TOTAL CONTENTS

No. 1

Cold-humid effect of Baiyangdian wetland.......................... Hui-yun LI, Shi-guo XU, Tao MA (1)
Flow and transport simulation of Madeira River using three depth-averaged two-equation
turbulence closure models...................................................... Li-ren YU (11)
Modified theoretical stage-discharge relation for circular sharp-crested weirs
.......................................................... Rasool GHOBADIAN, Ensiyeh MERATIFASHI (26)
Modified Saint-Venant equations for flow simulation in tidal rivers
.......................................................... Xiao-qin ZHANG, Wei-min BAO (34)
Short-term power generation scheduling rules for cascade hydropower stations based on
hybrid algorithm ........................................... Wei XIE, Chang-ming JI, Zi-jun YANG, Xiao-xing ZHANG (46)
Reservoir operation schemes for water pollution accidents in Yangtze River
.......................................................... Xiao-kang XIN, Wei YIN, Meng WANG (59)
Application of CLEAR-VOF method to wave and flow simulations
.......................................................... Ying-wei SUN, Hai-gui KANG (67)
Settlement prediction model of slurry suspension based on sedimentation rate attenuation
.......................................................... Shuai-jie GUO, Fu-hai ZHANG, Bao-tian WANG, Chao ZHANG (79)
Numerical study of AE and DRA methods in sandstone and granite in orthogonal
loading directions .......................................... Xu-hua REN, Hai-jun WANG, Ji-xun ZHANG (93)
Seismic stability analysis of concrete gravity dams with penetrated cracks
.......................................................... Shou-yan JIANG, Cheng-bin DU (105)
Thank you to peer reviewers ............................................................... (120)

No. 2

Application of snowmelt runoff model (SRM) in mountainous watersheds: A review
.......................................................... Shalamu ABUDU, Chun-liang CUI, Muattar SAYDI, James Phillip KING (123)
Variation trends of meteorological variables and their impacts on potential evaporation in
Hailar region .................................................. Jin-liang REN, Qiong-jang LI, Mei-xiu YU, Hao-yang LI (137)
Biochemical responses of freshwater fish Carassius auratus to polycyclic aromatic
hydrocarbons and pesticides ............ Yong JI, Guang-hua LU, Chao WANG, Jie ZHANG (145)
Effects and mechanism of ozonation for degradation of sodium acetate in aqueous solution
.......................................................... De-min YANG, Bing WANG, Hong-yang REN, Jian-mei YUAN (155)
Sea level variability in East China Sea and its response to ENSO
.................................................. Jun-cheng ZUO, Qian-qian HE, Chang-lin CHEN, Mei-xiang CHEN, Qing XU (164)
Experimental research on unstable movements of sandbars under wave actions
.................................................. Jing YIN, Zhi-li ZOU, Ping DONG, Hai-fei ZHANG, Guo-qiang WU, Yi-nan PAN (175)
Relationship between soil surface roughness and hydraulic roughness coefficient on sloping farmland..........................Zi-cheng ZHENG, Shu-qin HE, Fa-qi WU (191)

Digital image processing of saturation for two-phase flow in planar porous media model
......................................................................Zhi DOU, Zhi-fang ZHOU, Si WANG, Yong HUANG (202)

Safety evaluation of replacement reinforcement quality in abutment contact zones of ultra-high arch dam in first impoundment period based on prototype monitoring
......................................................................Bo HU, Zhong-ru WU, Guan-biao LIU, Bin ZHAO, Bo XU (210)

Experimental study on scour and erosion of blocked dam
......................................................................Jing ZHANG, Zhi-xue GUO, Shu-you CAO, Feng-guang YANG (219)

Fuzzy stochastic damage mechanics (FSDM) based on fuzzy auto-adaptive control theory
......................................................................Ya-jun WANG, Wo-hua ZHANG, Chu-han ZHANG, Feng JIN (230)

No. 3

Analysis of dynamic wave model for flood routing in natural rivers
......................................................................Reza BARATI, Sajjad RAHIMI, Gholam Hossein AKBARI (243)

Mathematical model for flood routing in Jingjiang River and Dongting Lake network
......................................................................Zuo-tao XIE, Fang-li YANG, Xiao-li FU (259)

Wavelet analysis of spring climate characteristics in arid aeolian area of agro-pastoral ecotone in China............Chun-xia ZOU, Xiang-dong SHEN, Hong-yun LI, Xia-zi LI, Zhang-jun LI (269)

Extended activated sludge model no. 1 (ASM1) for simulating biodegradation process using bacterial technology...........Ya-jing SONG, Yue-bo XIE, Doddi YUDIANTO (278)

Time-domain hydrodynamic analysis of pontoon-plate floating breakwater
......................................................................Zhi-jie CHEN, Yong-xue WANG, Hua-yang DONG, Bin-xin ZHENG (291)

Correlation between sea surface temperature and wind speed in Greenland Sea and their relationships with NAO variability
..............Bo QU, Albert J. GABRIC, Jing-nan ZHU, Dao-rong LIN, Feng QIAN, Min ZHAO (304)

Application of equivalent resistance to simplification of Sutong Bridge piers in tidal river section modeling...........Lei TANG, Wei ZHANG, Ming-xiao XIE, Zhen YU (316)

Optimal sensor placement in hydropower house based on improved triaxial effective independence method...................Ji-jian LIAN, Long-jun HE, Hai-jun WANG (329)

Risk analysis of slope instability of levees under river sand mining conditions
......................................................................Zhuo-fu WANG, Ji-yong DING, Gao-sheng YANG (340)

Penalty model for delay of bidding section construction period in South-to-North Water Diversion Eastern Route Project from perspective of programs
......................................................................Jing-chun FENG, Ya-fang REN, Zhong-nan DUAN, Zhan-jun LIU, Hai-yang LI (350)

No. 4

Effects of temperature and nutrients on phytoplankton biomass during bloom seasons in Taihu Lake..............Lin-lin CAI, Guang-wei ZHU, Meng-yuan ZHU, Hai XU, Bo-qiang QIN (361)

Algicidal effect of bacterial isolates of Pedobacter sp. against cyanobacterium Microcystis aeruginosa..................Li YANG, Hiroto MAEDA, Takeshi YOSHIKAWA, Gui-qin ZHOU (375)

Hydrodynamic and morphological processes in Yangtze Estuary: State-of-the-art research and its applications by Hohai University
 Seasonal and interannual variations of flow discharge from Pearl River into sea

Seasonal and interannual variability of mean velocity of Kuroshio based on satellite data

Numerical solutions for two nonlinear wave equations

Experimental study on modulational instability and evolution of crescent waves

Key techniques for evaluation of safety monitoring sensors in water conservancy and hydropower engineering

Estimating water deficit and its uncertainties in water-scarce area using integrated modeling approach

Optimization and coordination of South-to-North Water Diversion supply chain with strategic customer behavior
