## CONTENTS OF VOLUME 210

**Number 1, 1 May, 2004**

P. Shvartsman. Barycentric selectors and a Steiner-type point of a convex body in a Banach space .............................................. 1

Pascale Vitse. Functional calculus under the Tadmor–Ritt condition, and free interpolation by polynomials of a given degree .................. 43

E.B. Dynkin. On upper bounds for positive solutions of semilinear equations ................................................................. 73

Waldemar Hebisch, Giancarlo Mauceri, and Stefano Meda. Holomorphy of spectral multipliers of the Ornstein–Uhlenbeck operator ....... 101

Zbigniew Slodkowski and Giuseppe Tomassini. Minimal kernels of weakly complete spaces .................................................. 125

Vegard Lima and Ásvald Lima. Ideals of operators and the metric approximation property .................................................. 148

Lizhong Peng and Genkai Zhang. Tensor products of holomorphic representations and bilinear differential operators .................. 171

André C.M. Ran and Cornelis van der Mee. Perturbation results for exponentially dichotomous operators on general Banach spaces ... 193

Kunyu Guo, Junyun Hu, and Xianmin Xu. Toeplitz algebras, subnormal tuples and rigidity on reproducing $C[z_1,\ldots,z_d]$-modules .... 214

Peter Šemrl. Applying projective geometry to transformations on rank one idempotents .................................................. 248

**Number 2, 15 May, 2004**

O.Yu. Shvedov. Approximations for strongly singular evolution equations .................................................. 259

Nicholas Hanges. Analytic regularity for an operator with Treves curves .................................................. 295

M. Griesemer. Exponential decay and ionization thresholds in non-relativistic quantum electrodynamics .................. 321

Mats Andersson and Johannes Sjöstrand. Functional calculus for non-commuting operators with real spectra via an iterated Cauchy formula .... 341
Chi-Wai Leung and Chi-Keung Ng. Some permanence properties of $C^*$-unique groups ........................................... 376

Augusto C. Ponce. On the distributions of the form $\sum_i (\delta_{p_i} - \delta_{n_i})$ .... 391

Shmuel Friedland and Gaspar Porta. The limit of the product of the parameterized exponentials of two operators ......................... 436

Vlad Bally and Bruno Saussereau. A relative compactness criterion in Wiener–Sobolev spaces and application to semi-linear Stochastic PDEs ......................................................... 465

Author Index for Volume 210 .................................................. 516
