CORE FastSync

Keep your data in sync with CORE and never miss a new research output.

CONTACT US FOR A QUOTE

Fresh data
An enterprise solution to keep your data in sync with research content from around the world

Time saving
Spend less time collecting data and more on solving problems

Instant updates
Fast and incremental updates as soon as they become available. No usage restrictions

Technical support
We provide technical support, so you can be confident you can rely on it.

How it works?

FastSync enables you to keep an always up to date copy of all CORE data in your infrastructure, new content is transferred as soon as it becomes available in CORE. It provides fast, incremental and enterprise data synchronisation. It is our premium service, ideal for all types of businesses, from start-ups to large enterprises.

Where to start?

FastSync implements an improved version of the ResourceSync protocol. We provide our customers with a data client they can install on their servers. Customers can run this client as often as they desire, receiving incremental updates from CORE. We also provide technical support for this service, so you can be confident that you can rely on it.

What’s included?

FastSync provides you with:

• Ability to keep in sync with CORE, receiving updates as frequently as desired.
• An initial data dump and a client for incremental updates.
• Technical support for the duration of the service.

CONTACT US FOR A QUOTE

By integrating with CORE, we have significantly increased the number of research papers in the Naver Academic indexes. In fact, CORE is Naver's largest provider of full text content. CORE's data are now synchronised with Naver using CORE FastSync, reducing the amount of effort that would be needed to collect these data in traditional ways.
