Author Index Volume 194 (2006)

Barbatis, G. and A. Tertikas, On a class of Rellich inequalities 156–172

Binding, P.A. and H. Volkmer, Interlacing and oscillation for Sturm–Liouville problems with separated and coupled boundary conditions 75–93

Brown, B.M. and M.S.P. Eastham, Extensions of the Kummer evaluation of a finite hypergeometric series 131–140

Brown, B.M. and W.D. Evans, Foreword 1–1

Brown, B.M. and W.D. Evans, Laudatum 2–2

Chen, F., X. Xie and J. Shi, Existence, uniqueness and stability of positive periodic solution for a nonlinear prey-competition model with delays 368–387

Chen, F., see Deng, J. 267–283

Das, V.B., see Kumar, A. 388–394

Deng, J., F. Chen and Y. Feng, Dimensions of spline spaces over T-meshes 267–283

Eastham, M.S.P., see Brown, B.M. 131–140

Eastham, M.S.P., see Brown, B.M. 173–175

Edmunds, D.E. and W.D. Evans, Spectral problems on arbitrary open subsets of $\mathbb{R}^n$ involving the distance to the boundary 36–53

Erhan, I.M. and H. Tasei, A model for the computation of quantum billiards with arbitrary shapes 227–244

Evans, W.D., see Brown, B.M. 1–1

Evans, W.D., see Brown, B.M. 2–2

Evans, W.D., see Edmunds, D.E. 36–53

Fang, W., K. Ito and D.A. Redfern, A homogenization model for laser beam-induced current imaging and detection of non-uniformities in semiconductor arrays 395–408

Feng, Y., see Deng, J. 267–283

Glover, W., see Yuan, C. 207–226

Guseinov, G.Sh., see Anderson, D.R. 309–342

Harrell, E.M., Geometric lower bounds for the spectrum of elliptic PDEs with Dirichlet conditions in part 26–35

Hempen, R., On the lowest eigenvalue of the Laplacian with Neumann boundary condition at a small obstacle 54–74

Hoffacker, J., see Anderson, D.R. 309–342

Hongmin, R. and W. Qingbiao, The convergence ball of the Secant method under Hölder continuous divided differences 284–293

Ito, K., see Fang, W. 395–408

Jais, M., Unique identifiability of the common support of coefficients of a second order anisotropic elliptic system by the Dirichlet–Neumann map 3–16

Kiselev, A.V. and S.N. Naboko, Nonself-adjoint operators with almost Hermitian spectrum: Matrix model. I 115–130

Kumar, A. and V.B. Das, Convergence of cubic piecewise function 388–394

Lamba, H. and T. Seaman, Mean-square stability properties of an adaptive time-stepping SDE solver 245–254

Lee, Y.H., L. Sherbakov, J. Taber and J. Shi, Bifurcation diagrams of population models with nonlinear, diffusion 357–367

Leite, V.J.S., see Montagner, V.F. 192–206

Levin, M., see Jakobson, D. 141–155

Li, C., see Ye, X. 294–308

Luo, Z. and X. Peng, A $C^1$-rational spline in range restricted interpolation of scattered data 255–266

Ma, C., Finite-element method for time-dependent Maxwell’s equations based on an explicit-magnetic-field scheme 409–424

Maz’ya, V., Conductor inequalities and criteria for Sobolev type two-weight imbeddings 94–114

Naboko, S.N., see Kiselev, A.V. 115–130

Nadirashvili, N., see Jakobson, D. 141–155

Niamsup, P., see Phat, V.N. 343–356
