Subject index to volume 20

Abduction, 20:263
Aggregation operators, 20:191
Agreement, 20:47
Belief functions, 20:79
Boolean algebras, 20:113
Chain graphs, 20:209
Classification, 20:1
Commonsense knowledge, 20:47
Complex arrows, 20:209
Conditional independence, 20:209
Cyclicity, 20:263
Dempster–Shafer theory, 20:79
Density estimation, 20:237
Deontic logic, 20:173
Diagnoses, 20:113
Dynamic logic, 20:173
Dynamic motion planning, 20:145
Eigenvalue method, 20:237
Evidence theory, 20:79
Fuzzy class, 20:237
Fuzzy integral equation, 20:249
Fuzzy integral, 20:249
Fuzzy logic controller, 20:145
Fuzzy logic, 20:1, 47
Fuzzy number, 20:249
Fuzzy Pattern Recognition, 20:1
Fuzzy reasoning, 20:21
Fuzzy rule based classification systems, 20:21
GA-based learning, 20:145
Genetic algorithms, 20:21, 145
Genetic–fuzzy system, 20:145
Graphical models, 20:209
Imprecision, 20:79
Independency models, 20:209
Kernel function, 20:249
Kernel method, 20:237
Linear constraint satisfaction, 20:263
Logic of preference, 20:173
Markov equivalence, 20:209
Membership function, 20:191
Numerical integration, 20:249
OWA operators, 20:191
Pattern classification, 20:79
Possibility theory, 20:173
Probabilistic reasoning, 20:263
Probability of formulas, 20:113
Product spaces, 20:113
Projection pursuit, 20:237
Propositional logic, 20:113
Protected arrows, 20:209
Semantics of fuzzy sets, 20:191
Set theory, 20:47
