ERRATUM

In the above mentioned article, on page 962, Figure 6 should appear as follows:

Fig. 6. Histology of dlg0/0 mutant kidneys. Embryonic day (E) E17.5 sections from (A) wild-type, (B) +/dlg0/0, and (C) dlg0/0/dlg0/0 were stained with periodic acid-Schiff (PAS) to distinguish the brush border of proximal tubules. Apart from the reduction in kidney size in the dlg0/0/dlg0/0 embryos all kidneys contained normal branching ureteric epithelial structures, and nephrons at various stages of development (scale bar 50 μm).

The authors and publisher apologize for the error.
FOR SUBMISSION OF MANUSCRIPTS AND ANNOUNCEMENTS

Manuscripts must be submitted online to the Kidney International Web site (http://ki.manuscriptcentral.com). All related editorial correspondence should be submitted to:

Saulo Klahr, M.D.
Editor, Kidney International
Washington University School of Medicine
at Barnes-Jewish Hospital (North Campus)
