SUBJECT INDEX

A
Acanthosis, mitoses occurring in, produced by hormones, 331
Acetyl salicylic acid, experimental specific sensitization to, in guinea pigs, 111
Achorion Schoenleinii, in ringworm of the scalp, 46
Acid-base equilibrium, of skin, and its bacterial flora, relationship between, 317
Allergens, comparison between sensitizing capacities of two different, 505
comparison between two different strengths of same, 505
Allergic processes, in Negro and white, comparison between, 505
Allergy, role of, in production of pruritus ani, 219
Anthralin, in routine treatment of psoriasis, 399
Antigens, extraction of, from molds, 205 studies with, 95, 227
Arsenic, epithelioma attributable to, 365 medication in psoriasis, 399
Arsphenamine, hypersensitiveness, in guinea pigs, 111 sensitiveness, use of Vitamin C in patients with, 81
Arthritis, associated with psoriasis, 399
Asthmatics, (Fur Workers), reactions to skin tests with dyes in, 193
Autohemo, medication in psoriasis, 399

B
Barbital, experimental specific sensitization to, in guinea pigs, 111
Bismuth, gingivitis, prevention of, 135 photometric determination of, in urine, 1
Blister, artificial, in study of eosinophiles, 349 formation, and the Donnan equilibrium, 451

C
Calcium soaps, relation of, to staphylococcal infections in skin, 69
Chrysarobin, in routine treatment of psoriasis, 399

D
Dermacentor variabilis (Say), 249
Dermatitis, contact, (Fur workers), studies with paraphenylenediamine in, 193 artificially induced, in infant, 239 from new synthetic resin fabric finishes, 459 herpetiformis, occurrence of eosinophilia in, 349 postarsphenamine, use of Vitamin C in, 81
Dermatophytes, experimental studies with, 143 extraction of antigen from molds, 205 statistical analysis of spore size in Microsporum, 265
Dermatoses, nutritional, in the rat, 123, 181.
Dermovascular action, of estrogen, 7
Diets, in treatment of psoriasis, 399 Donnan equilibrium, and blister formation, 451
Dust extracts, significance of reactions to intracutaneous tests with, 95
Dyes, reactions to skin tests with, in Asthmatics, 193

521
Dysfunction of sebaceous glands, in pellagra, 23
“Dyssebacia”, in association with pellagra, 23
Dystrophy, hereditary, of hair and nails, 285
Embryo, chick, as medium for spirocheta pallida, 103
Eosinophilia, occurrence of, in dermatitis herpetiformis, 349
Epinephrine, electrophoretic administration of, into human skin, 243
Epitheliomas, arsenical, 365
Erythrocyte, electrolyte content of, in pemphigus, 431
Estrogen, dermovascular action of, 7
Embryo, chick, as medium for spirocheta pallida, 103
Flora, endogenous bacterial, of skin, and its acid-base equilibrium, 317
Gingivitis, bismuth, 135
Grafts, skin, pigment studies in, 482
Hair, hereditary dystrophy of, 285
Hayfever, and pruritus ani, 219
Histamine, electrophoretic administration of, into human skin, 243
Hormones, in treatment of psoriasis, 399
ovarian follicular, 7
producing acanthosis, 331
Hydroquinone, effect of, on oxidase systems, 325
Hypersensitiveness, arsphenamine, 111
cutaneous, to arsphenamines, 81
in guinea pigs, 143
“Id” Reactions, 143
Immunity, development of, in guinea pigs, 143
Infections, fungus, diagnosis and treatment of, 471
staphylococcal, in skin, 69
Irritation, adhesive tape, 295
Krameria, in artificially induced contact-dermatitis, 239
Lipocaic, use of, in treatment of psoriasis, 59
Lymphatic escape, following electrophoresis of histamine and epinephrine, 243
Mapharsen, use of, in patients with postarsphenamine dermatitis, 86
Microsporon audouini, 44
fulvum, 45
lanosum, 44
Microsporum, spore size in, 265
Mitoses, occurring in acanthosis, 331
Molds, extraction of antigen from, 205
Moniliasis, diagnosis and treatment of, 471
Nails, hereditary dystrophy of, 285
Oleoresin, of poison ivy plants, 337
Oxidase systems, effect of hydroquinone on, 325
Oxidation-reduction potential, of skin and other surfaces, 279
Paraphenylenediamine, studies with, in fur workers, 193
Pellagra, sebaceous gland dysfunction in, 23
Pemphigus, electrolyte content of erythrocyte in, 431
Phrynoderma, and pellagra, 24
Photometric determination of bismuth, in urine, 1
Photosensitivity, due to sulfanilamide, 159
Physical therapy, in treatment of psoriasis, 399
Pigment studies, in skin grafts, 000
Poison ivy plant, 337
Poison ivy sensitivity, 175
Postarsphenamine dermatitis, 81
Pruritus ani, 219
Psoriasis, practical management of, 399
use of lipocaic, 59

Q
Quinine, experimental specific sensitization of guinea pigs to, 111

R
Ragweed pollens, extract of, scratch test reactions to, 227
Report of the Executive and Scientific Sessions of The Society for Investigative Dermatology, June 3, 1941, 259
Resin Fabric finishes, dermatitis from, 459
Riboflavin deficiency, in the rat, 181
Ringworm, of scalp, 43

S
Scalp, ringworm of, 43
Scratch tests, with purified extracts of ragweed pollen, 227
Sebaceous glands, dysfunction of, in pellagra, 23
Sensitivity, arsphenamine, 81
eczematous, 175, 505
Sensitization, arsphenamine, 111
Skin, infections, staphylococcal, in, 69
flora, bacterial, of, 317
oxidation-reduction potential of, 279
tests, with dyes, 193
Sodium hexametaphosphate, use of, in bismuth gingivitis, 135
Spirocheta pallida, 103
Sulfanilamide, photosensitivity due to, 159

T
Tars, in treatment of psoriasis, 399
Tick bites, 249
Tinea capitis, 43
Trichophyton violaceum, 46
gypseum, 143

U
Urine, photometric determination of bismuth in, 1
Ultra-violet, in treatment of psoriasis, 399

V
Vaccines, in treatment of psoriasis, 399
Vitamin, deficiency syndrome, in albino rat, 385
deficiency, in "dysebacia", 24
A deficiency, 24
G-complex, 24
C, use of, in cutaneous hypersensitive-ness to arsphenamines, 81
B₄ deficiency, in dermatoses of rat, 123
in treatment of psoriasis, 399

X
X-ray epilation in infectious scalp ringworm, 52
therapy in treatment of psoriasis, 399

Z
Zinc chloride poisoning, chronic, in albino rat, 385
