EUROPEAN JOURNAL OF VASCULAR AND ENDOVASCULAR SURGERY

Volume Contents and Index to Volume 13
Volume 13 Contents
Number 1, January 1997

EDITORIAL

European Journal of Vascular and Endovascular Surgery in Healthy Shape, D. Bergqvist ........ 1

REVIEW ARTICLES

Factors Influencing the Long-term Results of Abdominal Aortic Aneurysm Repair, G. Geroulakos, J. S. P. Lumley and J. G. Wright ................................................................. 3

Quality of Life Assessment in Vascular Disease: Towards a Consensus, D. K. Beattie, J. Golledge, R. M. Greenhalgh and A. H. Davies ......................................................... 9

ORIGINAL ARTICLES

Falling Incidence of Amputations for Peripheral Occlusive Arterial Disease in Western Australia between 1980 and 1992, E. Mattes, P. E. Norman and K. Jamrozik ................................................. 14

Static Elastic Wall Properties of the Abdominal Porcine Aorta in vitro and in vivo, J. H. Storkholm, O. Freert and H. Gregersen ................................................................. 31

The Predictive Value of Laser Doppler Fluxmetry and Transcutaneous Oximetry for Clinical Outcome in Patients Undergoing Revascularisation for Severe Leg Ischaemia, S. A. Ray, T. M. Buckenham, A.-M. Belli, R. S. Taylor and J. A. Dormandy ................................................................. 54

Growth Factors and Myointimal Hyperplasia in Experimental Aortic Allografts, B. Randone, A. V. Sterpetti, F. Stipa, P. Proietti, C. Aromatario, M. B. Guglielmi, M. Palestini, L. Santoro-D'Angelo, A. Cavallaro and A. Cucina ................................................................. 66

ENDOVASCULAR AND SURGICAL TECHNIQUES

Aneurysm Pressure following Endovascular Exclusion, T. Chuter, K. Ivancev, M. Malina, T. Resch, J. Brunkwall, B. Lindblad and B. Risberg ................................................................. 85

CASE REPORT

Treatment of an Aneurysm of the Coeliac Axis by Transluminal Steel Wire Occlusion, M. Rengo, V. Terrinoni, A. Lamazza, A. Cosimati and G. Bianchi ................................................................. 88

FORTHCOMING EVENTS

.................................................................................................................................................. 91
EDITORIAL

LEADING ARTICLES
Underutilisation of Duplex Scanning for the Assessment of Lower Extremity Arterial Disease, D. A. Legemate ........................................................................................................................................ 96
Surgical Treatment of Deep Venous Reflux, B. Gloor and J. Largiader ....................................................... 98

REVIEW ARTICLES

ORIGINAL ARTICLES
Comparison between Clinical Examination, cw-Doppler Ultrasound and Colour-duplex Sonography in the Diagnosis of Incompetent Perforating Veins, R. Schultheiss, M. Billeter, A. Bollinger and U. K. Franzeck ............................................................................................................................................. 122
Bacterial and Clinical Criteria Relating to the Outcome of Patients Undergoing in situ Replacements of Infected Abdominal Aortic Grafts, F. Speziale, L. Rizzo, E. Sbarigia, M. F. Giannoni, M. Massucci, C. Maraglino, E. Santoro and P. Fiorani ........................................................................................................................................ 127
Early Vein Bypass Thrombectomy is Associated with an Increased Risk of Graft Related Stenoses, T. G. Nielsen, L. P. Jensen and T. V. Schroeder ........................................................................................................................................... 134
Comparative Results of Early and Delayed Cannulation of Arteriovenous Graft in Haemodialysis, V. S. Sottiurai, A. Stephens, L. Champagne, P. Moradshagi, D. Frey and E. Reisin ........................................................................................................................................ 139
Improved Reliability of Ultra-sonic Surveillance of Abdominal Aortic Aneurysms, T. Länne, T. Sandgren, P. Mangell, B. Sonesson and F. Hansen ........................................................................................................................................ 149
District Hospital Management and Outcome of Critical Lower Limb Ischaemia: Comparison with National Figures, J. Holdsworth .................................................................................................................................. 159
Results and Resource Implications of Treating End-stage Limb Ischaemia, R. J. Holdsworth and P. T. McCollum .............................................................................................................................................. 164
The Measurement of Internal Carotid Artery Stenosis: Comparison of Duplex with Digital Subtraction Angiography, T. S. Padayachee, T. C. S. Cox, K. B. Modaresi, A. C. F. Colchester and P. R. Taylor ........................................................................................................................................ 180
Role of Infrainguinal Bypass in Buerger’s Disease: An Eighteen-year Experience, T. Sasajima, Y. Kubo, M. Inaba, K. Goh and N. Azuma ........................................................................................................................................... 186

ENDOVASCULAR AND SURGICAL TECHNIQUES
Importance of Plain X-ray in Endoluminal Aortic Graft Surveillance, J. May, G. H. White, W. Yu and K. Sieunarine ........................................................................................................................................... 202
The Effect of Endovascular Aortic Stents Placed Across the Renal Arteries, M. Malina, M. Lindh, K. Ivancev, B. Frennbly, B. Lindblad and J. Brunkwall ............................................................. 207

