

AUTHOR INDEX

Volume 32 (1980)

- Abbw-Jackson, D., see S. Fisk (1) 19–25
- Astie-Vidal, A., Factor group of the automorphism group of a matroid basis graph with respect to the automorphism group of the matroid (3) 217–224
- Bollobás, B., The distribution of the maximum degree of a random graph (Note) (2) 261–203
- Burns, D., S.F. Kapoor and P.A. Ostrand, Edge cosymmetric graphs (2) 99–103
- D'Antona, O. and J.P.S. King, Coherent orientations and series-parallel networks (Communication) (1) 95–98
- Duffus, D., I. Rival and M. Simonovits, Spanning retracts of a partially ordered set (1) 1–7
- Euler, R., Rank-axiomatic characterizations of independence systems (1) 9–17
- Faudree, R.J., R.H. Schelp and J. Sheehan, Ramsey numbers for matchings (2) 105–123
- Fisk, S., D. Abbw-Jackson and D. Kleitman, Helly-type theorems about sets (1) 19–25
- Flajolet, P., Combinatorial aspects of continued fractions (2) 125–161
- Florence, J.B., Consanguinity graphs (3) 225–228
- Gangopadhyay, T. and S.P. Rao Hebbare, Paths in r -partite self-complementary graphs (3) 229–244
- Gangopadhyay, T. and S.P. Rao Hebbare, r -Partite self-complementary graphs-diameters (3) 245–255
- Godsil, C.D., More odd graph theory (Communication) (2) 205–207
- Goodman, J.E., Proof of a conjecture of Burr, Grünbaum, and Sloane (1) 27–35
- Gupte, R.P., J. Kahn and N. Robertson, On the maximum number of diagonals of a circuit in a graph (1) 37–43
- Hamidoune, Y.O., On critically h -connected simple graphs (3) 257–262
- Hirschfeld, J., A lower bound for Ramsey's theorem (Note) (1) 89–91
- Hwang, F.K., An explicit expression for the cost of a class of Huffman trees (2) 163–165
- Javdekar, M., Characterization of k -variegated graphs, $k \geq 3$ (3) 263–270
- Kahn, J., see R.P. Gupta (1) 37–43
- Kapoor, S.F., see D. Burns (2) 99–103
- King, J.P.S., see O. D'Antona (1) 95–98
- Klarner, D.A., and J. Pollack, Domino tilings of rectangles with fixed width (1) 45–52
- Kleinschmidt, P., A Steinitz-type theorem for the projective plane (1) 53–57
- Kleitman, D., see S. Fisk (1) 19–25
- Laborde, J.M., Sur le cardinal maximum de la base complète d'une fonction booléenne, en fonction du nombre de conjonctions de l'une de ses formes normales (Communication) (2) 209–212
- Lindner, C.C., N.S. Mendelsohn and S.R. Sun, On the construction of Schroeder quasigroups (3) 271–280
- Maehara, H., On time graphs (3) 281–289
- Maurer, S.B., I. Rabinovitch and W.T. Trotter, Jr., A generalization of Turán's theorem to directed graphs (2) 167–189
- Mendelsohn, N.S., see C.C. Lindner (3) 271–280
- Mullen, G.L. and R.E. Weber, Latin cubes of order ≤ 5 (3) 291–297
- Ostrand, P.A., see D. Burns (2) 99–103
- Pollack, J., see D.A. Klarner (1) 45–52
- Preissmann, M., Even polyhedral decompositions of cubic graphs (Communication) (3) 331–334
- Pretzel, O., A construction for partially ordered sets (1) 59–68
- Rabinovitch, I., see S.B. Maurer (2) 167–189
- Rao Hebbare, S.P., see T. Gangopadhyay (3) 229–244

- Rao Heobare, S.G. see T. Gangāpadhyay (3) 245–255
- Reilly, J.W. and S.M. Tanny Counting permutations by successions and other figures (1) 69–76
- Rival, I., see D. Duffus (1) 1–7
- Robertson, N., See R.P. Gupta (1) 37–43
- Roth, A.J. and M. Sobel. A probabilistically attained set of polynomials that generate Stirling numbers of the second kind (1) 77–84
- Schelp, R.H., see R.J. Faudree (2) 105–123
- Schrijver, A., A counterexample to a conjecture of Edmonds and Giles (Communication) (2) 213–214
- Sheehan, J., see R.J. Faudree (2) 105–123
- Simonovits, M., see D. Duffus (1) 1–7
- Sobel, M., see A.J. Roth (1) 77–84
- Stonesifer, J.R., Modularly complemented geometric lattices (1) 85–88
- Sun, S.R., see C.C. Lindner (3) 271–280
- Tany, S.M., see J.W. Reilly (1) 69–76
- Thas, J.A., Partial three-spaces in finite projective spaces (3) 299–322
- Tijdeman, R., The chairman assignment problem (3) 323–330
- Trotter, Jr., W.T. see S.B. Maurer (2) 167–189
