Preface

The Communication Technologies for Vehicles workshop series provides an international forum on latest technologies and research in the field of intra- and inter-vehicle communications in which to present original research results in all areas relating to communication protocols and standards, mobility and traffic models, experimental and field operational testing, and performance analysis.

Previous Nets4Cars workshops were held in Saint Petersburg, Russia (2009) and in Newcastle, UK (2010). These proceedings contain the papers presented at the Third International Workshop on Communication Technologies for Vehicles (Nets4Cars and Nets4Trains 2011), which for the first time had dedicated tracks for road- and rail-based approaches and took place in Oberpfaffenhofen near Munich, Germany, in March 2011.

Our call for papers resulted in 34 submissions, 13 for the rail track and 21 for the road track. Each of them was assigned to at least four members of our outstanding Technical Program Committee with specific expertise in the field. After a double-blind review process in just 2 weeks and some online discussion on boundary cases, the Program Committee Co-chairs selected 19 full papers for publication in these proceedings and presentation at the workshop, 7 of them for the rail track and 12 for the road track. In addition, one invited paper was accepted from a strong industrial stakeholder in the rail track who also gave the keynote. The order of the papers in these proceedings was aligned with the workshop program.

We extend a sincere “thank you” to all the authors who submitted papers of their most recent work, to all the members of our hard-working comprehensive Technical Program Committee, as well as the thoughtful external reviewers.

March 2011

Thomas Strang and Andreas Festag,
TPC Co-Chairs
Alexey Vinel and Rashid Mehmood,
General Co-Chairs
Cristina Rico Garcia,
Rail Track Chair
Matthias Röckl,
Road Track Chair
Organization

Conference Organizers

General Co-chairs
Alexey Vinel (SPIIRAS, Russia)
Rashid Mehmood (Swansea University, UK)

Technical Program Co-chairs
Thomas Strang (DLR, Germany)
Andreas Festag (NEC, Germany)

Rail Track Chair
Cristina Rico Garcia (DLR, Germany)

Road Track Chair
Matthias Röckl (In2Soft, Germany)

Steering Committee

Axel Sikora
Duale Hochschule Baden-Wurttemberg, Germany

Tsutomu Tsuboi
Renesas Corp., Japan

Fei Liu
University of Twente, The Netherlands

Xu Li
State University of New York at Buffalo, USA

Yan Zhang
Simula Research Laboratory, Norway

Antonella Molinaro
University Mediterranea of Reggio Calabria, Italy

Marion Berbineau
INRETS, France

Juan de Dios Sanz Bobi
CITEF, Spain

Technical Program Committee

Marina Aguado
University of the Basque Country (Spain)

Onur Altintas
Toyota InfoTechnology Center (Japan)

Atif Alvi
LUMS (Pakistan)

Petros Belimpasakis
Nokia Research Center (Finland)

Marion Berbineau

Additional Reviewers

Robert Schmidt  
Osianoh Aliu  
Amin Amich  
Herv Bonneville  
Miguel Sepulcre

DENSO AUTOMOTIVE Deutschland GmbH (Germany)  
University of Surrey (UK)  
University of Surrey (UK)  
Mitsubishi Electric R&D Centre Europe (France)  
University Miguel Hernandez of Elche (Spain)

Hosting Institution

Nets4Cars & Nets4Trains 2011 was hosted by the Institute of Communications and Navigation at the German Aerospace Center (DLR)

Sponsoring Institutions

German Aerospace Center (DLR), Germany  
SPIIRAS, Russia  
Swansea University, UK  
Tampere University of Technology, Finland
Table of Contents

Keynote

Requirements for Wireless Technology on Rolling Stock ................. 1

Uwe Kucharzyk

Rail Track

An Experimental Study of Multi-radio Platform Coexistence in the 5 GHz Band for Railway Applications ............................ 11

Jorge Higuera, Elli Kartsakli, Carlos Collado,
José M. González-Arbesú, Luis Alonso, José Luis Valenzuela,
Andres Laya, Enrique Flores, Isabel Navarro, Raquel Martínez,
Jesús González, José Hierro, and Adrian Vlad

Train Tracking and Shadowing Estimation Based on Received Signal Strength ........................................................ 23

Hadi Noureddine, Damien Castelain, and Ramesh Pyndiah

Delivering Broadband Internet Access for High Speed Trains Passengers Using an Innovative Network Mobility Solution ............... 34

Bernadette Villeforceix

Measurement and Analysis of the Direct Train to Train Propagation Channel in the 70 cm UHF-Band .............................. 45

Andreas Lehner, Cristina Rico García, Thomas Strang, and Oliver Heirich

WiMax’ble Pervasive Cloud – Empowering Next Generation Intelligent Railway Infrastructure ........................................ 58

Subrahmanya Venkata Radha Krishna Rao and Vivek Diwanji

The MIH (Media Independent Handover) Contribution to Mobility Management in a Heterogeneous Railway Communication Context: A IEEE802.11/802.16 Case Study ..................................................... 69

Marina Aguado, Jasone Astorga, Jon Matias, and Maider Huarte

Multiple Description Coding and Scalable Video Coding Combined with Multiple Input Multiple Output Techniques: Two Strategies to Enhance Train to Wayside Video Transmissions in Tunnels ............ 83

Imade Fahd Eddine Fatani, Yann Cocheril, Crépin Nsiala,
Marion Berbiceau, François-Xavier Coudoux,
Marie Zwingelstein-Colin, and Patrick Corlay
