The proof of [1, Lemma 2.1(ii)] is not correct. One should first prove (iv) and then proceed as follows. For (ii), notice that $\alpha_1$ is a retract of $\alpha_{Q(1)}$:

\[
\begin{array}{ccc}
1 & \xrightarrow{\alpha_1} & Q(1) \\
\downarrow{\alpha_1} & & \downarrow{\alpha_{Q(1)}} \\
Q(1) & \xrightarrow{Q(\alpha_1)} & Q(Q(1)) \\
\end{array}
\]

\[
\begin{array}{c}
Q(1) \\
\downarrow{\alpha_1} \\
Q(1)
\end{array}
\]