The Proximal Carotid Vertebral Bypass, H. Scholz, R. Rücket and U. Settmacher .................................. 214

Successful Stenting of Subclavian Artery Thrombus with Intra-arterial Thrombolysis, B. J. Ammon, M. Madan, P. M. Chennells, R. C. Fowler and S. Homer-Vanniasinkam .................................... 217

CASE REPORTS

Large Iliac Venous Aneurysm simulating a Retroperitoneal Soft Tissue Tumour, M. Petrunić, Z. Kružić, I. Tonković, V. Augustin, Z. Fiolić and N. Protrka ................................................................. 221

Peripheral Arterial Thrombosis in Two Young Men Using Anabolic Steroids, M. Falkenberg, J. Karlsson and P. Örtenwall .................................................................................................................. 223

Acute Splanchnic Venous Thrombosis: Surgical and Medical Treatment with Special Emphasis on New Aspects of Coagulation Disorders, R. H. Geelkerken, S. C. Cannegieter, H. Bouter and J. H. van Bockel ........................................................................................................................................ 227

Fatal Haemoptysis due to Pulmonary Artery Aneurysm in Behçet’s Disease, C. Gebitekin, M. Yılmaz, İ. Şenkaya, D. Saba, K. Sağdıç and G. Özer ........................................................................ 233

Candida albicans Mycotic Abdominal Aortic Aneurysm, M. C. Barry, N. Jackson, D. Adeboysku, T. Tran, I. McNeil and P. A. Grace ........................................................................................................ 237

Arteriovenous Fistula and Pseudoaneurysm Formation following Heel Endoscopy, S. P. O’Brien, E. J. Simoni, K. M. Jain and J. S. Munn ......................................................................................... 240

Hyperextension Injury Causing Abdominal Aortic Rupture, A. A. Almeida, G. M. Frydman and P. J. Walker ........................................................................................................................................ 247

SPECIAL ANNOUNCEMENT .................................................................................................................. 249

BOOK REVIEWS ...................................................................................................................................... 251

CORRESPONDENCE .................................................................................................................................. 253

ERRATUM .................................................................................................................................................. 258

FORTHCOMING EVENTS .......................................................................................................................... 259

Number 3, March 1997

HISTORICAL NOTE

ORIGINAL ARTICLES

Blood Flow Rate during Orthostatic Pressure Changes in the Pulp Skin of the First Toe, M. Midttun, P. Sejrsen and W. P. Paaske ................................................................................................. 278
Hypertonic Saline Infusion with or without Dextran 70 in the Reperfusion Phase of Experimental Acute Limb Ischaemia, L. M. Waagstein, L. Jivegård and H. Haljamae ................................................................. 285

A Comparative Study of Treadmill Tests and Heel Raising Exercise for Peripheral Arterial Disease, M. M. R. Amirhamzeh, H. J. Chant, J. L. Rees, L. J. Hands, R. J. Powell and W. B. Campbell ................................................................. 301

A Prospective Study of Limb-threatening Ischaemia and its Surgical Treatment on the Quality of Life, B. F. Johnson, S. Singh, L. Evans, R. Drury, D. Datta and J. D. Beard ................................................................. 306

Indications for Arterial Reconstruction and Major Amputation in the Management of Chronic Critical Lower Limb Ischaemia, J. P. Pell, F. G. R. Fowkes and A. J. Lee on behalf of the Scottish and Northern Vascular Audit Groups ................................................................. 315

ENDOVASCULAR AND SURGICAL TECHNIQUES

Endovascular Repair of an Inflammatory Aortic Aneurysm, J. R. Boyle, M. M. Thompson, A. Nasim, R. D. Sayers, M. Holmes and P. R. F. Bell ................................................................. 328

Venous Stents in Chronic Iliac Vein Occlusions, H. Åkesson, M. Lindh, K. Ivancev and B. Risberg ................................................................. 334

CASE REPORT

Replacement of the Abdominal Aorta in a Young Patient with Neurofibromatosis and Massive Retroperitoneal Haemorrhage, P. Wigger, P. Stierli and B. Stamm ................................................................. 337

BOOK REVIEWS ........................................................................................................................................ 340

CORRESPONDENCE ........................................................................................................................................ 342

FORTHCOMING EVENTS ........................................................................................................................................ 343

Number 4, April 1997

REVIEW ARTICLE

A Systematic Review of the Randomised Trials of Carotid Patch Angioplasty in Carotid Endarterectomy, C. E. Counsell, R. Salinas, R. Naylor and C. P. Warlow ................................................................. 345

ORIGINAL ARTICLES

The Concentration of High Molecular Weight Compounds in Interstitial Tissue Fluid: A Study in Patients with Post-reconstructive Leg Oedema, R. Haaverstad, I. Romslo and H. O. Myhre ................................................................. 355

