Tescari, C. Agrafiotis, S. Breuer, M. Neises-von Puttkamer, M. Roeb, C. Sattler, L. de Oliveira

Experimentation of a high temperature thermal energy storage prototype using phase change materials for the thermal protection of a pressurized air solar receiver
  D. Verdier, R. Couturier, Q. Falcoz, A. Ferrière, F. Siros

Coil-wound heat exchangers for molten salt applications
  M. Weikl, K. Braun, J. Weiss

Numerical analysis on the thermal behavior of high temperature latent heat thermal energy storage system
  J. Yang, X. Du, Y. Yang, L. Yang

PCM storage system with integrated active heat pipe
  R. Yogev, A. Kribus

Design of a 100 MWh$_h$ packed-bed thermal energy storage
  G. Zanganeh, M. Barbato, A. Haselbacher, A. Pedretti, A. Steinfeld, S. Zavattoni

Transient behavior of an active indirect two-tank thermal energy storage system during changes in operating mode – An application of an experimentally validated numerical model
  F. Zaversky, D. Astrain, J. Garcia-Barberena, M. Rodriguez-Garcia, M. Sánchez

A design study for regenerator-type heat storage in solar tower plants – Results and conclusions of the HOTSPOT project
  S. Zunft, V. Dreißigacker, M. Hänel, M. Krüger
Power Cycles

Adaptation of a direct steam solar tower plant with molten salt storage for optimum value creation under different incentive schemes

V. Aga, E. Boschek, A. Ehrsam, M. Simiano

Installation and operation of parabolic trough organic Rankine cycle solar thermal power plant in south Louisiana

T.L. Chambers, J.R. Raush, B. Russo

Solar-only parabolic trough plants with high steam parameters

J. Dersch, T. Polklas, C. Tümmers, T. Vogel

Dynamic modeling of concentrated solar power plants with the ThermoSysPro library (Parabolic Trough collectors, Fresnel reflector and Solar-Hybrid)

B. El Hefni

Comparison of CO₂ and steam in transcritical Rankine cycles for concentrated solar power

P. Garg, P. Dutta, P. Kumar, K. Srinivasan

Simulation of a hybrid solar gas-turbine cycle with storage integration

B. Grange, C. Dalet, Q. Falcoz, A. Ferrière, F. Siros

Supercritical CO₂ cycles offer experience curve opportunity to CST in remote area markets

H. Gurgenci

A systematic comparison on power block efficiencies for CSP plants with direct steam generation

T. Hirsch, A. Khenissi

Techno-economic analysis of enhanced dry cooling for CSP

M. Moser, T. Fichter, J. Kern, H. Maier, P. Schicktanz, F. Trieb

A comparison of supercritical carbon dioxide power cycle configurations with an emphasis on CSP applications

T. Neises, C. Turchi

Solar tower-biomass hybrid plants – Maximizing plant performance

J.H. Peterseim, K. Galang, U. Hellwig, J. Landler, A. Tadros, S. White

Advanced hybrid solar tower combined-cycle power plants

J. Spelling, T. Fransson, B. Laumert

Theoretical analysis of the combination of CSP with a biomass CHP-plant using ORC-technology in central europe

R. Sterrer, P. Franz, A. Hammerschmid, S. Schidler, O. Schwandt

Parametric study of supercritical Rankine cycle and earth-air-heat-exchanger for low temperature power generation

R. Vidhi, Y. Goswami, E. Stefanakos

Hybridization of parabolic trough power plants with natural gas

T. Vogel, J. Dersch, K. Görner, G. Oeljeklaus, T. Polklas

Second law analysis of a solar methane reforming system

R. Wegeng, R. Diver, P. Humble

Probabilistic analysis of power tower systems to achieve SunShot goals
   C. Ho, M. Mehos, C. Turchi, M. Wagner

Assessment of direct steam generation technologies for solar thermal augmented steam cycle applications
   C. Libby, R. Bedilion, J. Golden, C. Turchi

On using a gradient-based method for heliostat field layout optimization
   S. Luchman, S. Bode, P. Gauché, A. Groenwold

