

AUTHOR INDEX

Volume 36 (1981)

- Bennett, F.E., Latin squares with pairwise orthogonal conjugates (2) 117–137
Björner, A., On complements in lattices of finite length (Note) (3) 325–326
Breen, M., k -dimensional intersections of convex sets and convex kernels (3) 233–237
Collins, C.B., I.P. Goulden, D.M. Jackson and O.M. Nierstrasz, A combinatorial application of matrix Riccati equations and their q -analogue (2) 139–153
Datta, B.T., Nonexistence of seven-dimensional tangential 2-blocks (1) 1–32
Evans, R.J., On additive partitions of sets of positive integers (3) 239–245
Fanelli, S., An unresolved conjecture on nonmaximal planar graphical sequences (Communication) (1) 109–112
Freeman, J.M. and F. Hoffman, A semigroup and Gaussian polynomials (3) 247–260
Goulden, I.P., see C.B. Collins (2) 139–153
Hoffman, F., see J.M. Freeman (3) 247–260
Jackson, D.M., see C.B. Collins (2) 139–153
Kemp, R., On the average depth of a prefix of the Dycklanguage D_1 (2) 155–170
Kløve, T., The modular n -queen problem II (1) 33–48
Kramer, E.S., S.S. Magliveras and D.M. Mesner, t -designs from the large Mathieu groups (2) 171–190
Lallement, G. and D. Perrin, A graph covering construction of all the finite complete biprefix codes (3) 261–271
Las Vergnas, M., On products of matroids (1) 49–55
Magliveras, S.S., see E.S. Kramer (2) 171–190
Marques de Sá, E., Multiple roots of diagonal multiples of a square matrix (1) 57–67
Marušič, D., On vertex symmetric digraphs (1) 69–81
Mesner, D.M., see E.S. Kramer (2) 171–190
Nierstrasz, O.M., see C.B. Collins (2) 139–153
Owens, P.J., Non-Hamiltonian simple 3-polytopes whose faces are all 5-gons or 7-gons (2) 227–230
Perrin, D., see G. Lallement (3) 261–271
Peterson, D.L., A note on Hamiltonian cycles in bipartite plane cubic maps having connectivity 2 (Note) (3) 327–332
Pisanski, T. and J. Shawe-Taylor, Search for minimal trivalent cycle permutation graphs with girth nine (Communication) (1) 113–115
Prömel, H.J. and B. Voigt, Partition theorems for parameter systems and graphs (1) 83–96
Recski, A., On the sum of matroids, III (3) 273–287
Redelmeier, D.H., Counting polyominoes: yet another attack (2) 191–203
Rogers, D.G., Eplett's identity for renewal arrays (1) 97–102
Shawe-Taylor, J., see T. Pisanski (1) 113–115
Statman, R., Reductions of the graph reconstruction conjecture (Note) (1) 103–107
Takács, L., On the "problème des ménages" (3) 289–297
Tarsi, M., On the decomposition of a graph into stars (3) 299–304
Voigt, B., see H.J. Prömel (1) 83–96
Wachs, M.L., Minimum cost partitions of a rectangle (3) 305–324
Wormald, N.C., Counting unrooted planar maps (2) 205–225
