Corrigendum

Corrigendum to “Cyclical strain modulates metalloprotease and matrix gene expression in human tenocytes via activation of TGFβ” [Biochim. Biophys. Acta (2013) 2596–2607]

Eleanor R. Jones*, Gavin C. Jones, Kirsten Legerlotz, Graham P. Riley

Soft Tissue Research Group, School of Biological Sciences, University of East Anglia, Norwich Research Park, Norwich, UK

The authors regret that [Table 2](#) in the article referenced above has a few errors. The corrected table is listed below. The authors would like to apologise for any inconvenience caused.

Table 2

Comparison of changes in gene expression with Strain and TGFβ. Fold changes with strain and TGFβ were calculated compared to controls (non-strained and non treated with TGFβ). Increases in gene expression are represented by +, decreases in gene expression are represented by –.

| | 24 h | | 48 h | |
|----------|------|--------|------|--------|