Inflammatory Aortic Aneurysms: Regression of Fibrosis after Aneurysm Surgery, M. Blitsch, H. H. Nørgaard, O. Røder, T. V. Schroeder and J. E. Lorentzen ................................................................. 371

Changes in Platelet Count, Coagulation and Fibrinogen Associated with Elective Repair of Asymptomatic Abdominal Aortic Aneurysm and Aortic Reconstruction for Occlusive Disease, A. Bradbury, D. Adam, M. Garrioch, J. Brittenden, T. Gillies and C. V. Ruckley ................................................................. 375

The Regulation of Neutrophil Activation and Adhesion during Femorodistal Bypass Surgery, J. I. Spark, I. C. Chetter, R. C. Kester, P. J. Guillou and D. J. A. Scott .................................................. 407

ENDOVASCULAR AND SURGICAL TECHNIQUES

CASE REPORTS
The Ileocolic Artery as a Separate Aortic Branch in a Patient with an Aortic Aneurysm, A. C. Vahl, F. G. van den Berg and J. A. Rauwerda ............................................................ 417

Symptomatic Unilateral Hydronephrosis: A Late Complication of Aortobifemoral Bypass Graft Surgery, N. J. Barber, M. Emberton, G. Das and J. Derodra .................................................................... 419

ANNOUNCEMENT
The Endorsement and Certification Committee of The European Society for Vascular Surgery (ECC-ESVS), G. M. Biasi, Chairman ECC-ESVS .................................................................................... 421

CORRESPONDENCE .............................................................................................................................. 423

FORTHCOMING EVENTS ......................................................................................................................... 426

Number 5, May 1997

LEADING ARTICLE
Prospects for Prevention of Graft Stenosis and Angioplasty Restenosis, P. Chan ............................................... 429

ORIGINAL ARTICLES
Ruptured Popliteal Artery Aneurysm. An Insidious Complication, R. B. Sie, I. Dawson, J. M. van Baalen, L. J. Schultze Kool and J. H. van Bockel .................................................................................................................. 432

Wall Shear Stress and Early Atherosclerotic Lesions in the Abdominal Aorta in Young Adults, E. M. Pedersen, M. Agerbæk, I. B. Kristensen and A. P. Yoganathan .................................................................................. 443

Surgical Treatment for Chronic Critical Leg Ischaemia: a 5 year Follow-up of Socioeconomic Outcome, M. Luther ...................................................................................................................... 452

Comparison of Cost Affecting Parameters and Costs of the “Closed” and “Open” in situ Bypass Technique, L. C. van Dijk, R. Seerden, H. van Urk and C. H. A. Wittens ............................................................................... 460

Discriminative Microcirculatory Screening of Patients with Refractory Limb Ischaemia for Dorsal Column Stimulation, P. Gersbach, M. G. Hasdemir, R. D. Stevens, B. Nachbur and F. Mahler ............................................................................................................................................ 464

Concurrent Comparison of Endoluminal Repair vs. No Treatment for Small Abdominal Aortic Aneurysms, J. May, G. H. White, W. Yu, R. Waugh, M. Stephen and J. P. Harris .................................................................................. 472

The Concept of Knee Salvage: Why Does a Failed Femorocrural/pedal Arterial Bypass Not Affect the Amputation Level?, Y. P. Panayiotopoulos, J. F. Reidy and P. R. Taylor .............................................................................. 477
Effect of Walking Distance on the Change in Ankle-brachial Pressure Index in Patients with Intermittent Claudication, T. Sakurai, M. Matsushita, N. Nishikimi and Y. Nimura ................................. 486

Local Versus General Anaesthesia in Carotid Endarterectomy: a Systematic Review of the Evidence, C. Tangkanakul, C. E. Counsell and C. P. Warlow ................................................................. 496

Long-term Prognosis for Patients with Chronic Leg Ulcers: a Prospective Cohort Study, O. Neizén, D. Bergvist and A. Lindhagen ................................................................. 500

CASE REPORTS

Spontaneous Rupture of the Renal Artery in a Patient with Ehlers-Danlos Syndrome Type IV, O. Øyen, O. P. Clausen, I. B. Brekke, A. Bakka and F. M. Pope ................................................................. 509

Aortic Dissection due to Clostridium septicum Infection, T. Monsen, H. Palmgren, C. Arnerl6v and J. Billheden ........................................................................................................................................... 517

FORTHCOMING EVENTS .............................................................................................................................................................................................. 519

Number 6, June 1997

REVIEW ARTICLE

ORIGINAL ARTICLES

Risk Factors for Intestinal Ischaemia after Aortoiliac Surgery: a Combined Cohort and Case-control Study of 2824 operations, M. Björck, T. Troëng and D. Bergqvist ................................................................. 531

Femorotibial Reconstructions for Chronic Critical Leg Ischaemia: Influence on Outcome by Diabetes, Gender and Age, M. Luther and M. Lepäntalo ........................................................................................................................................... 569

Critical and Subcritical Ischaemia, J. H. N. Wolfe and M. G. Wyatt ........................................................................................................................................... 578
