Accent Optical Technologies is a leading supplier of process control and measurement tools for the optoelectronics, wireless and silicon semiconductor equipment industries. Accent's systems perform critical functions for high-yield manufacturing and new material development.

For those developing the latest optoelectronics components used in fibre optic and wireless telecommunications, Accent offers a comprehensive suite of process control solutions to ensure that customers' processes run in a tight window – from the starting material, down through all fabrication steps. Accent's optoelectronics systems provide feedback and control for:

- Wavelength
- Implant
- Substrate
- Epi layer
- Impurities
- Lithography

Akzo Nobel High Purity Metalorganics manufactures and sells low-silicon, low-oxygen sources of gallium, indium, aluminum, zinc, antimony and magnesium. Other Metalorganics available on request. Leading products include trimethylgallium, trimethylindium, trimethylaluminum, diethylzinc and triethylgallium for Metal Organic Vapor Deposition (MOCVD), Organometallic Vapor Vase Epitaxy (OMVPE), and Chemical Beam Epitaxy (CBE). We are the only producer of these materials fully back-integrated to the feedstock compounds. We have recently invested in large-scale facilities, using our proprietary processes which give inherent purity advantages without the use of adduct or other additional purification techniques.

Is the Quality of Your  
Products Defined by  
These Characteristics?

- layer thickness  
and density
- surface and interface  
roughness
- chemical composition
- lattice mismatch
- dislocations and defects
- material properties distribution

Then you need the non-destructive  
X-ray analysis solution that supports  
material probing from research and  
development to automated operation  
quality control.

**PROBE YOUR SAMPLES ON THE NANOMETRIC SCALE:  
D8 DISCOVER FOR MATERIAL RESEARCH**

World leaders in the efficient, cost effective removal  
of MOCVD waste gases

We manufacture a range of treatment systems  
that cover the MOCVD waste gases. They have  
long been installed at many important fabs  
worldwide where they have already proved  
their reliability.

We also provide effluent treatment plant,  
epitaxial reactor trap cleaning stations and  
treatment services. Please contact us for  
information.

InPACT is the leading Western InP single crystal manufacturer covering all dopants. We have 12 years manufacturing experience of Indium Phosphide in the forms of polycrystal, 2" and 3" single crystal and epi-ready polished wafers. InPACT is currently in the process of developing a 4" single crystal wafer which will be released commercially early 2002. Dedicated exclusively to InP, our new second plant (70,000 sq ft) will be running end of 2001.

The Right Choice  
The Intelligent Choice

- ◆ Pure-Play Epi Foundry
- ◆ Industry's First "Productions Ready" 4 x 4 inch InP Epi Capabilities
- ◆ Real-time in situ growth sensor technology

We supply the following best-valued epi wafers

GaNAs-based

- PHEMT
- HBT (C-doped, Be-doped)
- MHEMT

InP-based

- HBT (4 x 4), DHBT, SHBT
- HEMT
- RTT, RTD

Opto-electronics

- 980 Pump lasers
- VCSEL
- PIN
- QWIP
- Lasers

# Thin Film Monitoring and Control

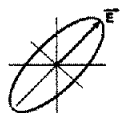

## State-of-the-Art Spectroscopic Ellipsometry

Patented technology measures hundreds of  
wavelengths in a fraction of a second.  
Perfect for in-situ and ex-situ applications.

### Real-time monitoring and control of:

- MBE
- CVD
- PVD
- Annealing
- E-beam evaporation
- Etching (ECR, RIE, etc.)
- Sputter deposition
- Electrochemistry

Web site: http://www.kayex.com

Kayex is the world's leading manufacturer of Czochralski crystal growth systems. The Kayex CG850B is an ideal solution for low pressure LEC GaAs Growth.

The CG850B features in-situ compounding, an automated control system, three-zone heating and a unique pull rod mechanism for high accuracy weighing. It is sized for crystal diameters up to 150mm and crucibles up to 14 inches. It can operate at up to 5 atmospheres. Low pressure LEC is safe and offers excellent stoichiometry control.

## Custom Epitaxial Solutions

QinetiQ offers custom epitaxial growth and characterisation solutions for today's fast-changing environment. We can supply epitaxial layers to stringent specifications, and offer layer design and device fabrication if required.

- Custom wafer growth with no minimum order
- High quality, with 20 years of expertise behind us
- Full in-house characterisation (SIMS, X-ray, CV, Hall, PL)
- GaAs/AlGaAs, InP-based, InSb/InAlSb, GaN/AlGaN, CdTe/HgCdTe, SiGe, dilute nitrides
- MBE, CBE and MOCVD
- Custom device fabrication and assessment
- Layer design and modelling

Tired of unstable flow from solid sources and not satisfied with packing rings or solution alternatives? Then consider the Uni-Flo cylinder with your next purchase of TMI<sub>n</sub>, (Cp)<sub>2</sub>Mg or CBr<sub>4</sub> for stable flow through

90% depletion. If you prefer the purity of solids but don't want the headaches of growing epi wafers from unstable sources, ask for the Uni-Flo cylinder available only through Rohm and Haas Metalorganics.

Contact us today or visit our website at [metalorganics.com](http://metalorganics.com).

**THE UNI-FLO™ CYLINDER**  
(patent pending)

Single Wafer Wet Processing for wafers to 300 mm, reticles and FPDs:  
Processes include double sided cleaning with POU SC-1/SC-2 for 0.1U  
Particle Removal, Coat/Bake Systems with 3% uniformity, Develop Systems  
with < 0.04U CD Uniformity, single wafer wet etch <1% Uniformity and POU  
Chemical Mixing with end point detection, solvent stripping systems with  
immersion and single wafer spray processing, Hermetic Package Sealers  
including Model 2300e Parallel Seam Sealer, Model NTe One Shot Welder and  
Ceramic Lid Tackers. SSEC provides 24/7 Telephone & Web Service, plus on  
site field service in worldwide locations.

# Optoelectronic Products

**Pure Play Foundry Service Provider to the  
Optoelectronic and Telecommunication Industries**

- Dedicated Epitaxial Foundry Service
- 2", 3", 4" and 6" Epi-Wafer Capability
- GaInP/GaAs HBT Wafers
- GaAs & InGaAs PIN Wafers & Photodetectors
- InGaAs/InP APD Epi-Wafers & Die Fabrication Services
- Multi-Junction Solar Cells & Epi-Wafers
- Waveguide Modulator Wafers & Light Emitters

## **Spectrolab Offers:**

- One of the World's Largest MOVPE Facilities
- Device Fabrication Foundry Service
- Optoelectronic Component Packaging Solutions
- Custom Product Development Services
- State-of-the-Art Material Characterization & Device Testing Capabilities

Umicore Electro-Optic Materials is the leading supplier of Ge wafers for electronic and opto-electronic applications. We offer epi-ready Germanium substrates up to 8" with unique crystallographic perfection that are a state-of-the-art solution for epitaxial growth of GaAs or other III-V compounds. At its Semiconductor Processing plant in Boston, Umicore is processing Si, SOI and Ge wafers and offers polishing services for compound semiconductors such as SiC, SiGe, GaP, InP and AlN.
