In the above referenced paper, we obtained a new lacunary sequence  $\theta' = (P_{k_r})$  using a sequence of positive real numbers  $(p_k)$ . But we did not notice a lack of provision in the article. Throughout the paper,  $H_r \rightarrow \infty$  as  $r \rightarrow \infty$  should be assumed. The reason for adding such a provision is that the assumption “ $P_n \rightarrow \infty$  as  $n \rightarrow \infty$ ” may not be enough to obtain the condition “ $H_r \rightarrow \infty$  as  $r \rightarrow \infty$ ”.

Also, in the hypothesis of Theorem 6, the condition  $I'_r \subset I_r$  should be added, whereas the condition  $I_r \subset I'_r$  should be added in the hypothesis of Theorem 7 and Corollary 3.