Design and testing of a novel air-cooled condenser for concentrated solar power plants
   J. Moore, R. Grimes, A. O’Donovan, E. Walsh

The influence of the steam-side characteristics of a modular air-cooled condenser on CSP plant performance
   A. O’Donovan, R. Grimes, J. Moore

A high-temperature, high-efficiency solar thermoelectric generator prototype

Mechatronic platform with 12m² solar thermal concentrator for rural power generation in Africa
   G. Prinsloo, R. Dobson, K. Schreve

Transient simulation of a solar-hybrid tower power plant with open volumetric receiver at the location Barstow
   C. Rau, S. Alexopoulos, G. Breitbach, B. Hoffschmidt, M. Latzke, J. Sattler

Comparison of linear and point focus collectors in solar power plants
   F. Rinaldi, M. Binotti, A. Giostri, G. Manzolini

Dynamic simulations of fresnel solar power plants
   S. Rodat, N. Dupassieux, J.V.D. Souza, S. Thebaul, V. Vuillerme

PSA vertical axis solar furnace SF5
   J. Rodríguez, I. Cañadas, E. Zarza

Molten salt for parabolic trough applications: System simulation and scale effects
   T. Ruegamer, W. Schiel

CSP plant thermal-hydraulic simulation
   V. Russo

Scenarios for a South African CSP peaking system in the short term
   C. Silinga, P. Gauché

Assessment of improved molten salt solar tower plants
   C. Singer, R. Buck, S. Giuliano

eSolar’s modular, scalable molten salt power tower reference plant design
   C. Tyner, D. Wasyluk

Towards holistic power tower system optimization
   G. Weinrebe, M. Balz, V. Göcke, T. Plaz, M. Wöhrbach, F. von Reeken
Numerical simulation of wind loads and wind induced dynamic response of heliostats

Dynamic simulation of a 1MWe concentrated solar power tower plant system with Dymola®

CSP and PV solar tracker optimization tool
  H. Zlatanov, G. Weinrebe

Grid Integration

The role of the direct normal irradiance (DNI) forecasting in the operation of solar concentrating plants
  E.G. Cogliani

The value of CSP with thermal energy storage in the western United States
  P. Denholm, M. Hummon, M. Mehos, Y. Wan

The value of CSP with thermal energy storage in providing grid stability
  J. Forrester

Optimization of thermal energy storage integration strategies for peak power production by concentrating solar power plants
  R. Guedez, T. Fransson, B. Laumert, J. Spelling

Influence of different operation strategies on transient solar thermal power plant simulation models with molten salt as heat transfer fluid
  P.H. Wagner, M. Wittmann

Advanced Manufacturing for CSP

Economic analysis of vacuum transfer tube for conveying working medium of CSP
  M. Bai, Y.N. Niu, E.S. Xu, Y. Xu

Reliability and Service Life Prediction

Accelerated aging of a solar absorber material subjected to highly concentrated solar flux
  A. Boubault, B. Claudet, O. Faugeroux, G. Olalde

Study of the effect of acid atmospheres in solar reflectors durability under accelerated aging conditions
  A. Fernández-García, R. Diaz-Franco, L. Martínez-Arcos, J. Wette

Accelerated lifetime modeling on the basis of wind tunnel analysis and sand storm aging
  C. Holze, A. Brucks

Correlation between solar mirror degradation and colorimetric measurement of protective back layer
  O. Raccurt, C. Bouquet, R. Couturier, C. Delord
Real-time prediction service to improve the reliability of CSP plants
  \textit{I.B. Salbidegoitia}

Comparison and evaluation of accelerated aging tests for reflectors
  \textit{F. Sutter, A. Fernández-García, P. Heller, J. Wette}

Unique challenges in the design and operation philosophy of solar thermal power plants
  \textit{R. Terdalkar, H. Qian, G. Ye}

Dynamic effects of a heliostat to wind loading
  \textit{J.M. Terrés Nicoli, J.P. King, C. Mans}

Geometric modularity in the thermal modeling of solar steam turbines
  \textit{M. Topel, M. Jöcker, B. Laumert, J. Spelling}

The degradation of solar thermal absorption coatings
  \textit{X. Wang, M. Du, L. Hao, L.J. Jiang, X.P. Liu, Q. Yu}

\textbf{Commercial and Demonstration Projects}

Construction of an enclosed trough EOR system in South Oman
  \textit{B. Bierman, R. Burke, W. Lindsay, M. McCormick, J. O’Donnell}

Status and first results of the DUKE project – Component qualification of new receivers and collectors

A typical solar-coal hybrid power plant in China
  \textit{H. Hong, H. Jin, Q. Liu, S. Peng, Y. Zhao}

Utility-scale power tower solar systems: Performance acceptance test guidelines
  \textit{D. Kearney}

City of Medicine Hat concentrating solar thermal demonstration project, Alberta, Canada

District cooling using central tower power plant
  \textit{C. Marugán-Cruz, M.R. Rodríguez-Sánchez, S. Sanchez-Delgado, M. Venegas}

MAINBOT – Mobile robots for inspection and maintenance in extensive industrial plants

Solugas – Operation experience of the first solar hybrid gas turbine system at MW scale
  \textit{M. Quero García, J.A. Brioso, M. Ebert, A.A. Jiménez, R. Korzyntetz, A. del Río}

Ultimate Trough® – A significant step towards cost-competitive CSP
  \textit{K.J. Riffelmann, P. Nava, T. Richert, A. Schweitzer}

India’s first solar thermal parabolic trough pilot power plant
  \textit{A. Sastry Pidaparthi, N. Prasad}
ULTIMATE TROUGH® - Fabrication, erection and commissioning of the world’s largest parabolic trough collector
   A. Schweitzer, M. Birkle, G. Kuhlmann, P. Nava, K. Riffelmann, W. Schiel, A. Wohlfahrt

Policy and Markets

Optimized integration of renewable energies into existing power plant portfolios
   T. Fichter, J. Kern, M. Moser, F. Trieb

National incentive programs for CSP – Lessons learned
   I. Perez, S. Briceño, A. Lopez, J. Relancio

Potential assessment in Mexico for solar process heat applications in food and textile industries
   C. Ramos, J. Beltran, R. Ramirez

Assessment of the impact of financial and fiscal incentives for the development of utility-scale solar energy projects in northern Chile
   J. Servert, E. Cerrajero, M. Cortes, E. Fuentealba

Quality Function Deployment analysis for the selection of four utility-scale solar energy projects in northern Chile
   J. Servert, M. Cortes, E. Fuentealba, A. Labanda, R. Perez

Roadmap for solar energy development in Uzbekistan
   J. Servert, D. Castella, A. Lopez, R. Pérez, C. Tiangco, I. de Loizaga

Solar Fuels

Solar powered steam-methane reformer economics
   D. Brown, J. Mankins, W. Tegrotenhuis, R. Wegeng

Solar demonstration of thermochemical two-step water splitting cycle using CeO$_2$/MPSZ ceramic foam device by 45kW$_\text{th}$ KIER solar furnace

Annual average efficiency of a solar-thermochemical reactor
   I. Ermanoski, N. Siegel

Carbonate molten-salt absorber/reformer: Heating and steam reforming performance of reactor tubes
   N. Gokon, T. Kodama, K. Matsubara, S. Nakamura

Development of a molten salt reactor for solar gasification of biomass
   B. Hathaway, J.H. Davidson, D. Kittelson

Solar hydrogen by high-temperature electrolysis: Flowsheeting and experimental analysis of a tube-type receiver concept for superheated steam production
   A. Houaijia, S. Breuer, C. Brosig, M. Roeb, C. Sattler, J. Säck, D. Thomey
Kinetics of thermal reduction step of thermochemical two-step water splitting using CeO₂ particles: Master-plot method for analyzing non-isothermal experiments
  T. Ishida, N. Gokon, T. Hatamachi, T. Kodama

Thermochemical two-step water splitting cycle using Ni-ferrite and CeO₂ coated ceramic foam devices by concentrated Xe-light radiation
  S. Kawakami, H. Cho, N. Gokon, T. Hatamachi, T. Kodama, T. Myojin

Flux measurement of a new beam-down solar concentrating system in Miyazaki for demonstration of thermochemical water splitting reactors

Thermochemical CO₂ and CO₂/H₂O splitting over NiFe₂O₄ for solar fuels synthesis
  S. Lorentzou, G. Karagiannakis, A.G. Konstandopoulos, C. Pagkoura, A. Zygogianni

Nonstoichiometric perovskite oxides for solar thermochemical H₂ and CO production
  A. McDaniel, A. Ambrosini, W. Chueh, E. Coker, J. Miller, R. O'Hayre, J. Tong

Advancing oxide materials for thermochemical production of solar fuels
  J. Miller, M. Allendorf, A. Ambrosini, E. Coker, A. McDaniel

Initial experimental and theoretical investigation of solar molten media methane cracking for hydrogen production
  D. Paxman, M. Nikoo, G. Ordorica-Garcia, M. Secanell-Gallart, S. Trottier

A combinatorial optimization problem to control a solar reactor
  L. Roca

Status of the solar sulfur ammonia thermochemical hydrogen production system for splitting water

Solar carboreduction of alumina under vacuum
  I. Vishnevetsky, M. Epstein, R. Rubin

**Measurements and Control**

Characterization of high temperature solar thermal selective absorber coatings at operation temperature
  L. Bartelmeß, A. Adibekyan, J. Hollandt, T. Korb, C. Monte, C. Ottermann, O. Sohr

Control design model for a solar tower plant
  D. Faille, S. Liu, Y. Zheng, W. ZhiFeng

Comparison of 3 heat flux gauges and a water calorimeter for concentrated solar irradiance measurement
  E. Guillot, I. Alxneit, J. Ballestrin, J.L. Sans, C. Willsch

Uncertainty analysis of heliostat alignment at the Sandia solar field
  R. Hogan, C. Ho, J. Pye, E. Smith

Dynamic drift compensation for heliostats
  C. Iriarte Cornejo, C. Arancibia Bulnes, R.E. Cabanillas, C.A. Estrada, J. Waissman
Model based open-loop correction of heliostat tracking errors
   K. Malan, P. Gauche

Development and test results of a calorimetric technique for solar thermal testing loops, enabling mass flow and Cp measurements independent from fluid properties of the HTF used
   J. Marchã, M. Collares Pereira, P. Horta, T. Osório

Analysis of parabolic trough concentrator mirror shape accuracy in different measurement setups
   S. Meiser, E. Lüpfert, R. Pitz-Paal, B. Schiricke

A new instrument for measuring the reflectance distribution function of solar reflector materials
   S. Meyen, P. Heller, A. Oschepek, F. Sutter

Upgrading of ENEA solar mirror qualification set-up
   M. Montecchi

Fast, compact and precise reflector panel measurement based on autocollimation principle
   A. Olarra, E. Gomez-Acedo, G. Kortaberria, E. Rodriguez, C. Villasante

Ensuring performance by geometric quality control and specifications for parabolic trough solar fields

Carbon footprint optimization as PLC control strategy in solar power system automation
   G. Prinsloo, R. Dobson, K. Schreve

Using evolutionary algorithm to develop a feed forward control for CSP plant using mid- and long term storages
   D. Schlipf, H. Maier, G. Schneider

Field demonstration of an automated heliostat tracking correction method
   E. Smith, C. Ho

Determination of tracking errors with respect to the geometrical errors based on optimization algorithm
   F. Sun, F. Bai, M. Guo, Z. Wang, Z. Xu

Design and validation of a low-cost high-flux solar simulator using Fresnel lens concentrators
   W. Wang, L. Aichmayer, T. Fransson, B. Laumert

Enhancements in high-resolution slope deviation measurement of solar concentrator mirrors
   C. Weber, H. Koch, S. Ulmer

Water Desalination and Detoxification

Modeling multi effect distillation powered by CSP in TRNSYS
   S. Casimiro, D. Alarcón-Padilla, J. Farinha Mendes, C. Ioakimidis, J. P. Cardoso, C. Turchi

Performance of a 5 kW, solar-only organic Rankine unit coupled to a reverse osmosis plant
   M. Ibarra, D.C. Alarcón-Padilla, J. Blanco, A. Rovira, G. Zaragoza

Solar driven adsorption desalination system
   S. Mitra, P. Dutta, P. Kumar, S. Srinivasa Murthy, K. Srinivasan
Solar Resource Assessment

CSP sites suitability analysis in the eastern region of Morocco
A. Alami Merrouni, A. Mezrhab

Prediction of cloudiness in short time periods using techniques of remote sensing and image processing
J. Alonso Montesinos, F.J. Batlles Garrido, J.I. Burgaleta, G. López, J. Rodríguez, A. Ternero

Beam solar irradiation assessment for Sonora, Mexico
C. Arancibia Bulnes, R.E. Cabanillas, C.A. Estrada, R. Peón Anaya, J.J. Quiñones, D. Riveros Rosas

Ground-measurement GHI map for Qatar
D. Bachour, D. Perez-Astudillo

Potential of concentrating solar power in Canada
R. Djebbar, D. Belanger, D. Boutin, M. Poirier, E. Weterings

Intercomparison of solar maps derived from an ensemble-ANN model and a semi-empirical model for a desert environment
Y. Eissa, G. Bender, H. Ghedira, W. Gustafson, T.B.M.J. Ouarda

Generation of series of high frequency DNI years consistent with annual and monthly long-term averages using measured DNI data
C. Fernández-Peruchena, A. Bernardos, M. Blanco

Long-term behavior, accuracy and drift of LI-200 pyranometers as radiation sensors in Rotating Shadowband Irradiometers (RSI)
N. Geuder, R. Affolter, B. Kraas, S. Wilbert

Comparison of solar power output forecasting performance of the Total Sky Imager and the University of California, San Diego Sky Imager
I. Gohari, C. Chow, M. Ghonima, J. Kleissl, B. Kurtz, D. Nguyen, B. Urquhart, H. Yang

Field experiences with the operation of solar radiation resource assessment stations in India

Estimating solar radiation from MODIS data
G. López, F.J. Batlles

The effect of dust on solar photovoltaic systems
F. Mejia, J. Bosch, J. Kleissl

Assessment of a Global-to-Direct empirical model for the long-term characterization of Direct Normal Insolation
S. Moreno, J.M. Barea-Garcia, I. Lillo-Bravo, E. Pérez-Aparicio, M.A. Silva-Pérez

Atmospheric turbidity forecasting using side-by-side ANFIS
J. Nou, R. Chauvin, S. Grieu, S. Thil, A. Traoré

DNI, GHI and DHI ground measurements in Doha, Qatar
D. Perez Astudillo, D. Bachour
Modeling of irradiance attenuation from a heliostat to the receiver of a solar central tower

Z. Tahboub, A. Oumbe

APOLLO cloud product statistics

E. Wey, M. Schroedter-Homscheidt

Monitoring of mirror and sensor soiling with TraCS for improved quality of ground based irradiance measurements

F. Wolfertstetter, R. Affolter, A. Alami Merrouni, N. Geuder, A. Mezrhab, R. Pitz-Paal, K. Pottler

General Topics in CSP

3D Thermal-structural analysis of an absorber tube of a parabolic trough collector and the effect of tube deflection on optical efficiency

S.M. Akbarimoosavia, M. Yaghoubi

An innovative software for analysis of sun position algorithms

P. Armstrong, M. Izygon

A novel approach to reduce ray tracing simulation times by predicting number or rays

S. Bode, P. Gauché, D. Griffith

Performance analysis of offshore solar power plants

C. Diendorfer, M. Haider, M. Lauermann

Operability, reliability and economic benefits of CSP with thermal energy storage: First year of operation of ANDASOL 3

F. Dinter, D. Mayorga Gonzalez

Advances in CSP simulation technology in the System Advisor Model

A. Dobos, T. Neises, M. Wagner

Performance testing as a means of industrial normalization of CSP technologies

S. Goedeke, M.J. Hale, B. Pastorik

Alternative water resources for utility-scale solar energy development

Analysis of the distribution of measured and synthetic DNI databases and its effect on the expected production of a parabolic trough plant

M.A. Silva-Pérez, J.M. Barea García, M. Larrañeta, I. Lillo-Bravo, S. Moreno Tejera
